CERTIFICATION OF THE ACCOUNTS

The annual accounts of the 8th, 9th and 10th European Development Funds for the year 2013 have been prepared in accordance with Title VIII of the Financial Regulation of the 10th European Development Fund and with the accounting principles, rules and methods set out in annex to the financial statements.

I acknowledge my responsibility for the preparation and presentation of the annual accounts of the 8th, 9th and 10th European Development Funds in accordance with Article 125 of the Financial Regulation of the 10th European Development Fund.

I have obtained from the authorising officer and from the EIB, who guarantee its reliability, all the information necessary for the production of the accounts that show the European Development Funds' assets and liabilities and the budgetary implementation.

I hereby certify that based on this information, and on such checks as I deemed necessary to sign off the accounts, I have a reasonable assurance that the accounts present a true and fair view of the financial position of the European Development Funds in all material aspects.

(Signed)

Manfred Kraff

Accounting Officer

IMPLEMENTING AND ACCOUNTING FOR THE EDF RESOURCES

1. BACKGROUND

The European Union (EU) has cooperative development relations with a large number of developing countries. The main objective is to promote economic, social and environmental development, with the primary aim of reducing and eradicating poverty in the long-term, by providing beneficiary countries with development aid and technical assistance. To achieve this, the EU draws up, jointly with the partner countries, cooperation strategies and mobilises the financial resources to implement them. These EU resources allocated to development cooperation come from three sources:

- The EU budget;
- The European Development Fund;
- The European Investment Bank.

The European Development Fund (EDF) is the main instrument for providing EU aid for development cooperation to the African, Caribbean and Pacific (ACP) States and Overseas Countries and Territories (OCTs).

The EDF is not funded by the EU budget. It is established by an internal agreement of the Representatives of the Member States, sitting within the Council, and managed by a specific committee. The European Commission (hereafter referred to as "Commission") is responsible for the financial implementation of the operations carried out with EDF resources and the European Investment Bank (EIB) manages the Investment Facility.

During the period 2008-2013, the geographic aid granted to ACP States and OCTs continued to be mainly funded by the EDF. Each EDF is usually concluded for a period of around five years. Each EDF is governed by its own Financial Regulation which imposes the preparation of financial statements for each individual EDF. Accordingly, financial statements are prepared separately for each EDF in respect of the part that is managed by the Commission. These financial statements are also presented in an aggregated way so as to provide a global view of the financial situation of the resources for which the Commission is responsible.

Within the framework of the ACP-EU Partnership Agreement, the Investment Facility was established. This Investment Facility is managed by the EIB and is used to support private sector development in the ACP States by financing essentially – but not exclusively – private investments. The Facility is designed as a renewable fund, so that loan repayments can be reinvested in other operations, thus resulting in a self-renewing and financially independent Facility. As the Investment Facility is not managed by the Commission, it is not consolidated in the first part of the annual accounts – the financial statements of the 8th, 9th and 10th EDFs and the related report on financial implementation. The financial statements of the Investment Facility are included as a separate part of the annual accounts (part II) to provide a full picture of the development aid of the EDF. The 10th EDF covers the period from 2008 to 2013 and has an overall budget of EUR 22 682 million¹.

2. HOW IS THE EDF FUNDED?

The European Council of 15-16 December 2005 adopted the financial perspectives for 2007-2013. In this context it was decided that geographical cooperation with the ACP States would not be integrated into the EU budget (budgetised), but would continue to be funded through the existing inter-governmental EDF for the period 2008-2013.

The EU budget is annual and according to the budgetary principle of annuality, expenditure and revenue are planned and authorised for one year. Unlike the EU, the EDF is a fund operating on the basis of multiannuality. Each EDF establishes an overall fund to implement development cooperation during a period of usually five years. As resources are allocated on a multiannual basis, the allocated funds may be used over the period of the EDF. The lack of budget annuality is

¹ OJ L 247, 09.09.2006, p. 22.

highlighted in the budgetary reporting, where the budgetary implementation of the EDFs is measured against the total funds.

The EDF resources are “ad hoc” contributions from the EU Member States. Approximately every five years, Member State representatives meet at intergovernmental level to decide on an overall amount that will be allocated to the fund and to oversee its implementation. The Commission then manages the fund in accordance with the Union policy in development cooperation. Since Member States have their own development and aid policies in parallel to the Union policy, the Member States must coordinate their policies with the EU to ensure they are complementary.

In addition to the above mentioned contributions, it is also possible for Member States to enter into co-financing arrangements or to make voluntary financial contributions to the EDF.

3. YEAR-END REPORTING

3.1 Annual accounts

It is the Accounting Officer's responsibility to prepare the annual accounts and ensure that they present a true and fair view of the financial position of the EDF.

The annual accounts are presented as follows:

Part I: Funds managed by the Commission

- Financial statements of the 8th, 9th and 10th EDFs
- Report on financial implementation of the 8th, 9th and 10th EDFs

Part II: Funds managed by the EIB

- Financial statements of the Investment Facility

The financial statements of the Investment Facility are included as a separate part of the annual accounts so as to provide a full picture of the development aid of the EDF.

Following audit by the European Court of Auditors (ECA), the annual accounts are adopted by the Commission by 31 July of the subsequent year and presented to the European Parliament and to the Council for discharge.

4. AUDIT AND DISCHARGE

4.1 Audit

The EDF annual accounts and resource management are overseen by its external auditor, the ECA, which draws up an annual report for the European Parliament and the Council.

4.2 Discharge

The final control is the discharge of the financial implementation of the EDF resources for a given financial year. The European Parliament is the discharge authority of the EDF. This means that following the audit and finalisation of the annual accounts it falls to the Council to recommend and then to the Parliament to decide whether to grant discharge to the Commission for the financial implementation of the EDF resources for the preceding financial year. This decision is based on a review of the accounts and the annual report of the ECA (which includes an official statement of assurance) and replies of the Commission, and also following questions and further information requests to the Commission.

PART I - EDF ANNUAL ACCOUNTS: FUNDS MANAGED BY THE COMMISSION²

² All figures are rounded into millions of euros. It should be noted that due to the rounding of figures, some financial data in the tables may not add up. Amounts shown as 0 represent figures of less than EUR 500 000. Amounts that equal to zero are shown as a dash (-).

1.5 NOTES TO THE FINANCIAL STATEMENTS OF THE 8TH, 9TH AND 10TH EDFs

1. SIGNIFICANT ACCOUNTING POLICIES

1.1. LEGAL PROVISIONS AND THE FINANCIAL REGULATION

The financial statements are drawn up in accordance with the Financial Regulation applicable to the 10th EDF ("EDF FR")⁵. In accordance with the provisions of its Article 121, the financial statements are prepared respecting the principles of accrual accounting.

These financial statements have been drafted in conformity with the accounting rules and methods of the EDF, themselves drawn up on the basis of International Public Sector Accounting Standards (IPSAS) as issued by the International Public Sector Accounting Standard Board (IPSASB). The accounting rules adopted by the Accounting Officer of the EDF have been applied in respect of the part of the EDF resources for which the Commission is responsible for financial management.

The EDF Accounting Officer must submit the provisional accounts to the ECA for audit by 31 March of the following year. The ECA shall in turn make its observations on the accounts known to the Commission by 15 June (Article 125). On the basis of these observations, the Commission approves the annual accounts by 31 July and sends them to the European Parliament, the Council and the ECA. The accounts are then published in the Official Journal by 15 November, together with the statement of assurance given by the ECA in respect of the part of the EDF resources for which the Commission is responsible for the financial management.

1.2. ACCOUNTING PRINCIPLES

The objective of the financial statements is to provide information about the financial position, performance and cash flows of an entity that is useful to a wide range of users. For a public sector entity such as the EDF, the objectives are more specifically to provide information useful for decision making, and to demonstrate the accountability of the entity for the resources entrusted to it.

If they are to present a true and fair view, financial statements must not only supply relevant information to describe the nature and range of an organisation's activities, explain how it is financed and supply definitive information on its operations, but do so in a clear and comprehensible manner which allows comparisons between financial years. It is with these goals in mind that the present document has been drawn up.

The accounting system of the EDF comprises general accounts and budget accounts. The budget accounts give a detailed picture of the implementation of the budget. They are based on the cash accounting principle. The general accounts allow for the preparation of the financial statements as they show all expenses and income for the financial year based on accrual accounting rules and are designed to establish the financial position in the form of a balance sheet at 31 December.

Article 120 of the 10th EDF FR sets out the accounting principles to be applied in drawing up the financial statements:

- going concern basis;
- prudence;
- consistent accounting methods;
- comparability of information;
- materiality;

⁵ Council Regulation (EC) No 215/2008 of 18.02.2008 on the Financial Regulation applicable to the 10th European Development Fund, OJ L 78, 19.03.2008, amended by the Council Regulation (EU) No 370/2011 of 11 April 2011, OJ L 102, 14.04.2011.

- no netting;
- reality over appearance;
- accrual-based accounting.

1.3. BASIS OF PREPARATION

1.3.1. Functional and reporting currency

The financial statements are presented in millions of euros, the euro being the functional and reporting currency of the EDF.

1.3.2. Currency and basis for conversion

Foreign currency transactions are translated into euros using the exchange rates prevailing on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the economic outturn account.

Year-end balances of monetary assets and liabilities denominated in foreign currencies are converted into euros on the basis of the below exchange rates applying on 31 December:

| Currency | 31.12.2013 | 31.12.2012 | Currency | 31.12.2013 | 31.12.2012 |
|-----------------|-------------------|-------------------|-----------------|-------------------|-------------------|
| XOF | 655.957 | 655.957 | KES | 117.270 | 113.460 |
| XAF | 655.957 | 655.957 | BIF | 2107.95 | 2037.95 |
| NGN | 212.376 | 206.074 | SLL | 6013.08 | 5709.56 |
| PGK | 3.38524 | 2.76702 | TZS | 2166.71 | 2077.48 |
| HTG | 60.7227 | 56.2987 | UGX | 3423.24 | 3508.51 |
| GNF | 9616.41 | 9250.40 | MGA | 3092.68 | 2981.70 |
| MWK | 595.810 | 439.917 | SZL | 14.5660 | 11.1727 |

1.3.3. Use of estimates

In accordance with IPSAS and generally accepted accounting principles, the financial statements necessarily include amounts based on estimates and assumptions by management based on the most reliable information available. Significant estimates include, but are not limited to, amounts for provisions, impairment losses on accounts receivable and accrued charges. Actual results could differ from those estimates. Changes in estimates are reflected in the period in which they become known.

1.4. BALANCE SHEET

1.4.1 Pre-financing amounts

Pre-financing is a payment intended to provide the beneficiary with a cash advance, i.e. a float. It may be split into a number of payments over a period defined in the particular pre-financing agreement. The float or advance is repaid or used for the purpose for which it was provided during the period defined in the agreement. If the beneficiary does not incur eligible expenditures, he/she has to return the pre-financing advance to the EDF. The amount of the pre-financing is reduced (wholly or partially) by the acceptance of eligible costs and amounts returned.

At year-end, outstanding pre-financing amounts are valued at the original amount(s) paid less: amounts returned, eligible amounts cleared, estimated eligible amounts not yet cleared at year-end and value reductions.

Interest on pre-financing is recognised as it is earned in accordance with the provisions of the relevant agreement. An estimate of the accrued interest revenue, based on the most reliable information, is made at year-end.

1.4.2 Receivables

Receivables are carried at original amount less write-down for impairment. A write-down for impairment of receivables is established when there is objective evidence that the full amount due cannot be collected according to the original terms of the receivable. The amount of the write-down is the difference between the asset's carrying amount and the recoverable amount, being the present value of expected future cash flows, discounted at the market rate of interest for similar borrowers. Also recognised is a general write-down for outstanding recovery orders not already subject to a specific write-down. This general write-down is based on the historical loss rates. The amount of the write-down is recognised in the economic outturn account.

1.4.3 Cash and cash equivalents

Cash and cash equivalents are financial instruments and are defined as current assets. They include cash at hand, deposits held at call with banks and other current highly liquid investments with original maturities of three months or less.

1.4.4 Payables

A significant amount of the payables of the EDF are not related to the purchase of goods or services – instead they are unpaid cost claims from beneficiaries of grants or other funding. They are recorded as payables for the requested amount when the cost claim is received and, after verification, accepted as eligible by the relevant financial agents. At this stage they are valued at the accepted and eligible amount.

Payables arising from the purchase of goods and services are recognised at invoice reception for the original amount and corresponding expenses are entered in the accounts when the supplies or services are delivered and accepted.

1.4.5 Provisions

Provisions are recognised when the EDF has a present legal or constructive obligation towards third parties as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. The amount of the provision is the best estimate of the expenditures expected to be required to settle the present obligation at the reporting date.

1.4.6 Accrued and deferred income and charges

A critical element in accrual accounting is the exercise of ensuring that transactions are recorded in the accounting year to which they relate. This exercise is referred to as the cut-off exercise. In particular, an assessment has to be made concerning eligible expenses incurred by beneficiaries of EDF funds but not yet reported to the EDF (accrued charges). Conversely, some payments made in the current year relate to subsequent periods (deferred charges) and these have to be identified and included in the subsequent period(s).

According to the EDF accounting rules, transactions and events are recognised in the financial statements in the period to which they relate. At the end of the accounting period, accrued expenses are recognised based on an estimated amount of the transfer obligation of the period. The calculation of the accrued expenses is made in accordance with detailed operational and practical guidelines issued by the Commission which aim at ensuring that the financial statements reflect a true and fair view.

Revenue is also accounted for in the period to which it relates. At year-end, if an invoice is not yet issued but the service has been rendered, the supplies have been delivered by the EDF or a contractual agreement exists (i.e. by reference to a treaty), an accrued income will be recognised in the financial statements.

In addition, at year-end, if an invoice is issued but the services have not yet been rendered or the goods supplied have not yet been delivered, the revenue will be deferred and recognised in the subsequent accounting period.

1.5. ECONOMIC OUTTURN ACCOUNT

1.5.1 Revenue

There is no revenue budgeted for the EDF. The ordinary contributions from Member States are treated as fund capital. Revenue comprises recovery of expenses and interest income.

Recovery of expenses

For operations giving rise to reimbursement of expenditures previously paid by the EDF to a final beneficiary or third country, recovery orders and deductions from subsequent payments are established and accounted for as follows:

- Recovery of expenses: the recovery order issued results in a receivable with the corresponding entry being income in the economic outturn account for that year; or,
- Recovery of pre-financing amounts: in this case the amount is included under the pre-financing heading on the balance sheet.

Interest income

Interest income is recognised in the economic outturn account using the effective interest method. The interest income comprises interest received or receivable on cash balances and demandable deposits held with commercial banks and on late payment of entitlements to the EDF. Interest income is recognised as it accrues.

1.5.2 Expense

Exchange expenses arising from the purchase of goods and services are recognised when the supplies are delivered and accepted. They are valued at original invoice cost.

Non-exchange expenses account for the majority of the EDF's expenditure. They relate to transfers to beneficiaries and can be of three types: entitlements, transfers under agreement and discretionary grants, or contributions and donations.

Transfers are recognised as expenses in the period during which the events giving rise to the transfer occurred, as long as the nature of the transfer is allowed by regulation (Financial Regulation or other) or a contract has been signed authorising the transfer; any eligibility criteria have been met by the beneficiary; and a reasonable estimate of the amount can be made.

When any request for payment or cost claim is received and meets the recognition criteria, it is recognised as an expense for the eligible amount. At year-end, incurred eligible expenses already due to the beneficiaries but not yet reported are estimated and recorded as accrued expenses.

Interest expense

Interest expense is recognised in the economic outturn account using the effective interest method. The interest expense comprises interest paid or payable and is recognised as it accrues.

1.6. CONTINGENT ASSETS AND LIABILITIES

1.6.1 Contingent assets

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not

wholly within the control of the EDF. A contingent asset is disclosed when an inflow of economic benefits or service potential is probable.

Contingent assets are assessed at each balance sheet date to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits or service potential will arise and the asset's value can be measured reliably, the asset and the related revenue are recognised in the financial statements of the period in which the change occurs.

Guarantees are possible assets that arise from past events and whose existence will be confirmed by the occurrence or non-occurrence of the object of the guarantee. Guarantees can thus qualify as contingent assets. A guarantee is settled when the object of the guarantee no longer exists. It is crystallised when the conditions are fulfilled for calling for a payment from the guarantor.

1.6.2 Contingent liabilities

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the EDF; or a present obligation that arises from past events but is not recognised because: it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation or, in the rare circumstances where the amount of the obligation cannot be measured with sufficient reliability. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits or service potential is remote.

Contingent liabilities are assessed at each balance sheet date to determine whether an outflow of resources embodying economic benefits or service potential has become probable. If it becomes probable that an outflow of resources embodying economic benefits or service potential will be required for an item dealt with as contingent liability, a provision is recognised in the financial statements of the period in which the change of probability occurs.

2. NOTES TO THE BALANCE SHEET

NON-CURRENT ASSETS

2.1 PRE-FINANCING

| | | | | | <i>EUR millions</i> |
|---------------|---------------------|---------------------|----------------------|-----------------------------|-----------------------------|
| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | TOTAL 31.12.2012 |
| Pre-financing | - | 90 | 334 | 424 | 438 |
| TOTAL | - | 90 | 334 | 424 | 438 |

Many contracts provide for payments of advances before the commencement of works, deliveries of supplies or the provision of services. Sometimes the payment schedules of contracts foresee payments on the basis of progress reports. Pre-financing is normally paid in the currency of the country or territory where the project is executed.

The timing of the recoverability or utilisation of the pre-financing governs whether it is disclosed as a current or a non-current pre-financing asset. The utilisation is defined by the project's underlying agreement. Any repayments or utilisation due within twelve months of the reporting date are disclosed as current pre-financing. As many of the EDF projects are long-term in nature, it is necessary that the related advances are available for more than one year. Thus these pre-financing amounts are shown as non-current assets.

CURRENT ASSETS

2.2 PRE-FINANCING

| | | | | | <i>EUR millions</i> |
|--|---------------------|---------------------|----------------------|-----------------------------|-----------------------------|
| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | TOTAL 31.12.2012 |
| Pre-financing (gross) | 39 | 832 | 3 059 | 3 931 | 3 593 |
| Less estimated clearing of pre-financing | (34) | (573) | (2 038) | (2 645) | (2 259) |
| TOTAL | 5 | 259 | 1 021 | 1 286 | 1 334 |

2.2.1 *Guarantees received in respect of pre-financing*

Guarantees are held to secure pre-financing and are released when the final claim under a project is paid. A guarantee has two different values referred to as the "nominal" and the "on-going" values. For the "nominal" value, the generating event is linked to the existence of the guarantee. For the "on-going" value, the guarantee's generating event is the pre-financing payment and/or subsequent clearings.

At 31 December 2013 the "nominal" value of guarantees received by the EDF in respect of pre-financing amounts to EUR 303 million. The "on-going" value of those guarantees amounts to EUR 151 million.

In 2013 an in-depth review of the guarantees has been performed. Following this review, guarantees with a "nominal" value of EUR 333 million have been written-off as not belonging to the EDF. Had the 2012 comparatives been updated, the "nominal" value would have decreased from EUR 566 million to EUR 349 million and the "on-going" value would have decreased from EUR 391 million to EUR 185 million.

2.3 RECEIVABLES

| | Note | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | EUR millions TOTAL 31.12.2012 |
|--|-------|------------------------|------------------------|-------------------------|---------------------|-------------------------------------|

2.3.1 Receivables from customers, public bodies and third states

| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | EUR millions TOTAL 31.12.2012 |
|--|---------------------|---------------------|----------------------|---------------------|-------------------------------------|
| Receivables from customers, public bodies and third states | 6 | 19 | 13 | 38 | 26 |
| -Write-down | (3) | (10) | (1) | (14) | (16) |
| TOTAL | 2 | 9 | 12 | 24 | 10 |

The movements in open recovery orders during the period are detailed below:

| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 2013 | EUR millions TOTAL 2012 |
|--|---------------------|---------------------|----------------------|---------------|-------------------------------|
| Open recovery orders at beginning of year | 5 | 19 | 3 | 26 | 25 |
| Recovery orders issued | 3 | 40 | 133 | 176 | 139 |
| Recovery orders closed | (2) | (40) | (123) | (165) | (138) |
| Cashed | (1) | (27) | (103) | (131) | (97) |
| Waived | (0) | (1) | (0) | (1) | (1) |
| Cancelled | (0) | (6) | (0) | (6) | (4) |
| Offset | (1) | (7) | (19) | (27) | (36) |
| Open recovery orders at end of year | 6 | 19 | 13 | 38 | 26 |

2.3.2 Receivables from Member States

The EUR 3 million receivable from Member States in the 10th EDF comprises cofinancing contributions from United Kingdom, Denmark and Sweden.

2.3.3 Accrued income and deferred charges

Accrued income and deferred charges include primarily accrued interest on pre-financing amounts. Additionally, accrued interest income on late payment of contributions is included under this heading.

2.4 LIAISON ACCOUNTS

| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | EUR millions |
|------------------|---------------------|---------------------|----------------------|---------------------|--------------|
| Liaison accounts | 290 | 1 323 | (1 613) | 0 | |
| TOTAL | 290 | 1 323 | (1 613) | 0 | |

For reasons of efficiency, the single treasury covering all the EDFs is allocated to the 10th EDF; this leads to operations between the various EDFs, which are balanced out in the liaison accounts between the various EDF balance sheets.

2.5 CASH AND CASH EQUIVALENTS⁶

| | Note | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | EUR millions TOTAL 31.12.2012 |
|--|-------|------------------------|------------------------|-------------------------|---------------------|-------------------------------------|

| STABEX security accounts | 2.5.1 | - | - | - | - | 2 |
| Democratic Republic Congo special fund ⁷ | - | - | - | 1 | 1 | 1 |
| TOTAL | | - | - | 759 | 759 | 690 |

2.5.1 STABEX Security accounts

| | Balance at 31.12.2013 | Balance at 31.12.2012 |
|-----------------|--------------------------|--------------------------|
| Ivory Coast | - | 2 |
| Other countries | - | 0 |
| TOTAL | - | 2 |

STABEX is the acronym for a EU compensatory finance scheme to stabilise export earnings of the ACP countries.

In addition to these funds, there are other STABEX funds held by beneficiary ACP States. Once the Commission and the beneficiary (ACP) State reach agreement on how the STABEX funds are to be utilised, a transfer convention is signed by both parties. In accordance with the provisions of Article 211 of the Lomé IV Agreement⁸ (as revised), the funds are transferred into an interest bearing double signature account (Commission and Beneficiary State) opened in the name of the ACP State. The funds remain in these double signature accounts until a Framework of Mutual Obligations (FMO) justifies a transfer for a project. During 2013, the remaining STABEX security accounts were closed following the winding up of the STABEX aid instruments.

The Commission's Authorising Officer retains the power of signature over the account in order to ensure that the funds are disbursed as intended. The funds in the double signature accounts are the property of the ACP State and are consequently not recorded as assets in the EDF accounts. The transfers to these accounts are recorded as STABEX payments. See also note **3.1.2** for more information.

NON-CURRENT LIABILITIES

2.6 PAYABLES

| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | EUR millions TOTAL 31.12.2012 |
|-------------------------|---------------------|---------------------|----------------------|---------------------|-------------------------------------|
| Co-financing - payables | - | - | 25 | 25 | 40 |
| TOTAL | - | - | 25 | 25 | 40 |

Co-financing payables at the end of 2013 relate to the 10th EDF.

⁶ In accordance with Article 153 of the 10th EDF Financial Regulation, the treasury is presented in the balance sheet of the 10th EDF. The nature of the various bank accounts is outlined in chapter 6, Financial Risk Management.

⁷ This balance represents the amounts available for the Democratic Republic of the Congo in accordance with the provisions of Council Decision 2003/583/EC7.

⁸ OJ L 156, 29.5.1998, p. 3-106.

Co-financing contributions received are presented as payables to Member States and non-Member States as they fulfill the criteria of revenues from non-exchange transactions under condition. The EDF is required to use the contributions to deliver services to third parties or is otherwise required to return the assets (the contributions received) to the Member States. The outstanding payable for co-financing agreements represents the co-financing contribution received less the expenses incurred related to the project. The effect on net assets is nil.

The increase in the total co-financing payables is explained in the note **2.7.1.2**.

CURRENT LIABILITIES

2.7 PAYABLES

| | Note | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | <i>EUR millions</i> TOTAL 31.12.2012 |
|------------------------------------|-------|------------------------|------------------------|-------------------------|-----------------------------|--|
| Current payables | 2.7.1 | 1 | 61 | 260 | 322 | 209 |
| Accrued charges | 2.7.2 | 26 | 202 | 359 | 588 | 555 |
| Deferred fund capital contribution | 2.7.3 | - | - | 304 | 304 | 293 |
| TOTAL | | 28 | 263 | 923 | 1 214 | 1 057 |

2.7.1 Current payables

| | Note | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | <i>EUR millions</i> TOTAL 31.12.2012 |
|-----------------------|---------|------------------------|------------------------|-------------------------|-----------------------------|--|
| Suppliers and other | 2.7.1.1 | 1 | 61 | 182 | 244 | 152 |
| Co-financing payables | 2.7.1.2 | - | 0 | 75 | 75 | 46 |
| Sundry payables | 2.7.1.3 | 0 | 0 | 3 | 3 | 12 |
| TOTAL | | 1 | 61 | 260 | 322 | 209 |

Payables include cost statements received by the EDF relating to the grant activity. They are recorded for the amount being claimed from the moment the demand is received. The same procedure applies to invoices and credit notes received under procurement activities. The cost claims concerned have been taken into account for the year-end cut-off procedures. Following the cut-off entries, estimated eligible amounts have been recognised in the economic outturn account.

2.7.1.1 Suppliers and other

Included under this heading are amounts owed to suppliers as well as amounts payable to public bodies and third states.

The increase of EUR 93 million compared to the previous reporting period relates primarily to a EUR 74 million increase in payables to third states. The highest third states payable balances are represented by Ghana (EUR 64 million) and Zambia (EUR 33 million).

2.7.1.2 Co-financing payables

The total non-current and current co-financing payables increased by EUR 14 million. In 2013, new co-financing contributions were received from Sweden (EUR 9 million), France (EUR 5 million), Australia (EUR 2 million), UK (EUR 2 million) and other countries.

The co-financing payables were decreased by EUR 8 million to recognise revenue related to the co-financing projects (see **3.1.3** and **3.2.2**).

2.7.1.3 Sundry payables

Sundry payables mainly comprise unallocated cash receipts and returned amounts.

2.7.2 Accrued charges

| | | | | TOTAL 31.12.2013 | <i>EUR millions</i> TOTAL 31.12.2012 |
|-----------------|---------------------|---------------------|----------------------|-----------------------------|--|
| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | <i>EUR millions</i> TOTAL 31.12.2012 |
| Accrued charges | 26 | 202 | 359 | 588 | 555 |
| TOTAL | 26 | 202 | 359 | 588 | 555 |

At year-end, an assessment is made concerning eligible expenses incurred by beneficiaries of EDF funds but not yet reported. Following these cut-off calculations, estimated eligible amounts are recorded as accrued charges.

Estimated utilisation of pre-financing amounts is presented as an estimated clearing of pre-financing (see **2.2**).

2.7.3 Deferred fund capital contribution

| | | | | TOTAL 31.12.2013 | <i>EUR millions</i> TOTAL 31.12.2012 |

| Called fund capital 31.12.2013 | 12 840 | 11 699 | 7 990 | 32 529 | |

The fund capital represents the total amount of contributions from Member States for the relevant EDF fund as laid down in each of the Internal Agreements.

The uncalled funds represent the initial allocation not yet called up from Member States.

The called fund capital represents the amount of the initial allocations which has been called up for transfer to the treasury accounts by the Member States in accordance with the procedure laid down in Article 16 of the 10th EDF FR.

The capital of the 8th and the 9th EDF has been called up and received in its entirety.

Called and uncalled fund capital by Member State

| Transfer of decommitted amounts to the 10th EDF from the 8 th and 9 th EDFs | (102) | (371) | 473 | 0 |
| Balance at 31.12.2013 | (2 456) | 3 756 | 952 | 2 252 |
| The balance at 31.12.2013 includes: - Funds allocated to Southern Sudan | - | 350 | - | 350 |

Since the entry into force of the 10th EDF in 2008, all decommitted funds of previous EDFs are transferred to the reserve of the 10th EDF. This reserve may be committed only under the conditions set out in Article 1(4) of the Internal Agreement of the 10th EDF.

In 2013, EUR 102 million and EUR 371 million of decommitted funds from the 8th and 9th EDFs respectively were transferred to the performance reserve of the 10th EDF.

3. NOTES TO THE ECONOMIC OUTTURN ACCOUNT

3.1 OPERATING REVENUE

| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 2013 | EUR millions TOTAL 2012 |
|-------------------------------|---------------------|---------------------|----------------------|---------------|-------------------------------|
| Recovery of expenses | 1 | 11 | 1 | 13 | 17 |
| Recovery of STABEX funds | 61 | - | - | 61 | 49 |
| Exchange gains | 2 | 23 | 16 | 41 | 51 |
| Operating income co-financing | - | - | 8 | 8 | 8 |
| TOTAL | 64 | 34 | 25 | 123 | 124 |

3.1.1 Recovery of expenses

This heading represents the recovery orders issued by the EDF and the deduction from subsequent payments recorded in the EDF accounting system, to recover expenditures previously paid out, based on controls, audits or eligibility analysis. It should be noted that recovery of pre-financing amounts is not included as revenue, but credited to the pre-financing heading on the balance sheet.

Recovery of undue payments

In 2013, recovery orders for EUR 23 million were issued in respect of undue payments, compared to EUR 27 million in 2012. Of these, EUR 6 million related to the recovery of expenses and were thus recorded as operating revenue. EUR 17 million represented recoveries of pre-financing amounts paid and were credited to the pre-financing asset on the balance sheet.

The nature of the recovery of undue payments can be summarised as follows:

| | Revenue | Pre-financing | TOTAL 2013 | Revenue | Pre-financing | TOTAL 2012 |
|---------------|----------|---------------|---------------|-----------|---------------|---------------|
| Error | 2 | 4 | 6 | 1 | 1 | 2 |
| Irregularity | 4 | 12 | 16 | 9 | 15 | 25 |
| OLAF Notified | - | 1 | 1 | 1 | - | 1 |
| TOTAL | 6 | 17 | 23 | 11 | 16 | 27 |

3.1.2 Recovery of STABEX funds

In 2013, EUR 61 million was returned to the EDF from double signature accounts in ACP countries. These funds were transferred mainly from Soudan (EUR 36 million), Ivory Coast (EUR 7 million), the Salomon Islands (EUR 5 million), Papua New Guinea (EUR 3 million), Sierra Leone (EUR 2 million), Zimbabwe (EUR 2 million) and Mauritania (EUR 2 million). These revenues are included in operating income (recovery of STABEX funds) in the economic outturn account of the 8th EDF.

3.1.3 Operating income co-financing

The operating income relating to co-financing represents the contributions used (see **3.2.2**). As these contributions fulfil the criteria of revenues from non-exchange transactions under condition, the contribution is recognised in accordance with the implementation of the co-financing project.

3.2 OPERATING EXPENSES

| | Note | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 2013 | EUR millions TOTAL 2012 |
|--------------------------------------|-------|---------------------|---------------------|----------------------|---------------|-------------------------------|
| Operating expenses – aid instruments | 3.2.1 | 49 | 330 | 2 578 | 2 957 | 2 938 |
| Operating expenses co-financing | 3.2.2 | - | - | 8 | 8 | 8 |
| Foreign exchange losses | - | 4 | 31 | 25 | 60 | 66 |
| Write-down of receivables | - | 0 | 1 | 1 | 1 | 6 |
| TOTAL | | 53 | 362 | 2 612 | 3 027 | 3 017 |

3.2.1 Operating expenses – aid instruments

| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 2013 | EUR millions TOTAL 2012 |
|---|---------------------|---------------------|----------------------|---------------|-------------------------------|
| Programmable aid | 42 | (2) | 1 678 | 1 719 | 1 476 |
| Macro-economic support | - | 21 | - | 21 | 8 |
| Sectoral policy | 0 | 225 | (2) | 222 | 326 |
| Interest rate subsidies | 0 | - | - | 0 | 5 |
| Intra ACP projects | - | 57 | 588 | 645 | 720 |
| Emergency aid | - | 17 | 253 | 270 | 333 |
| Refugee aid | 1 | - | - | 1 | 6 |
| Risk capital | 0 | - | - | 0 | 1 |
| STABEX | (1) | - | - | (1) | 4 |
| Other aid programmes related to former EDFs | - | 5 | - | 5 | 10 |
| Institutional support | - | 1 | 61 | 62 | 32 |
| Compensation export receipts | 7 | 6 | - | 13 | 18 |
| Total | 49 | 330 | 2 578 | 2 957 | 2 938 |

The EDF operating expenditure covers the various aid instruments and takes different forms, depending on how the money is paid out and managed.

3.2.2 Operating expenses co-financing

These are the expenses incurred on co-financing projects in 2013. As the co-financing contributions received fulfil the criteria of revenues from non-exchange transactions under condition, a corresponding amount of contributions has been recognised as operating revenue (see **3.1.3**).

3.3 ADMINISTRATIVE EXPENSES

| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 2013 | EUR millions TOTAL 2012 |
|-------------------------|---------------------|---------------------|----------------------|---------------|-------------------------------|
| Administrative expenses | - | 0 | 167 | 167 | 107 |
| TOTAL | - | 0 | 167 | 167 | 107 |

This heading includes support expenditure, i.e. the administrative costs related to the programming and implementation of the EDFs. This includes expenses for preparation, follow-up, monitoring, and evaluation of projects as well as expenses for computer networks, technical assistance etc.

3.4 FINANCIAL REVENUE

| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 2013 | EUR millions TOTAL 2012 |
|----------------------------------|---------------------|---------------------|----------------------|---------------|-------------------------------|
| Interest income - European banks | - | 0 | 0 | 0 | 9 |
| Interest on pre-financing | 0 | (3) | 3 | 0 | (32) |
| TOTAL | 0 | (3) | 3 | 0 | (22) |

The higher amount of interest income in 2012 is explained by income on EIB bank accounts.

Interest on pre-financing is recognised in accordance with the provisions of Article 7(3) and Article 8 of the 10th EDF FR. The negative interest revenue in 2012 was caused by the reversal of the previous year accrual for interest on pre-financing. The negative interest revenue in 2013 in the 9th EDF is mainly caused by fluctuations in the foreign currency exchange rate USD/EUR.

4. NOTES TO THE CASH FLOW STATEMENT

4.1 PURPOSE AND PREPARATION OF THE CASH FLOW STATEMENT

Cash flow information is used to provide a basis for assessing the ability of the EDF to generate cash and cash equivalents, and its needs to utilise those cash flows.

The cash flow statement is prepared using the indirect method. This means that the net surplus or deficit for the financial year is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future operating cash receipts or payments.

Cash flows arising from transactions in a foreign currency are recorded in the EDF's reporting currency (euro), by applying to the foreign currency amount the exchange rate between the euro and the foreign currency at the date of the cash flow.

4.2 OPERATING ACTIVITIES

The EDF cash flow statement only shows cash flows from operating activities as the EDF does not have investment or financing activities. The objective of the operating activities is to participate in the achievement of policy targeted outcomes.

5. CONTINGENT ASSETS AND LIABILITIES AND OTHER DISCLOSURES

5.1 CONTINGENT ASSETS

| | 8 th EDF | 9 th EDF | 10 th EDF | TOTAL 31.12.2013 | EUR millions TOTAL 31.12.2012 |
|------------------------|---------------------|---------------------|----------------------|---------------------|-------------------------------------|
| Performance guarantees | 4 | 63 | 49 | 116 | 304 |
| Retention guarantees | 2 | 40 | 14 | 56 | 188 |
| TOTAL | 6 | 103 | 62 | 171 | 492 |

5.1.1 Performance guarantees

Performance guarantees are sometimes requested to ensure that beneficiaries of EDF funding meet the obligations of their contracts with the EDF.

In 2013 an in-depth review of the guarantees has been performed. Following this review, guarantees with a value of EUR 188 million have been written-off as not belonging to the EDF. Had the 2012 comparatives been updated, the value would have decreased from EUR 304 million to EUR 177 million.

5.1.2 Retention guarantees

Retention guarantees concern only works contracts. Typically, 10 % of the interim payments to beneficiaries are withheld to ensure that the contractor fulfils his/her obligations. These withheld amounts are reflected as amounts payable. Subject to the approval of the contracting authority, the contractor may instead submit a retention guarantee which replaces the amounts withheld on interim payments. These received guarantees are disclosed as contingent assets.

In 2013 an in-depth review of the guarantees has been performed. Following this review, guarantees with a value of EUR 105 million have been written-off as not belonging to the EDF. Had the 2012 comparatives been updated, the value would have decreased from EUR 188 million to EUR 98 million.

5.1.3 Guarantees owned by entities other than the Commission

Guarantees owned by entities other than the Commission comprise guarantees endorsed by the National Authorising Officer (the contracting authority of the third country) in order to protect EU assets. These guarantees are kept in EU delegations and are not contingent assets of the EDF, they are disclosed only for information purposes.

| | 8th EDF | 9th EDF | 10th EDF | EUR millions TOTAL 31.12.2013 |
|--------------------------|----------|------------|------------|---|
| Pre-financing guarantees | 2 | 54 | 278 | 333 |
| Performance guarantees | 2 | 44 | 142 | 188 |
| Retention guarantees | 1 | 34 | 70 | 105 |
| TOTAL | 4 | 131 | 491 | 626 |

5.2 OTHER DISCLOSURES

5.2.1 Budgetary commitments not yet expensed

| | 8 th EDF | 9 th EDF | 10 th EDF | EUR millions TOTAL 31.12.2013 | EUR millions TOTAL 31.12.2012 |
|--|---------------------|---------------------|----------------------|---|---|
| Outstanding budgetary commitments not yet paid | 74 | 611 | 5 340 | 6 025 | 5 642 |
| Related amounts included in the economic outturn account | (28) | (215) | (540) | (782) | (714) |
| TOTAL | 47 | 396 | 4 800 | 5 243 | 4 928 |

Outstanding budgetary commitments represent open commitments for which payments and/or decommitments have not yet been made. This is a normal consequence of the existence of multiannual programmes. At 31 December 2013 the outstanding budgetary commitments totalled EUR 6 025 million. The amount disclosed as a future commitment to be funded is this outstanding budgetary commitment less related amounts that have been included as expenses in the 2013 economic outturn account, giving a total of EUR 5 243 million.

6. FINANCIAL RISK MANAGEMENT

The following disclosures with regard to the financial risk management of the EDF relate to the treasury operations carried out by the Commission on behalf of the EDF in order to implement its resources.

6.1 RISK MANAGEMENT POLICIES AND HEDGING ACTIVITIES

The rules and principles for the management of the treasury operations are laid down in the 10th EDF FR and in the Internal Agreement.

As a result of the above regulation, the following main principles apply:

- The EDF contributions are paid by Member States in special accounts opened with the bank of issue of each Member State or the financial institution designated by it. The amounts of the contributions shall remain in those special accounts until the payments of EDF need to be made.
- EDF contributions are paid by Member States in EUR, while the EDF's payments are denominated in EUR and in other currencies, including less well-known ones.
- Bank accounts opened by the Commission on behalf of the EDF may not be overdrawn.

In addition to the special accounts, other bank accounts are opened by the Commission in the name of the EDF, with financial institutions (central banks and commercial banks), for the purpose of executing payments and receiving receipts other than the Member State contributions to the budget.

Treasury and payment operations are highly automated and rely on modern information systems. Specific procedures are applied to guarantee system security and to ensure segregation of duties in line with the Financial Regulation, the Commission's internal control standards, and audit principles.

A written set of guidelines and procedures regulate the management of the treasury and payment operations with the objective of limiting operational and financial risk and ensuring an adequate level of control. They cover the different areas of operation, and compliance with the guidelines and procedures is checked regularly.

6.2 MARKET RISK

6.2.1 Currency risk

All contributions are held in EUR, and other currencies are purchased only when they are needed for the execution of payments. As a result the EDF's treasury operations are not exposed to currency risk.

6.2.2 Interest rate risk

The EDF does not borrow monies and as a consequence it is not exposed to interest rate risk.

It however earns interest on balances it holds on its different banks accounts. The Commission, on behalf of the EDF, has therefore put in place measures to ensure that interest earned regularly reflect market interest rates as well as their possible fluctuation.

Overnight balances held on commercial bank accounts are remunerated on a daily basis. The remuneration of balances on such accounts is based on variable market rates to which a contractual margin (positive or negative) is applied. For most of the accounts the interest calculation is linked to the EONIA (Euro Over Night Index Average), and is adjusted to reflect any fluctuations of this rate. For some other accounts the interest calculation is linked to the ECB rate (the one used for the ECB refinancing operations). As a result no risk is taken by the EDF that its balances be remunerated at rates lower than market rates.

6.3 CREDIT RISK (COUNTERPARTY RISK)

Most of the EDF's treasury resources are kept, in accordance with the 10th EDF FR, in the "special accounts" opened by Member States for the payment of their contributions. The majority of such accounts are held with Member States' treasuries or national central banks. These institutions carry the lowest counterparty risk for the EDF (exposure is with its Member States).

For the part of the EDF's treasury resources kept with commercial banks in order to cover the execution of payments, replenishment of these accounts is executed on a just-in-time basis and is automatically managed by the Commission treasury's cash management system. Minimum cash levels, proportional to the average amount of daily payments made from it, are kept on each

account. As a consequence the amounts kept overnight on these accounts remain constantly at low levels which ensure the EDF's risk exposure is limited.

In addition, specific guidelines are applied for the selection of commercial banks in order to further minimise counterparty risk to which the EDF is exposed.

All commercial banks are selected by call for tenders. The minimum short-term credit rating required for admission to the tendering procedures is Moody's P-1 or equivalent (S&P A-1 or Fitch F1). A lower level may be required in specific and duly justified circumstances.

6.4 LIQUIDITY RISK

Budget principles applied to the EDF ensure that overall cash resources for the budgetary period are always sufficient for the execution of all related payments. Indeed the total Member States' contributions equal the overall amount of payment appropriations for the relevant budgetary period.

Member States contributions to EDF, however, are paid in three instalments per year, while payments are subject to certain seasonality.

In order to ensure that treasury resources are always sufficient to cover the payments to be executed in any given month, information on the treasury situation is regularly exchanged between the Commission's treasury and the relevant spending departments in order to ensure that payments executed in any given period do not exceed the available treasury resources.

In addition to the above, in the context of the EDF's daily treasury operations, automated cash management tools ensure that sufficient liquidity is available on each of the EDF's bank accounts, on a daily basis.

7. RELATED PARTY DISCLOSURES

No related party transactions requiring separate disclosure under this heading have been identified.

8. EVENTS AFTER THE BALANCE SHEET DATE

At the date of transmission of these accounts, no material issues had come to the attention of the Accounting Officer of the EDF or were reported to him that would require separate disclosure under this section. The annual accounts and related notes were prepared using the most recently available information and this is reflected in the information presented above.

9. RECONCILIATION ECONOMIC OUTTURN - BUDGET OUTTURN

The economic outturn of the year is calculated on the basis of accrual accounting principles. The budget outturn is however based on cash accounting rules. As both are the result of the same underlying transactions, it is a useful control to ensure that they are reconcilable. The table below shows this reconciliation, highlighting the key reconciling amounts, split between revenue and expenditure items.

| | EUR millions | |
|--|----------------|----------------|
| | 2013 | 2012 |
| ECONOMIC OUTTURN OF THE YEAR | (3 072) | (3 023) |
| REVENUE | | |
| Entitlements not affecting the budget outturn | (68) | (47) |
| Entitlements established in the current year but not yet collected | (6) | (8) |
| Entitlements established in previous years and collected in the current year | 10 | 14 |
| Net effect of pre-financing | 71 | 62 |
| Net accrued revenue | 19 | (40) |
| EXPENDITURE | | |
| Expenses of the current year not yet paid | 90 | 38 |
| Expenses of previous years paid in the current year | (53) | (101) |
| Payment cancellations | 13 | 7 |
| Net effect of pre-financing | (431) | (316) |
| Net accrued expenses | 464 | 204 |
| BUDGET OUTTURN OF THE YEAR | (2 963) | (3 209) |

9.1 Reconciling items – Revenue

The budgetary revenue of a financial year corresponds to the revenue collected from entitlements established in the course of the year and amounts collected from entitlements established in previous years.

The **entitlements not affecting the budget outturn** are recorded in the economic outturn but from a budgetary perspective cannot be considered as revenues as the cashed amount is transferred to reserves and cannot be recommitted without a Council decision.

The **entitlements established in the current year but not yet collected** are to be deducted from the economic outturn for reconciliation purposes as they do not form part of budgetary revenue. On the contrary, the **entitlements established in previous years and collected in the current year** must be added to the economic outturn for reconciliation purposes.

The **net effect of pre-financing** is the clearing of the recovered pre-financing amounts. This is a cash receipt which has no impact on the economic outturn.

The **net accrued revenue** mainly consists of accruals made for year-end cut-off purposes. Only the net effect, i.e. the accrued revenue of the current year less the reversal of accrued revenue of the previous year, is taken into consideration.

9.2 Reconciling items – Expenditure

The **expenses of the current year not yet paid** are to be added for reconciliation purposes as they are included in the economic outturn but do not form part of budgetary expenditure. On the contrary, the **expenses of previous years paid in the current year** must be deducted from the economic outturn for reconciliation purposes as they are part of the current year's budgetary

expenditure but have either no effect on the economic outturn or they decrease the expenses in case of corrections.

The cash receipts from **payment cancellations** do not affect the economic outturn whereas they impact the budget outturn.

The **net effect of pre-financing** is the combination of the new pre-financing amounts paid in the current year (recognised as budgetary expenditure of the year) and the clearing of pre-financing paid in the current year or previous years through the acceptance of eligible costs. The latter represents an expense in accrual terms but not in the budgetary accounts since the payment of the initial pre-financing had already been considered as a budgetary expenditure at the time of its payment.

The **net accrued expenses** mainly consist of accruals made for year-end cut-off purposes, i.e. eligible expenses incurred by beneficiaries of EDF funds but not yet reported to the EDF. Only the net effect, i.e. the accrued expenses of the current year less the reversal of accrued expenses of the previous year, is taken into consideration.

2. REPORT ON FINANCIAL IMPLEMENTATION

INTRODUCTORY NOTE

Previous EDFs

- As the **6th** EDF was closed in 2006 and the **7th** EDF was closed in 2008, the annual accounts no longer contain implementation tables for these EDFs. However, implementation of the transferred balances can be found in the **9th** EDF.
- As in past years, to ensure transparency in the presentation of the accounts for 2013, the tables set out separately for the **8th** EDF the part used for Lomé Convention programming and the part used for programming under the Cotonou Agreement
- In accordance with article 1(2)(b) of the Internal Agreement of the **9th** EDF, balances of the EDFs previous to the **9th** EDF have been transferred to the **9th** EDF, and, during the life of the **9th** EDF, has been committed as **9th** funds.

10th EDF

The ACP-EC Partnership Agreement signed on 23 June 2000 in Cotonou by the Member States of the European Community and the States of Africa, the Caribbean and the Pacific (ACP States) entered into force on 1 April 2003. The Cotonou Agreement was amended twice, firstly by the agreement signed in Luxembourg on 25 June 2005, secondly by the agreement signed in Ouagadougou on 22 June 2010.

The EU Council Decision of 27 November 2001 (2001/822/EC) on the association of the overseas countries and territories (OCT) with the EU entered into force on 2 December 2001. This Decision was amended on 19 March 2007 (Decision 2007/249/EC).

The Internal Agreement on the financing of Community aid under the multiannual financial framework for the period 2008-2013 in accordance with the revised Cotonou Agreement, adopted by the Representatives of the Governments of the Member States of the European Community on 17 July 2006, entered into force on 1 July 2008.

Under the Cotonou Agreement, the second period (2008-2013) of Community aid to the ACP States and OCTs is funded by the **10th** EDF to the tune of EUR 22 682 million, of which:

- EUR 21 966 million is allocated to the ACP countries in accordance with the multiannual financial framework set out in Annex Ib to the revised Cotonou Agreement, of which EUR 20 466 million is managed by the Commission;
- EUR 286 million is allocated to the OCTs in accordance with Annex IIa of the revised Council Decision on the association of the OCTs with the European Community, of which EUR 256 million is managed by the Commission;
- EUR 430 million is for the Commission to finance the costs arising from the programming and implementation of **10th** EDF resources, in accordance with Article 6 of the Internal Agreement.

Since the date of entry into force of the **10th** EDF, the initial amount allocated to the **10th** EDF has been supplemented by decommitments from previous EDF's, interest income and unused cash balances resulting from the system to guarantee the stabilisation of export earnings from primary agricultural products (STABEX) under the Funds prior to the **9th** EDF. All funds are managed in accordance with their specific rules as foreseen in the revised Cotonou Agreement and the Internal Agreement.

31 December 2013 was an important target , the "**Sunset clause**" of the **10th** EDF. This clause sets a clear cut-off date for commitments under the **10th** EDF (articles 1(4) and (5) of the **10th** EDF Internal Agreement). During the whole year, every effort has been made in order to commit the maximum of the funds available from the **10th** EDF.

- 10th EDF non-mobilisable performance reserve

Since the 10th EDF came into force on 1 July 2008, the remaining balances and the amounts decommitted from projects under the 9th and previous EDFs are transferred to the performance reserve of the 10th EDF, with the exception of Stabex funds and 9th EDF administrative envelope.

| | (EUR million) |
|--|---------------|
| ACP 10 th EDF non-mobilisable performance reserve at 31/12/2013 | 924.1 |
| OCT 10 th EDF non-mobilisable performance reserve at 31/12/2013 | 14.1 |
| Total 10 th EDF non-mobilisable performance reserve at 31/12/2013 | 938.2 |

In accordance with article 1(4) of the 10th EDF Internal Agreement, the Council has, on 12 December 2013, decided to use these funds for the Bridging Facility.

- 10th EDF uncommitted funds

On 31/12/2013, the total amount of uncommitted funds resulted as:

| | (EUR million) |
|--|---------------|
| ACP (Bilateral, Regional Intra-ACP, Reserve NIP/RIP) | 74.5 |
| OCT | 0.08 |
| Total 10 th EDF uncommitted funds at 31.12.2013 | 74.6 |

These funds have also been transferred to the Bridging Facility.

- Bridging Facility

The Internal Agreement establishing the 11th EDF was signed by the Member States, meeting within the Council, in June 2013. This Internal Agreement will only enter into force after ratification by all Member States.

Pending the entry into force of the 11th EDF, the Commission has proposed transitional measures, the "Bridging Facility", to ensure the availability of funds for cooperation with ACP countries and with OCT, as well as for support expenditure, between January 2014 and the entry into force of the Internal Agreement establishing the 11th EDF.

This Bridging Facility has been adopted on 12 December 2013 (Decision 2013/759/EU), and is financed from the following sources:

- funds decommitted from 8th and 9th EDF up to 31.12.2013,
- uncommitted balances from the 10th EDF at 31.12.2013,
- funds decommitted from the 10th and previous EDFs as from 01.01.2014.

At 31.12.2013, the total funds available for the bridging facility amount to EUR 998.6 milion for ACP, and EUR 14.2 milion for OCT, not taking interests into accounts. These funds are accounted for the 11th EDF.

- 10th EDF Stabex reserve

Following the closure of Stabex accounts, unused/decommitted funds are transferred to the 10th EDF Stabex A Envelope reserve (10th EDF Internal Agreement Art. 1(4)) and then to the national indicative programmes of the countries concerned. As of 31 December 2013, the total amount of de-committed Stabex funds, transferred to the 10th EDF for 33 countries reached EUR 165.3 million.

- 10th EDF Co-financings

Under the 10th EDF, transfer agreements for co-financings from Member States were signed, and commitment appropriations were opened for a total amount of EUR 134.4 million, while payment appropriations were opened for the cashed amounts totalling EUR 110.6 million.

The situation of co-financing appropriations at 31.12.2013 is shown in the table below (EUR million):

| | Commitments appropriations | Payment appropriations |
|--|----------------------------|------------------------|
| Co-financing - A Envelope | 118.1 | 95.3 |
| Co-financing - Intra ACP | 12.1 | 12.1 |
| Co-financing – Administrative expenses | 4.2 | 3.2 |
| | 134.4 | 110.6 |

The following tables, concerning the amounts decided, contracted and paid, show net figures. The tables presenting the situation by country and by instrument are annexed.

| | | 599 507 | 466 561 |

The accompanying notes form an integral part of these financial statements.

3.5 NOTES TO THE FINANCIAL STATEMENTS AS AT 31 DECEMBER 2013

1 General information

The Investment Facility ("the Facility" or "IF") has been established within the framework of the Cotonou Agreement (the "Agreement") on co-operation and development assistance negotiated between the African, Caribbean and Pacific Group of States (the "ACP States") and the European Union and its Member States on 23 June 2000, revised on 25 June 2005 and 23 June 2010.

The Facility is not a separate legal entity and the European Investment Bank ("EIB" or "the Bank") manages the contributions on behalf of the Member States ("Donors") in accordance with the terms of the Agreement and acts as an administrator of the Facility.

Financing under the Agreement is provided from EU Member States' budgets and is disbursed according to financial protocols defined for successive five- to six-year periods. Within the framework of the Agreement and following the entry into force of a second financial protocol on 1 July 2008 (covering the period 2008-2013), referred to as the 10th European Development Fund ("EDF"), the EIB is entrusted with the management of:

- the Facility, a EUR 3 185.5 million risk-bearing revolving fund geared to fostering private sector investment in ACP countries of which EUR 48.5 million are allocated to Overseas Countries and territories ("OCT countries");
- grants for the financing of interest rate subsidies worth EUR 400 million for ACP countries and EUR 1.5 million for OCT countries. Up to 15% (10 % up the end of 2012) of these subsidies can be used to fund project-related technical assistance.

The present financial statements cover the period from 1 January 2013 to 31 December 2013.

On a proposal from the Management Committee of EIB, the Board of Directors of EIB adopted the Financial Statements on 13 March 2014, and authorised their submission to the Board of Governors for approval by 29 April 2014.

2 Significant accounting policies

2.1 Basis of preparation – Statement of compliance

The Facility's financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union.

2.2 Significant accounting judgments and estimates

The preparation of financial statements requires the use of accounting estimates. It also requires the European Investment Bank's Management to exercise its judgment in the process of applying the Investment Facility's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed hereafter.

The most significant use of judgments and estimates are as follows:

▪ Measurement of fair values of financial instruments

Fair values of financial assets and financial liabilities that are traded in active markets are based on quoted market prices or broker price quotations. Where the fair values cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The input to these models is taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The valuations are categorised into different levels in the fair value hierarchy based on the inputs used in the valuation techniques as described and disclosed in Notes 2.4.3 and 4.

These valuation techniques may include net present value and discounted cash flow models, comparison to similar instruments for which market observable prices exist, Black-Scholes and polynomial option pricing models and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations.

The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

The Facility uses widely recognised valuation models for determining the fair value of common and more simple financial instruments, like interest rate and currency swaps that use only observable market data and require limited management judgement and estimation. Observable prices and model inputs are usually available in the market for listed debt and equity securities, exchange traded derivatives and simple over the counter derivatives like interest rate swaps. Availability of observable market prices and model inputs reduces the need for management judgement and estimation and also reduces the uncertainty associated with determination of fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

For more complex instruments, the Facility uses own valuation models, which are developed from recognised valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Example of instruments involving significant unobservable inputs includes certain loans and guarantees for which there is no active market. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of probability or counterparty default and prepayments and selection of appropriate discount rates.

The Facility has an established control framework with respect to the measurement of fair values. This framework includes the EIB's Investment Bank's Risk Management and Market Data Management functions. These functions are independent of front office management and are responsible for verifying significant fair value measurements. Specific controls include:

- Verification of observable pricing;
- A review and approval process for new valuation models and changes to existing models;
- Calibration and back testing of models against observed market transactions;
- Analysis and investigation of significant valuation movements;
- Review of significant unobservable inputs and valuation adjustments.

Where third-party information such as broker quotes or pricing services are used to measure fair value, the Facility verifies that such valuations meet the requirements of IFRS. This includes the following:

- Determining where broker quote or pricing service pricing is appropriate;
- Assessing whether a particular broker quote or pricing service is reliable;
- Understanding how the fair value has been arrived at and the extent to which it represents actual market transactions;
- When prices for similar instruments are used to measure fair value, how these prices have been adjusted to reflect the characteristics of the instrument subject to measurement.

▪ **Impairment losses on loans and receivables**

The Facility reviews its loans and receivables at each reporting date to assess whether an allowance for impairment should be recorded in the statement of profit or loss and other comprehensive income. In particular, judgment by the European Investment Bank's Management is required in the estimation of the amount and timing of future cash flows when determining the level of allowance required. Such estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the allowance. In addition to specific allowances against individually significant loans and receivables, the Facility may also book a collective impairment allowance against exposures which have not been individually identified as impaired and have a greater risk of default than when originally granted.

In principle, a loan is considered as impaired when payment of interest and principal are past due by 90 days or more and, at the same time, the European Investment Bank's Management considers that there is an objective indication of impairment.

▪ **Valuation of unquoted available-for-sale equity investments**

Valuation of unquoted available-for-sale equity investments is normally based on one of the following:

- recent arm's length market transactions;

- current fair value of another instrument that is substantially the same;
- the expected cash flows discounted at current rates applicable for items with similar terms and risk characteristics;
- adjusted net assets method; or
- other valuation models.

The determination of the cash flows and discount factors for unquoted available-for-sale equity investments requires significant estimation. The Facility calibrates the valuation techniques periodically and tests them for validity using either price from observable current market transactions in the same instrument or from other available observable market data.

▪ **Impairment of available-for-sale financial assets**

The Facility treats available-for-sale equity investments as impaired when there has been a significant or prolonged decline in the fair value below its cost or where other objective evidence of impairment exists. The determination of what is “significant” or “prolonged” requires judgment. The Facility treats “significant” generally as 30% or more and “prolonged” greater than 12 months. In addition, the Facility evaluates other factors, including normal volatility in share price for quoted equities and the future cash flows and the discount factors for unquoted equities.

2.3 Changes in accounting policies

Except for the changes below, the Facility has consistently applied the accounting policies set out in Note 2.4 to all periods presented in these financial statements. The Facility has adopted the following new standards and amendments to standards.

Standard adopted

The following standards, amendments to standards and interpretations were adopted in the preparation of these financial statements:

*Amendments to IAS 1 *Presentation of items of Other comprehensive income (OCI)**

As a result of the amendments to IAS 1, the Facility has modified the presentation of items of OCI in its statement of profit or loss and OCI, to present separately items that would be reclassified to profit or loss from those that would never be. Comparative information has been re-presented accordingly.

IFRS 13 Fair value measurement

This standard establishes a single framework for measuring fair value and making disclosures about fair value measurements when such measurements are required or permitted by other IFRSs. It unifies the definition of fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It replaces and expands the disclosure requirements about fair value measurements in other IFRSs, including IFRS 7. As a result, the Facility has included additional disclosures in this regard. In accordance with the transitional provisions of IFRS 13, the Facility has applied the new fair value measurement guidance prospectively and has not provided any comparative information for new disclosures.

IFRS 13 refers to a number of valuation adjustments which the Facility has considered in the valuations of its derivatives, namely:

- credit value adjustments (CVA), reflecting the counterparties credit risk embedded in the fair value of derivatives;
- debit value adjustments (DVA), reflecting the Facility's own credit embedded in the fair value of derivatives.

CVA per counterparty is calculated on the potential future exposure (PFE) and expected positive exposure (EPE) measures, per net counterparty exposure. The probabilities of default per counterparty are then modelled using market-available CDS spreads. For counterparties without available CDS spreads, spreads of banks of similar size and rating in similar jurisdictions are used.

The adoption of this standard resulted in the recognition of a loss of EUR 184k in the current period statement of profit or loss and other comprehensive income, as described in Note 4.

Standards issued but not yet effective

The following standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2013, and have not been applied in preparing these Financial Statements. Those of which may be relevant for the Facility are set out below. The Facility does not plan to adopt these standards early.

IFRS 9 *Financial instruments*

The first step in a three part project by the IASB to replace IAS 39 *Financial instruments*, this standard redefines the categories of financial assets and liabilities and their accounting treatment. The standard remains a 'work in progress' and it will eventually replace IAS 39 in its entirety. The current effective date of the standard is no earlier than 1 January 2017. IFRS 9 has not yet been endorsed by the European Union. The Facility does not plan to adopt this standard early and the extent of the impact has not yet been determined.

The following three standards were issued in 2012 and have been endorsed by the European Union being effective for annual periods beginning after 1 January 2014. The impact of the adoption of these standards on the Facility's financial statements has not yet been determined.

IFRS 10 *Consolidated financial statements*

This standard establishes the principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities.

IFRS 11 *Joint arrangements*

This standard sets up a framework for determining the type of joint arrangements that an entity has with another entity.

IFRS 12 *Disclosure of interests in other entities*

The objective of this standard is to require the disclosure of information that enables users of financial statements to evaluate the nature of, and risks associated with, its interests in other entities and the effects of those interests on its financial position, financial performance and cash flows.

2.4 Summary of significant accounting policies

The statement of financial position represents assets and liabilities in decreasing order of liquidity and does not distinguish between current and non-current items.

2.4.1 Foreign currency translation

The Facility uses the Euro (EUR) for presenting its financial statements, which is also the functional currency. Except as otherwise indicated, financial information presented in EUR has been rounded to the nearest thousand.

Foreign currency transactions are translated, at the exchange rate prevailing on the date of the transaction.

Monetary assets and liabilities denominated in currencies other than Euro are translated into Euro at the exchange rate prevailing at the balance sheet date. The gain or loss arising from such translation is recorded in the statement of profit or loss and other comprehensive income.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of transactions at rates different from those at the date of the transaction, and unrealised foreign exchange differences on unsettled foreign currency monetary assets and liabilities, are recognised in the statement of profit or loss and other comprehensive income.

The elements of the statement of profit or loss and other comprehensive income are translated into Euro on the basis of the exchange rates prevailing at the end of each month.

2.4.2 Cash and cash equivalents

The Facility defines cash and cash equivalents as current accounts, short-term deposits or commercial papers with original maturities of three months or less.

2.4.3 Financial assets other than derivatives

Financial assets are accounted for using the settlement date basis.

- **Fair value of financial instruments**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the Facility has access at that date.

When applicable, the EIB on behalf of the Facility measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an on-going basis.

Where the fair values of financial assets and financial liabilities recorded on the balance sheet cannot be derived from active markets, they are determined using a variety of valuation techniques that include the use of mathematical models. The input to these models is taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. The chosen valuation technique incorporates all the factors that market participants would take into account in pricing a transaction.

The EIB measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: inputs that are unadjusted quoted market prices in active markets for identical instruments to which the Facility has access.
- Level 2: inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments, quoted prices for identical or similar instruments in markets that are considered less than active or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3: inputs that are not observable. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The Facility recognises transfers between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred.

- **Held-to-maturity financial assets**

Held-to-maturity financial assets comprise quoted bonds with the intention of holding them to maturity.

Those bonds are initially recorded at their fair value plus any directly attributable transaction cost. The difference between entry price and redemption value is amortised in accordance with the effective interest method over the remaining life of the bond.

The Facility assesses at each balance sheet date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred "loss event") and that loss event (or event) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Impairment loss is recognised in profit and loss and the amount of the loss is measured as the difference between the carrying value and the present value of estimated future cash flows discounted at the instrument's original effective interest rate.

- **Loans**

Loans originated by the Facility are recognised in the assets of the Facility when cash is advanced to borrowers. They are initially recorded at cost (net disbursed amounts), which is the fair value of the cash given to originate the loan, including any transaction costs, and are subsequently measured at amortised cost, using the effective yield method, less any provision for impairment or uncollectability.

- **Available-for-sale financial assets**

Available-for-sale financial assets are those which are designated as such or do not qualify to be classified as designated at fair value through profit or loss, held-to-maturity or loans and receivables. They include direct equity investments and investments in venture capital funds.

After initial measurement, available-for-sale financial assets are subsequently carried at fair value. Note the following details for the fair value measurement of equity investments, which cannot be derived from active markets:

- a. Venture capital funds

The fair value of each venture capital fund is based on the latest available Net Asset Value (NAV), reported by the fund, if calculated based on international valuation guidelines recognised to be in line with IFRS (for example: the International Private Equity and Venture Capital Valuation guidelines, IPEV Guidelines, as published by the European Venture Capital Association). The Facility may however decide to adjust the NAV reported by the fund if there are issues that may affect the valuation.

- b. Direct equity investments

The fair value of the investment is based on the latest set of financial statements available, re-using, if applicable, the same model as the one used at the acquisition of the participation.

Unrealised gains or losses on venture capital funds and direct equity investments are reported in contributors' resources until such investments are sold, collected or disposed of, or until such investments are determined to be impaired. If an available-for-sale investment is determined to be impaired, the cumulative unrealised gain or loss previously recognised in equity is transferred to the statement of profit or loss and other comprehensive income.

For unquoted investment, the fair value is determined by applying recognised valuation techniques (for example adjusted net assets, discounted cash flows or multiple). These investments are accounted for at cost when the fair value cannot be reliably measured. To be noted that in the first 2 years of the investments, they are recognised at cost.

The participations acquired by the Facility typically represent investments in private equity or venture capital funds. According to industry practice, such investments are generally investments jointly subscribed by a number of investors, none of whom is in a position to individually influence the daily operations and the investment activity of such fund. As a consequence, any membership by an investor in a governing body of such fund does not in principle entitle such investor to influence the day-to-day operations of the fund. In addition, individual investors in a private equity or a venture capital fund do not determine policies of a fund such as distribution policies on dividends or other distributions. Such decisions are typically taken by the management of a fund on the basis of the shareholders agreement governing the rights and obligations of the management and all shareholders of the fund. The shareholders' agreement also generally prevents individual investors from bilaterally executing material transactions with the fund, interchanging managerial personnel or obtaining privileged access to essential technical information. The Facility's investments are executed in line with the above stated industry practice, ensuring that the Facility neither controls nor exercises any form of significant influence within the meaning of IAS 27 and IAS 28 over any of these investments, including those investments in which the Facility holds over 20 % of the voting rights.

- **Guarantees**

At initial recognition, the financial guarantees are recognised at fair value corresponding to the Net Present Value (NPV) of expected premium inflows. This calculation is performed at the starting date of each transaction and is recognised on balance sheet as "Financial guarantees" under "other assets" and "other liabilities".

Subsequent to initial recognition, the Facility's liabilities under such guarantees are measured at the higher of:

- the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee, which is estimated based on all relevant factors and information existing at the date of the statement of financial position.

- the amount initially recognised less cumulative amortisation. The amortisation of the amount initially recognised is done using the actuarial method.

Any increase or decrease in the liability relating to financial guarantees is taken to the statement of profit or loss and other comprehensive income under “fee and commission income”.

The Facility's assets under such guarantee are subsequently amortized using the actuarial method and tested for impairment.

In addition, when a guarantee agreement is signed, it is presented as a contingent liability for the Facility and when the guarantee is engaged, as a commitment for the Facility.

2.4.4 Impairment of financial assets

The Facility assesses at each balance sheet date whether there is any objective evidence that a financial asset is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred “loss event”) and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter into bankruptcy or other financial reorganisation and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

For the loans outstanding at the end of the financial year and carried at amortised cost, impairments are made when presenting objective evidence of risks of non-recovery of all or part of their amounts according to the original contractual terms or the equivalent value. If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets carrying amount and the present value of estimated future cash flows. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the statement of profit or loss and other comprehensive income. Interest income continues to be accrued on the reduced carrying amount based on the effective interest rate of the asset. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account.

The Facility conducts the credit risk assessments based on each individual operation and does not consider a collective impairment.

For the available-for-sale financial assets, the Facility assesses at each balance sheet date whether there is objective evidence that an investment is impaired. Objective evidence would include a significant or prolonged decline in the fair value of the investment below its costs. Where there is evidence of impairment, the cumulative loss (measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognised in the statement of profit or loss and other comprehensive income) is removed from contributors' resources and recognised in the statement of profit or loss and other comprehensive income. Impairment losses on available-for-sale financial assets are not reversed through the statement of profit or loss and other comprehensive income; increases in their fair value after impairment are recognised directly in contributors' resources.

The European Investment Bank's Risk Management reviews financial assets for impairment at least once a year. Resulting adjustments include the unwinding of the discount in the statement of profit or loss and other comprehensive income over the life of the asset, and any adjustments required in respect of a reassessment of the initial impairment.

2.4.5 Derivative financial instruments

Derivatives include cross currency swaps, cross currency interest rate swaps, short term currency swaps and interest rate swaps.

In the normal course of its activity, the Facility may enter into swap contracts with a view to hedge specific lending operations or into currency forward contract with a view to hedge its currency positions, denominated in actively traded currencies other than the Euro, in order to offset any gain or loss caused by foreign exchange rate fluctuations.

The Facility does not use any of the hedge possibilities under IAS 39. All derivatives are measured at fair value through the profit or loss and are reported as derivative financial instruments. Fair values are derived primarily from discounted cash-flow models, option-pricing models and from third party quotes.

Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. Changes in the fair value of derivative financial instruments are shown in the income statement under "Fair value change of derivative financial instruments".

Derivatives are initially recognised using the trade date basis.

2.4.6 Contributions

Contributions from Member States are recognised as receivables in the statement of financial position on the date of the Council Decision fixing the financial contribution to be paid by the Member States to the Facility.

The Member States contributions meet the following conditions and are consequently classified as equity:

- as defined in the contribution agreement, they entitle the Member States to decide on the utilisation of the Facility's net assets in the events of the Facility's liquidation;
- they are in the class of instruments that is subordinate to all other classes of instruments;
- all financial instruments in the class of instruments that is subordinate to all other classes of instruments have identical features;
- the instrument does not include any features that would require classification as a liability; and
- the total expected cash flows attributable to the instrument over its life are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the Facility over the life of the instrument.

2.4.7 Interest income on loans

Interest on loans originated by the Facility is recorded in the statement of profit or loss and other comprehensive income ('Interest and similar income') and on the statement of financial position ('Loans and receivables') on an accrual basis using the effective interest rate, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the loan to the net carrying amount of the loan. Once the recorded value of a loan has been reduced due to impairment, interest income continues to be recognised using the original effective interest rate applied to the new carrying amount.

2.4.8 Interest subsidies and technical assistance

As part of its activity, the Facility manages interest subsidies and technical assistance ("TA") on behalf of the Member States.

The part of the Member States contributions allocated to the payment of interest subsidies and TA is not accounted for in the Facility's contributors' resources but is classified as amounts owed to third parties. The Facility operates the disbursement to the final beneficiaries and then decreases the amounts owed to third parties.

When amounts contributed with regard to interest subsidies and TA are not fully granted, they are reclassified as contribution to the Facility.

2.4.9 Interest income on cash and cash equivalents

Interest income on cash and cash equivalents is recognised in the statement of profit or loss and other comprehensive income of the Facility on an accrual basis.

2.4.10 Fees, commissions and dividends

Fees received in respect of services provided over a period of time are recognised as income as the services are provided. Commitment fees are deferred and recognised in income using the effective interest method over the period from disbursement to repayment of the related loan.

Dividends relating to available-for-sale financial assets are recognised when received.

2.4.11 Taxation

The Protocol on the Privileges and Immunities of the European Communities, appended to the treaty on the European Union and the treaty of the functioning of the European Union, stipulates that the assets, revenues and other property of the Institutions of the Union are exempt from all direct taxes.

3 Risk Management

This note presents information about the Facility's exposure to and its management and control of credit and financial risks, in particular the primary risks associated with its use of financial instruments. These are:

- credit risk – the risk of loss resulting from client or counterparty default and arising on credit exposure in all forms, including settlement risk;
- liquidity risk – the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset;
- market risk – exposure to observable market variables such as interest rates, foreign exchange rates and equity market prices.

3.1 Risk management organisation

The European Investment Bank adapts its risk management on an ongoing basis.

The Risk Management of EIB independently identifies, assesses, monitors and reports the credit and equity price risks to which the Facility is exposed. Within a framework whereby the segregation of duties is preserved, the Risk Management is independent of the Front Offices. The Director General of Risk Management reports for risk matters, to the designated Vice-President of the European Investment Bank. The designated Vice-President meets regularly with the Audit Committee to discuss topics relating to risks. He is also responsible for overseeing risk reporting to the European Investment Bank's Management Committee and the Board of Directors.

3.2 Credit risk

Credit risk is the potential loss that could result from client or counterparty default and arising on credit exposure in all forms, including settlement.

3.2.1. Credit risk policy

In carrying out the credit analysis on loan counterparts, EIB assesses credit risk with a view to quantify and pricing it. The Facility has developed an Internal Rating Methodology (IRM) for corporates or financial institutions to determine the Internal Ratings of its main borrower/guarantor beneficiary counterparts. The methodology is based on a system of scoring sheets tailored for each major credit counterpart type (e.g. Corporates, Banks, Public Sector Entities, etc). Taking into consideration both, best banking practice and the principles set under the Basel International Capital Accord (Basel II), all counterparts that are material to the credit profile of a specific transaction are classified into internal rating categories using the IRM for the specific counterpart type. Each counterpart is initially assigned to an Internal Rating reflecting the counterpart's long-term foreign currency rating (or local currency equivalent when required) following an in-depth analysis of the counterpart's risk profile and its country risk operating context.

The credit assessment of project finance and other structured limited recourse operations is not subject to IRM and is using credit risk tools relevant for the sector, focused mainly on cash flow availability and debt service capacity. These tools include the analysis of projects' contractual framework, counterpart's analysis and cash flow simulations. Similarly to corporates and financial institutions, each project is assigned to an internal risk rating and an expected loss.

All non-sovereign (or non sovereign guaranteed/assimilated) operations are subject to specific transaction-level and counterpart size limits. The maximum nominal amount of each transaction is capped by a limit which depends on the transaction expected loss. Counterpart limits are applied to consolidated exposures. Such limits typically reflect the size of counterparts own funds as well as their total external long-term funding.

In order to mitigate credit risk the Facility uses various credit enhancements which are:

- project related securities (e.g., pledge over the shares; pledge over the assets; assignment of rights; pledge over the accounts); or/and
- guarantees, generally provided by the sponsor of the financed project (e.g., completion guarantees, first demand guarantees).

In addition, the Facility uses seldom credit enhancements which are not immediately correlated to the project risk, like collaterals or bank guarantees.

The Facility does not use any credit derivatives to mitigate credit risk.

3.2.2. Maximum exposure to credit risk without taking into account any collateral and other credit enhancements

The following table shows the maximum exposure to credit risk for the components of the statement of financial position, including derivatives. The maximum exposure is shown gross, before the effect of mitigation through the use of collateral.

| Maximum exposure (in EUR'000) | 31.12.2013 | 31.12.2012 |
|--------------------------------------|-------------------|-------------------|
| ASSETS | | |
| Cash and cash equivalents | 599 515 | 466 568 |
| Derivative financial instruments | 1 024 | 115 |
| Loans and receivables | 1 222 199 | 1 146 280 |
| Amounts receivable from contributors | - | 87 310 |
| Held-to-maturity financial assets | 102 562 | 99 029 |
| Other assets | 148 | 224 |
| Total Assets | 1 925 448 | 1 799 526 |
| OFF BALANCE SHEET | | |
| Contingent liabilities | | |
| - Guarantees undrawn | 25 000 | 20 000 |
| Commitments | | |
| - Undisbursed loans | 889 866 | 749 044 |
| - Guarantees drawn | 4 414 | 6 224 |
| Total Off balance sheet | 919 280 | 775 268 |
| Total credit exposure | 2 844 728 | 2 574 794 |

3.2.3. Credit risk on loans and receivables

3.2.3.1 Credit risk measurement for loans and receivables

Each and every lending transaction undertaken by the Facility benefits from a comprehensive risk assessment and quantification of expected loss estimates that are reflected in a Loan Grading ("LG"). LGs are established according to generally accepted criteria, based on the quality of the borrower, the maturity of the loan, the guaranteee and, where appropriate, the guarantor.

The loan grading (LG) system comprises the methodologies, processes, databases and IT systems supporting the assessment of credit risk in lending operations and the quantification of expected loss estimates. It summarises a large amount of information with the purpose of offering a relative ranking of loans' credit risks. LGs reflect the present value of the estimated level of the "expected loss", this being the product of the probability of default of the main obligors, the exposure at risk and the loss severity in the case of default. LGs are used for the following purposes:

- as an aid to a finer and more quantitative assessment of lending risks;
- as help in distributing monitoring efforts;
- as a description of the loan's portfolio quality at any given date;
- as one input in risk-pricing decisions based on the expected loss.

The following factors enter into the determination of an LG:

- i) The borrower's creditworthiness: RM independently reviews borrowers and assesses their creditworthiness based on internal methodologies and external data. In line with the Basel II Advanced Approach chosen, the Bank has developed an internal rating methodology (IRM) to determine the internal ratings of borrowers and guarantors. This is based on a set of scoring sheets specific to defined counterparty types.
- ii) The default correlation: it quantifies the chances of simultaneous financial difficulties arising for both the borrower and the guarantor. The higher the correlation between the borrower and the guarantor's default probabilities, the lower the value of the guarantee and therefore the lower the LG.
- iii) The value of guarantee instruments and of securities: this value is assessed on the basis of the combination of the issuer's creditworthiness and the type of instrument used.
- iv) The contractual framework: a sound contractual framework will add to the loan's quality and enhance its internal grading.
- v) The loan's duration: all else being equal, the longer the loan, the higher the risk of incurring difficulties in the servicing of the loan.

A loan's expected loss is computed by combining the five elements discussed above. Depending on the level of this loss, a loan is assigned to one of the following LG classes listed below:

- A Prime quality loans: there are three sub-categories. A comprises all EU sovereign risks, i.e. loans granted to or fully, explicitly and unconditionally guaranteed by Member States, where no repayment difficulties are expected and for which an unexpected loss of 0% is allocated. A+ denotes loans granted to (or guaranteed by) entities other than Member States, with no expectation of deterioration over their duration. A- includes those lending operations where there is some doubt about the maintenance of their current status (for instance because of a long maturity, or for the high volatility of the future price of an otherwise excellent collateral), but where any downside is expected to be quite limited.
- B High quality loans: these represent an asset class with which the bank feels comfortable, although a minor deterioration is not ruled out in the future. B+ and B- are used to denote the relative likelihood of the possibility of such deterioration occurring.
- C Good quality loans: an example could be unsecured loans to solid banks and corporates with a 7-year bullet, or equivalent amortising, maturity at disbursement.
- D This rating class represents the borderline between "acceptable quality" loans and those that have experienced some difficulties. This watershed in loan grading is more precisely determined by the sub-classifications D+ and D-. Loans rated D- require heightened monitoring.
- E This LG category includes loans with a risk profile greater than generally accepted. It also includes loans which in the course of their lives have experienced severe problems and their sliding into a situation of loss cannot be excluded. For this reason, the loans are subject to close and high monitoring. The sub-classes E+ and E- differentiate the intensity of this special monitoring process, with those operations graded E- being in a position where there is a strong possibility that debt service cannot be maintained on a timely basis and therefore some form of debt restructuring is required, possibly leading to an impairment loss.
- F (fail) denotes loans representing unacceptable risks. F- graded loans can only arise out of outstanding transactions that have experienced, after signature, unforeseen, exceptional and dramatic adverse circumstances. All operations where there is a loss of principal to the Facility are graded F and a specific provision is applied.

Generally, loans internally graded D- or below are placed on the Watch List. However, if a loan was originally approved with a risk profile of D- or weaker, it will only be placed on the Watch List as a result of a material credit event causing a further deterioration of its LG classification.

The table in section 3.2.3.3 shows the credit quality analysis of the Facility's loan portfolio based on the various LG classes as described above.

3.2.3.2 Analysis of lending credit risk exposure

The following table shows the maximum exposure to credit risk on loans signed and disbursed by nature of borrower taking into account guarantees provided by guarantors:

| At 31.12.2013 In EUR'000 | Guaranteed | Other credit enhancements | Not guaranteed | Total | % of Total |
|-----------------------------|---------------|------------------------------|----------------|------------------|-------------|
| Banks | 18 341 | 112 178 | 338 464 | 468 983 | 38% |
| Corporates | 26 315 | 94 365 | 417 990 | 538 670 | 44% |
| Public institutions | 29 120 | - | 31 | 29 151 | 2% |
| States | - | 5 322 | 180 073 | 185 395 | 16% |
| Total disbursed | 73 776 | 211 865 | 936 558 | 1 222 199 | 100% |
| Signed not disbursed | 14 966 | 117 758 | 757 142 | 889 866 | |

| At 31.12.2012 In EUR'000 | Guaranteed | Other credit enhancements | Not guaranteed | Total | % of Total |
|-----------------------------|---------------|------------------------------|----------------|------------------|-------------|
| Banks | 12 630 | 136 695 | 207 582 | 356 907 | 31% |
| Corporates | 20 077 | 78 171 | 478 358 | 576 606 | 50% |
| Public institutions | 30 462 | - | 18 | 30 480 | 3% |
| States | - | 5 819 | 176 468 | 182 287 | 16% |
| Total disbursed | 63 169 | 220 685 | 862 426 | 1 146 280 | 100% |
| Signed not disbursed | 14 091 | 142 963 | 591 990 | 749 044 | |

The Facility's loans events affecting its borrowers and guarantors are continually monitored by Ops B, the EIB's operational directorate for operations outside the EU. In particular, contractual rights are assessed on a case by case basis in case of a rating deterioration and/or contractual default. Mitigation measures are pursued, whenever necessary in accordance with the credit risk guidelines. Also, in case of renewals of bank guarantees received for its loans, it is ensured that these are replaced or action is taken in a timely manner.

As an immediate response to the developments in the financial markets that have taken place since September 2008, the Facility has acted to reinforce its arrangements for the monitoring and management of risks. To this end, in April 2011, Ops B has created a monitoring division reporting directly to the Director General, tasked with the responsibility of performing loan financial and contractual monitoring. Its purpose is to promote the exchange of information among departments and to suggest reporting and operational management procedures for use at times of financial crisis with the objective of rapid reaction if required.

3.2.3.3 Credit quality analysis per type of borrower

The tables below show the credit quality analysis of the Facility's loan portfolio as at 31 December 2013 and 31 December 2012 by the Loan Grading applications, based on the exposure signed (disbursed and undisbursed):

| At 31.12.2013 In EUR'000 | | Min. | | | | Total | % of Total | |
|-----------------------------|---------------------|---------------|-------------------|-----------------|------------------|----------------|------------------|-------------|
| | | High Grade | Standard Grade | Accept. Risk | No grading | | | |
| | | A to B- | C | D+ | D- and below | | | |
| Borrower | Banks | 65 571 | 15 434 | 97 478 | 689 905 | 404 129 | 1 272 517 | 60% |
| | Corporates | 6 773 | 15 970 | 5 691 | 520 048 | - | 548 482 | 26% |
| | Public institutions | - | - | - | 69 151 | - | 69 151 | 3% |
| | States | - | - | - | 221 915 | - | 221 915 | 11% |
| Total | | 72 344 | 31 404 | 103 169 | 1 501 019 | 404 129 | 2 112 065 | 100% |

| At 31.12.2012 In EUR'000 | | Min. | | | | Total | % of Total | |
|-----------------------------|---------------------|---------------|-------------------|-----------------|------------------|----------------|------------------|-------------|
| | | High Grade | Standard Grade | Accept. Risk | No grading | | | |

| | States | - | - | - | 241 155 | - | 241 155 | 12% |
| Total | | 57 466 | 32 348 | 21 864 | 1 446 632 | 337 014 | 1 895 324 | 100% |

3.2.3.4 Risk concentrations of loans and receivables

3.2.3.4.1 Geographical analysis

Based on the country of borrower, the Facility's loan portfolio can be analysed by the following geographical regions (in EUR'000):

| Country of borrower | 31.12.2013 | 31.12.2012 |
|-----------------------------|-------------------|-------------------|
| Uganda | 144 816 | 140 833 |
| Kenya | 131 384 | 131 566 |
| Mauritius | 108 511 | 119 228 |
| Regional-ACP | 101 863 | 95 636 |
| Mauritania | 93 455 | 73 602 |
| Ethiopia | 75 962 | 81 666 |
| Nigeria | 73 469 | 14 383 |
| Cameroon | 70 154 | 72 525 |
| Jamaica | 68 000 | 71 027 |
| Dominican Republic | 64 015 | 67 991 |
| Togo | 50 319 | 52 644 |
| Congo (Democratic Republic) | 39 047 | 28 415 |
| Cape Verde | 27 470 | 27 073 |
| Mozambique | 26 202 | 28 298 |
| Tanzania | 26 121 | - |
| French Polynesia | 13 994 | 2 631 |
| Senegal | 13 063 | 13 762 |
| Burkina Faso | 8 944 | 10 727 |
| Samoa | 8 872 | 8 759 |
| Congo | 8 649 | 10 431 |
| Mali | 7 717 | 7 931 |
| Rwanda | 6 439 | 9 641 |
| Zambia | 6 412 | 18 772 |
| Angola | 6 380 | 10 009 |
| Ghana | 6 365 | 5 642 |
| Haiti | 5 511 | 4 654 |
| Vanuatu | 5 028 | 6 263 |
| Malawi | 3 999 | 4 950 |
| New Caledonia | 3 708 | 4 198 |
| Lesotho | 3 417 | 3 827 |
| Niger | 3 020 | 4 146 |
| Grenada | 2 243 | 2 477 |
| Palau | 2 224 | 2 566 |
| Saint Lucia | 2 102 | 2 916 |
| Tonga | 1 416 | 2 199 |
| Fiji | 1 032 | 1 619 |
| Gabon | 512 | 1 011 |
| Liberia | 364 | 4 |
| Belize | - | 13 |
| Djibouti | - | 762 |
| Trinidad and Tobago | - | 1 483 |
| Total | 1 222 199 | 1 146 280 |

3.2.3.4.2 Industry sector analysis

The table below analyses the Facility's loan portfolio by industry sector of the borrower. Operations which are first disbursed to a financial intermediary before being disbursed to the final beneficiary are reported under global loans (in EUR'000):

| Industry sector of borrower | 31.12.2013 | 31.12.2012 |
|---|-------------------|-------------------|
| Global loans and agency agreements | 337 482 | 251 797 |
| Electricity, coal and others | 234 106 | 255 031 |
| Urban development, renovation and transport | 216 244 | 215 642 |
| Basic material and mining | 176 909 | 185 200 |
| Tertiary and other | 148 875 | 116 414 |
| Roads and motorways | 38 880 | 40 565 |
| Airports and air traffic management systems | 29 116 | 30 462 |
| Materials processing, construction | 20 884 | 24 154 |
| Telecommunications | 11 746 | 18 428 |
| Paper chain | 4 540 | 4 747 |
| Investment goods/consumer durables | 3 417 | 3 827 |
| Airlines and aircraft manufacture | - | 13 |
| Total | 1 222 199 | 1 146 280 |

3.2.3.5 Arrears on loans

Amounts in arrears are identified, monitored and reported according to the procedures defined into the bank wide “Finance Monitoring Guidelines and Procedures”. These procedures are in line with best banking practices and are adopted for all loans managed by the EIB.

Loans in arrears are monitored by the Operational Reporting and Arrears Unit of EIB’s Transaction Management and Restructuring Directorate. This ensures that (i) potential arrears are properly detected and reported to the services in charge; (ii) critical cases are promptly escalated to the right operational and decision level; (iii) regular reporting is provided on the overall status of arrears and on the recovery measures already taken or to be taken.

Regular reports on loans in arrears are sent to the European Commission. Twice a year the EIB management committee and the Board of Directors receive a summary analysis of arrears for loans overdue.

The arrears of payments on concerned loans can be analysed as follows (in EUR'000):

| | Notes | Loans and receivables 31.12.2013 | Loans and receivables 31.12.2012 |
|--|-------|-------------------------------------|-------------------------------------|
| Carrying amount | | 1 222 199 | 1 146 280 |
| Individually impaired | | | |
| Gross amount | | 227 007 | 105 154 |
| Allowance for impairment | 7 | -70 791 | -45 145 |
| Carrying amount individually impaired | | 156 216 | 60 009 |
| Collectively impaired | | | |
| Gross amount | | - | - |
| Allowance for impairment | | - | - |
| Carrying amount collectively impaired | | - | - |
| Past due but not impaired | | | |
| Past due comprises | | | |
| 30-60 days | | 1 561 | 12 |
| 60-90 days | | - | - |
| 90-180 days | | - | - |
| more 180 days | | - | - |
| Carrying amount past due but not impaired | | 1 561 | 12 |
| Carrying amount neither past due nor impaired | | 1 064 422 | 1 086 259 |
| Total carrying amount loans and receivables | | 1 222 199 | 1 146 280 |

3.2.4. Credit risk on cash and cash equivalents

Available funds are invested in accordance with the Facility's schedule of contractual disbursement obligations. As of 31 December 2013, investments were in the form of bank deposits.

The authorized banks have a rating similar to the short- and long-term ratings required for the EIB's own treasury placements. The minimum short term rating required for authorised banks is P-1/A-1/F1 (Moody's, S&P, Fitch). In case of different ratings being granted by more than one credit rating agency, the lowest rating governs. The maximum authorized limit for each authorised bank is currently EUR 50 000 000 (fifty million euro).

All investments have been done with authorised entities with a maximum tenor of three months from trading date and up to the credit exposure limit. As at 31 December 2013 and 31 December 2012 all treasury deposits held by the treasury portfolio of the Facility had a minimum rating of P-1 (Moody's equivalent) at settlement day.

The following table shows the situation of bank cash accounts and deposits including accrued interest (in EUR'000):

| Minimum short-term rating (Moody's term) | Minimum long-term rating (Moody's term) | | 31.12.2013 | | 31.12.2012 |
|---|--|--|----------------|-------------|----------------|
| P-1 | Aa1 | | 48 130 | 8% | 43 400 |
| P-1 | Aa3 | | 50 000 | 8% | 130 901 |
| P-1 | A1 | | 106 572 | 18% | 83 500 |
| P-1 | A2 | | 394 765 | 66% | 208 729 |
| P-1 | Aa2 | | 48 | 0% | 38 |
| Total | | | 599 515 | 100% | 466 568 |
| | | | | | 100% |

3.2.5. Credit risk on derivatives

3.2.5.1 Credit risk policy of derivatives

The credit risk with respect to derivatives is represented by the loss which a given party would incur where the other counterparty to the deal would be unable to honour its contractual obligations. The credit risk associated with derivatives varies according to a number of factors (such as interest and exchange rates) and generally corresponds to only a small portion of their notional value.

In the normal course of its activity, the Facility may enter into swap contracts with a view to hedge specific lending operations or into currency forward contracts, with a view to hedge its currency positions denominated in actively traded currencies other than the Euro. All the swaps are executed by the European Investment Bank with an external counterpart. The swaps are disciplined by the same Master Swap Agreements and Credit Support Annexes signed between the European Investment Bank and its external counterparts.

3.2.5.2 Credit risk measurement for derivatives

All the swaps executed by the European Investment Bank that are related to the Facility are treated within the same contractual framework and methodologies applied for the derivatives negotiated by the European Investment Bank for its own purposes. In particular, eligibility of swap counterparts is determined by the European Investment Bank based on the same eligibility conditions applied for its general swap purposes.

The European Investment Bank measures the credit risk exposure related to swaps and derivatives transactions using the Net Market Exposure ("NME") and Potential Future Exposure ("PFE") approach for reporting and limit monitoring. The NME and the PFE fully include the derivatives related to the Investment Facility.

The following table shows the maturities of cross currency swaps and cross currency interest rate swaps, sub-divided according to their notional amount and fair value:

| Swap contracts at 31.12.2013 | less than | 1 year | 5 years | more than | Total 2013 |
|--|------------------|-------------------|--------------------|--------------------|-------------------|
| In EUR'000 | 1 year | to 5 years | to 10 years | to 10 years | |
| Notional amount | 2 453 | 2 584 | 13 491 | - | 18 528 |
| Fair Value (i.e. net discounted value) | 19 | - 62 | -1 892 | - | -1 935 |

| Swap contracts at 31.12.2012 | less than | 1 year | 5 years | more than | Total 2012 |
|--|------------------|-------------------|--------------------|--------------------|-------------------|
| In EUR'000 | 1 year | to 5 years | to 10 years | to 10 years | |
| Notional amount | 1 480 | 9 833 | 15 253 | - | 26 566 |
| Fair Value (i.e. net discounted value) | 71 | -528 | -3 529 | - | -3 986 |

The Facility enters into foreign exchange short term currency swaps ("FX swaps") contracts in order to hedge currency risk on loan disbursements in currencies different from EUR. FX swaps have a maturity of maximum three months and are regularly rolled-over. The notional amount of FX swaps stood at EUR 700 million at 31 December 2013 against EUR 649 million at 31 December 2012. The fair value of FX swaps amounts to EUR -1.5 million at 31 December 2013 against EUR -2.9 million at 31 December 2012.

The Facility enters into interest rate swap contracts in order to hedge the interest rate risk on loans disbursed. As at 31 December 2013 there are two interest rate swaps outstanding with a notional amount of EUR 43.3 million (2012: EUR 19.6 million) and a fair value of EUR 0.92 million (2012: EUR 0.03 million).

3.2.6. Credit risk on held-to-maturity financial assets

The following table shows the situation of the held-to-maturity portfolio entirely composed of T-Bills issued by Belgium, France, Italy and Spain with remaining maturities of less than three months. EU Member States are eligible issuers. The maximum authorized limit for each authorised issuer is EUR 50 000 000 (fifty million euro). Investments in medium and long-term bonds could also be eligible, according to the investment guidelines and depending on liquidity requirements:

| Minimum short-term rating (Moody's term) | Minimum long-term rating (Moody's term) | | 31.12.2013 | | 31.12.2012 |
|---|--|--|----------------|-------------|---------------|
| P-1 | Aa2 | | 16 199 | 16% | - |
| P-1 | Aa3 | | 39 399 | 38% | - |
| P-2 | Baa2 | | - | - | 50 143 |
| P-3 | Baa3 | | 46 964 | 46% | 48 886 |
| Total | | | 102 562 | 100% | 99 029 |
| | | | | | 100% |

3.3 Liquidity risk

Liquidity risk refers to an institution's ability to fund increases in assets and meet obligations as they come due, without incurring unacceptable losses. It can be split into funding liquidity risk and market liquidity risk. Funding liquidity risk is the risk that an institution will not be able to meet efficiently both expected and unexpected current and future cash flow needs without affecting its daily operations or its financial condition. Market liquidity risk is the risk that an institution cannot easily offset or eliminate a position at the market price because of inadequate market depth or market disruption.

3.3.1 Liquidity risk management

The Facility is primarily funded by annual contributions from Member States (9th and 10th EDF resources) as well as by reflows stemming from the Facility's operations. The Facility manages its funding liquidity risk primarily by planning of its net liquidity needs and the required Member States annual contributions.

Each year, the EC, taking into account EIB's forecasts concerning the management and operations of the Facility, shall establish and communicate to the Council by 15 October a statement of the commitments, payments and the annual amount of the calls for contributions (interest subsidies included) to be made in the current and the following budget years.

In order to calculate Member States annual contributions, disbursement pattern of the existing and pipelined portfolio is analysed and followed up throughout the year. Special events, such as early reimbursements, sales of shares or default cases are taken into account to correct annual liquidity requirements.

To further minimize the liquidity risk, the Facility maintains a liquidity reserve sufficient to cover at any point in time forecasted cash disbursements, as communicated periodically by EIB's Lending Department. Funds are invested on the money market and bond markets in the form of interbank deposits and other short term financial instruments by taking into consideration the Facility's cash disbursement obligations. The Facility's liquid assets are managed by the Bank's Treasury Department with a view to maintain appropriate liquidity to enable the Facility to meet its obligations.

In accordance with the principle of segregation of duties between the Front and Back Office, settlement operations related to the investment of these assets are under the responsibility of the EIB's Planning and Settlement of Operations Department. Furthermore, the authorisation of counterparts and limits for treasury investments, as well as the monitoring of such limits, are the responsibility of the Bank's Risk Management Directorate.

3.3.2 Liquidity risk measurement

The tables in this section analyse the financial liabilities of the Facility by maturity on the basis of the period remaining between the balance sheet date and the contractual maturity date (based on undiscounted cash flows).

In terms of non-derivative financial liabilities, the Facility holds commitments in form of undisbursed portions of the credit under signed loan agreements, of undisbursed portions of signed capital subscription/investment agreements, of loan guarantees granted, or of committed interest rate subsidies and technical assistance ("TA").

The table representing the maturity profile of non-derivative financial liabilities as at 31 December 2012 has been restated due to the application of an updated methodology. In the 2012 financial statements, the breakdown of maturities has been prepared using forecasted rather than contractual maturity dates, primarily due to the uncertainty in the timing of cash flows. In the updated methodology, the maturity profile of non-derivative financial liabilities depicts the cash outflows based on their contractual maturity date.

Loans under the IF have a disbursement deadline. However, disbursements are made at times and in amounts reflecting the progress of underlying investment projects. Moreover, the IF's loans are transactions performed in a relatively volatile operating environment, hence their disbursement schedule is subject to a significant degree of uncertainty.

Capital investments become due when and as soon as equity fund managers issue valid calls for capital, reflecting the progress in their investment activities. The drawdown period is usually of 3 years, with frequent prolongation by one or two years. Some disbursement commitments usually survive the end of the drawdown period until full disposal of the fund's underlying investments, as the fund's liquidity may be insufficient from time to time to meet payment obligations arising in respect of fees or other expenses.

Loan guarantees are not subject to specific disbursement commitments unless a guaranteee is called by its beneficiary. The amount of guarantee outstanding is reduced alongside the repayment schedule of each guaranteed loan.

Committed interest subsidies' cash outflows occur generally in the case of subsidized loans financed by the Bank's own resources. Therefore, reported outflows represent only commitments related to these loans rather than the total amount of committed undisbursed interest subsidies which was reflected in the 2012 financial statements. As in the case of loans, their disbursement schedule is uncertain.

Committed TA "gross nominal outflow" in the "Maturity profile of non-derivative financial liabilities" table refers to the total undisbursed portion of signed TA contracts. The disbursement time pattern is subject to a significant degree of uncertainty. Cash outflows classified in the "3 months or less" bucket represent the amount of outstanding invoices received by the reporting date.

Commitments for non-derivative financial liabilities for which there is no defined contractual maturity date are classified under "Maturity Undefined". Commitments, for which there is a recorded cash disbursement request at the reporting date, are classified under the relevant time bucket.

In terms of derivative financial liabilities, the maturity profile represents the contractual undiscounted gross cash flows of swap contracts including cross currency swaps (CCS), cross currency interest rate swaps (CCIRS), short term currency swaps and interest rate swaps.

| Maturity profile of non-derivative financial liabilities In EUR'000 as at 31.12.2013 | 3 months or less | More than 3 months to 1 year | More than 1 year to 5 years | More than 5 years | Maturity Undefined | Gross nominal outflow |
|---|------------------|------------------------------|-----------------------------|-------------------|--------------------|-----------------------|
| Outflows for committed but un-disbursed loans | 363 | - | - | - | 889 503 | 889 866 |

| Interest Rate Swaps – Inflows | 65 | 511 | 3 274 | 2 117 | 5 967 |
| Interest Rate Swaps – Outflows | - | -753 | -3 537 | -1 577 | -5 867 |
| Total | -3 434 | -1 306 | -2 983 | -4 | -7 727 |

3.4 Market risk

Market risk represents the risk that changes in market prices and rates, such as interest rates, equity prices and foreign exchange rates will affect an entity's income or the value of its holdings in financial instruments.

3.4.1. Interest rate risk

Interest rate risk arises from the volatility in the economic value of, or in the income derived from, the Facility's interest rate bearing positions due to adverse movements in interest rates. Exposure to interest rate risk occurs when there are differences in repricing and maturity characteristics of the different assets and liabilities.

The Facility measures the sensitivity of its loan portfolio and micro hedging swaps to interest rate risk via a Basis Point Value (BPV) calculation. Micro hedging swaps include CCS, CCIRS and interest rate swaps which are associated with the hedging of specific lending operations.

The BPV measures the gain or loss in the net present value of the relevant portfolio, due to a 1 basis point (0.01%) increase in interest rates tenors ranging within a specified time bucket "money market – up to one year", "very short – 2 to 3 years", "short – 4 to 6 years", "medium – 7 to 11 years", "long – 12 to 20 years" or "extra-long – more than 21 years".

To determine the net present value (NPV) of the loans' cash flows denominated in EUR, the Facility uses the EIB's EUR base funding curve (EUR swap curve adjusted with EIB's global funding spread). The EIB's USD funding curve is used for the calculation of the NPV of loan's cash flows denominated in USD. The NPV of the loans' cash flows denominated in currencies for which a reliable and sufficiently complete discount curve is not available, is determined by using EIB's EUR base funding curve as a proxy.

To calculate the net present value of the micro hedging swaps, the facility uses the EUR swap curve for cash flows denominated in EUR and the USD swap curve for cash flows denominated in USD.

As shown in the following table the net present value of the loan portfolio including related micro-hedging swaps as at 31 December 2013 would decrease by EUR 344k (as at 31 December 2012: decrease by EUR 341k) if all relevant interest rates curves are simultaneously shifted upwards in parallel by 1 basis point.

| Basis point value In EUR'000 | Money Market | Very Short | Short | Medium | Long | Extra Long | Total |
|--|-----------------|--------------|--------------|---------------|----------------|---------------|-------|
| As at 31.12.2013 | 1 year | 2 to 3 years | 4 to 6 years | 7 to 11 years | 12 to-20 years | 21 years | |
| Total sensitivity of loans and micro hedging swaps | -25 | -57 | -90 | -124 | -48 | - | -344 |

| Basis point value In EUR'000 | Money Market | Very Short | Short | Medium | Long | Extra Long | Total |
|--|-----------------|--------------|--------------|---------------|----------------|---------------|-------|
| As at 31.12.2012 | 1 year | 2 to 3 years | 4 to 6 years | 7 to 11 years | 12 to-20 years | 21 years | |
| Total sensitivity of loans and micro hedging swaps | -25 | -47 | -90 | -117 | -62 | - | -341 |

3.4.2. Foreign exchange risk

Foreign exchange ("FX") risk is the volatility in the economic value of, or in the income derived from, the Facility's positions due to adverse movements of foreign exchange rates.

The Facility is exposed to foreign exchange risk whenever there is a currency mismatch between its assets and liabilities. Foreign exchange risk also comprises the effect of unexpected and unfavourable changes in the value of future cash flows due to fluctuations in exchange rates.

3.4.2.1 Foreign exchange risk and treasury assets

The IF's treasury assets are denominated either in EUR or USD.

FX risk is hedged by means of FX spot or forward transactions, FX swaps or cross-currency swaps. The EIB's Treasury Department can, where deemed necessary and appropriate, use any other instrument, in line with the Bank's policy, that provide protection against market risks incurred in connection with the IF's financial activities.

3.4.2.2 Foreign exchange risk and operations financed or guaranteed by the IF

Member States' IF contributions are received in EUR. The operations financed or guaranteed by the IF as well as Interest Rate Subsidies can be denominated in EUR, USD or any other authorized currency.

A foreign exchange risk exposure (against the EUR reference currency) arises whenever transactions denominated in currencies other than the EUR are left un-hedged. The IF's foreign exchange risk hedging guidelines are set out below.

3.4.2.2.1. Hedging of operations denominated in currencies other than EUR or USD

- IF loans disbursed in currencies other than EUR and USD shall be hedged through cross-currency swap contracts with the same financial profile as the underlying Loan, provided that a swap market is operational.
- For disbursements under IF Operations made in a currency other than EUR and USD, and for which a long-term hedging operation is not undertaken, the Treasury Department shall enter into a foreign exchange transaction two business days prior

to the disbursement. The FX conversion rate applied to IF Operations shall correspond to the market exchange rate obtained by the Treasury Department. Similarly, for repayments received in a currency other than EUR and USD, the Treasury Department shall undertake an FX operation where necessary to convert the currencies received.

- Uncalled guarantees are not subject to any FX hedging. Guarantee calls in currencies other than EUR and USD will be hedged.
- Operations in currencies other than EUR and USD for which no FX hedging operation can be undertaken by the Treasury Department shall be left un-hedged. This also includes (synthetic) operations denominated in local currency but settled in EUR or USD. The IF shall remain exposed to the FX risk incurred thereby.

3.4.2.2.2. Hedging of operations denominated in USD

- The total outstanding amount of all IF Operations (except uncalled Guarantees) denominated in USD shall be hedged by means of USD/EUR FX swaps, rolled over on a periodic basis. At the beginning of each period, the cash flows to be received or paid in USD during the next period shall be estimated on the basis of planned or expected reflows/disbursements. Subsequently, the maturing FX swaps shall be rolled over, their amount being adjusted to cover at least the USD liquidity needs projected over the next period.
- A periodic calculation of the overall USD exposure as per the accounting records will be undertaken to adjust, if necessary, the hedge on the next FX swap roll.
- If deemed operationally convenient by the Treasury Department, cross-currency swaps can also be used to hedge specific USD Loans.
- Within a roll-over period, unexpected USD liquidity deficits shall be covered by means of ad hoc FX swap operations while liquidity surpluses shall either be invested in treasury assets or swapped into EUR.

3.4.2.3 Foreign exchange position

The following tables show the Facility's foreign exchange position (in EUR'000):

| At 31 December 2013 | EUR | USD | KES | ACP/OCT Currencies | Total |
|--|------------------|----------------|---------------|--------------------|------------------|
| ASSETS | | | | | |

3.4.2.4 Foreign exchange sensitivity analysis (in EUR'000)

As at the reporting date the most significant net foreign currency exposure is the USD net exposure. As at 31 December 2013 a +/- 10 percent change in the USD conversion rate would result in a change of contributors' resources amounting to EUR 9 123 respectively EUR -9 123 (31 December 2012: EUR 6 677 respectively EUR -6 677).

3.4.2.5 Conversion rates

The following conversion rates were used for establishing the balance sheet at 31 December 2013 and 31 December 2012:

| | 31 December 2013 | 31 December 2012 |
|--------------------------------|------------------|------------------|
| Non-EU currencies | | |
| Dominican Republic Pesos (DOP) | 58.3329 | 53.1220 |
| Fiji Dollars (FJD) | 2.5655 | 2.3417 |
| Haitian Gourde (HTG) | 60.1459 | 55.7265 |
| Kenya Shillings (KES) | 118.73 | 113.68 |
| Mauritania Ouguiyas (MRO) | 398.7 | 393.99 |
| Mauritius Rupees (MUR) | 41.27 | 40.19 |
| Rwanda Francs (RWF) | 926.86 | 811.83 |
| Tanzania Shillings (TZS) | 2 179.05 | n/a |
| Uganda Shillings (UGX) | 3 476 | 3 549 |
| United States Dollars (USD) | 1.3791 | 1.3194 |
| Franc CFA Francs (XAF/XOF) | 655.957 | 655.957 |
| South Africa Rand (ZAR) | 14.566 | 11.1727 |

3.4.3 Equity price risk (in EUR'000)

Equity price risk refers to the risk that the fair values of equity investments decrease as the result of changes in the levels of equity prices and/or the value of equity investments.

The IF is exposed to equity price risk via its investments in direct equity and venture capital funds.

The value of non-listed equity positions is not readily available for the purpose of monitoring and control on a continuous basis. For such positions, the best indications available include prices derived from any relevant valuation techniques.

The effects on the Facility's contributors' resources (as a result of a change in the fair value of the available-for-sale equity portfolio) due to a 10% decrease in the value of individual direct equity and venture capital investments, with all other variables held constant is EUR -33 170 as at 31 December 2013 and EUR -33 300 as at 31 December 2012.

4 Fair values of financial instruments

4.1 Accounting classifications and fair values

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. These do not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

| At 31 December 2013 In EUR'000 | Carrying amount | | | | | Fair value | | | | |
|--|------------------------|------------------------|-------------------------|---------------------|-----------------------------------|------------------|----------------|------------------|----------------|------------------|
| | Held for trading | Available- for-sale | Loan and receivables | Held to maturity | Other financial liabilities | Total | Level 1 | Level 2 | Level 3 | Total |
| Financial assets measured at fair value: | | | | | | | | | | |
| Derivative financial instruments | 1 024 | - | - | - | - | 1 024 | - | 1 024 | - | 1 024 |
| Venture Capital Fund | - | 269 252 | - | - | - | 269 252 | - | - | 269 252 | 269 252 |

| Total financial liabilities | -7 035 | - | - | - | -313 239 | -320 274 | | | | |

4.2 Measurement of fair values

4.2.1 Valuation techniques and significant unobservable inputs

The table below sets out information about the valuation techniques and significant unobservable inputs used in measuring financial instruments, categorised as level 2 and 3 in the fair value hierarchy:

| Valuation technique | Significant unobservable inputs | Relationship of unobservable inputs to fair value measurement | |
|---|---|---|--|
| Financial instruments measured at fair value | | | |
| Derivative financial instruments | Discounted cash flow: Future cash flows are estimated based on forward exchange/interest rates (from observable forward exchange rates and yield curves at the end of the reporting period) and contract forward/interest rates, discounted at a rate that reflects the credit risk of various counterparties. | Not applicable. | Not applicable. |
| Venture Capital Fund (VCF) | Adjusted net assets method: The fair value is determined by applying either the Facility's percentage ownership in the underlying vehicle to the net asset value reflected in the most recent report adjusted for cash flows or, where available, the precise share value at the same date, submitted by the respective Fund Manager. In order to bridge the interval between the last available Net assets value (NAV) and the year-end reporting, a subsequent event review procedure is performed and if necessary the reported NAV is adjusted. | Adjustment for time elapsed between the last reporting date of the VCF and the measurement date, taking into account: operating expenses and management fees, subsequent changes in the fair value of the VCF's underlying assets, additional liabilities incurred, market changes or other economic condition changes. | The longer the period between the fair value measurement date and the last reporting date of the VCF, the higher the adjustment for time elapsed. |
| Direct Equity Investment | Adjusted net assets. | Adjustment for time elapsed between the last reporting date of the investee and the measurement date, taking into account: operating expenses, subsequent changes in the fair value of the investee's underlying assets, additional liabilities incurred, market changes or other economic condition changes, capital increase, sale/change of control. | The longer the period between the fair value measurement date and the last reporting date of the investee, the higher the adjustment for time elapsed. |
| | | Discount for lack of marketability (liquidity) determined by reference to previous transaction prices for similar equities in the country/region, ranging from 5 to 30%. | The higher the marketability discount, the lower the fair value. |
| Financial instruments not measured at fair value | | | |
| Loans and receivables | Discounted cash flows: The valuation model uses contractual cash flows that are conditional upon the non-occurrence of default by the debtor and do not take into account any collateral values or early repayments' scenarios. To obtain the Net Present Value (NPV) of the loans, the model retained discounts the contractual cash flows of each loan using an adjusted market discount curve. The individual loan NPV is then adjusted to take into consideration the relevant associated Expected Loss. The results are then summed to obtain the fair value of Loans and receivables. | Not applicable. | Not applicable. |
| Amounts owed to third parties | Discounted cash flows. | Not applicable. | Not applicable. |
| Other liabilities | Discounted cash flows. | Not applicable. | Not applicable. |

With the application of IFRS 13, valuation adjustments are included in the fair value of derivatives at 31 December 2013, namely:

- Credit valuation adjustments (CVA), reflecting counterparty credit risk on derivative transactions, amounting to a loss of EUR 184k.
- Debit valuation adjustments (DVA), reflecting own credit risk on derivative transactions, were estimated at nil.

The Facility's policy is to recognise the transfers between Levels as of the date of the event or change in circumstances that caused the transfer.

4.2.2 Transfers between Level 1 and 2

In 2013 the Facility did not make transfers from Level 1 to 2 or Level 2 to 1 of the fair value hierarchy.

4.2.3 Level 3 fair values

Reconciliation of Level 3 fair values

The following tables present the changes in Level 3 instruments for the year ended 31 December 2013 and 31 December 2012:

| In EUR'000 | Available-for-sale financial assets |
|---|--|
| Balance at 1 January 2013 | 322 000 |
| Gains or losses included in profit or loss: | |
| - net realised gains on available-for-sale financial assets | 5 294 |
| - impairment on available-for-sale financial assets | -2 701 |
| Total | 2 593 |
| Gains or losses included in other comprehensive income: | |
| - net change in fair value of available-for-sale financial assets | 4 299 |
| Total | 4 299 |
| Disbursements | 34 700 |
| Repayments | -38 737 |
| Balance at 31 December 2013 | 324 855 |

| In EUR'000 | Available-for-sale financial assets |
|--|--|
| Balance at 1 January 2012 | 236 446 |
| Total gains or losses included in profit or loss | |
| Total gains or losses included in profit or loss | 8 133 |
| Total gains or losses included in other comprehensive income | 15 041 |
| Disbursements | 81 981 |
| Repayments | -19 601 |
| Balance at 31 December 2012 | 322 000 |

In 2013 the Facility did not make transfers out or to Level 3 of the fair value hierarchy.

Sensitivity analysis

A +/- 10 percent change at the reporting date to one of the significant unobservable inputs used to measure the fair values of the Venture Capital Funds and Direct Equity Investments, holding other inputs constant, would have the following effects on the other comprehensive income:

| At 31 December 2013 (in EUR'000) | Increase | Decrease |
|---|-----------------|-----------------|
| Venture Capital Funds | 20 | -20 |
| Direct Equity Investments | 141 | -141 |
| Total | 161 | -161 |

5 Cash and cash equivalents (in EUR'000)

Cash and cash equivalents can be broken down between amounts received from the Member States and not yet disbursed and amounts from the Facility's operational and financial activities.

| | 31.12.2013 | 31.12.2012 |
|---|-------------------|-------------------|
| Member states contributions received and not yet disbursed | 36 624 | 117 622 |
| Amounts from the Facility's financial and operational activities | 562 891 | 348 946 |
| Cash and cash equivalents in the statement of financial position | 599 515 | 466 568 |
| Accrued interest | - 8 | - 7 |
| Cash and cash equivalents in the cash flow statement | 599 507 | 466 561 |

6 Derivative financial instruments (in EUR'000)

The main components of derivative financial instruments, classified as held for trading, are as follows:

| At 31 December 2013 | Fair Value | | Notional amount |
|---|-------------------|--------------------|------------------------|
| | Assets | Liabilities | |
| Cross currency swaps | 56 | - | 2 067 |
| Cross currency interest rate swaps | 44 | -2 035 | 16 461 |
| Interest rate swaps | 924 | - | 43 335 |
| FX swaps | - | -1 510 | 700 000 |
| Total derivative financial instruments | 1 024 | -3 545 | 761 863 |

| At 31 December 2012 | Fair Value | | Notional amount |
|---|-------------------|--------------------|------------------------|
| | Assets | Liabilities | |
| Cross currency swaps | 87 | -102 | 7 062 |
| Cross currency interest rate swaps | - | -3 971 | 19 504 |
| Interest rate swaps | 28 | - | 19 568 |
| FX swaps | - | -2 962 | 649 000 |
| Total derivative financial instruments | 115 | -7 035 | 695 134 |

7 Loans and receivables (in EUR'000)

The main components of loans and receivable are as follows:

| | Global loans (*) | Senior loans | Subordinated loans | Total |
|---|---------------------|--------------------|-----------------------|--------------------|
| Nominal as at 1 January 2013 | 254 686 | 789 970 | 133 780 | 1 178 436 |
| Disbursements | 150 513 | 91 690 | - | 242 203 |
| Write offs | - | - | - | - |
| Repayments | -51 595 | -55 865 | -11 700 | -119 160 |
| Interest capitalised | - | -342 | 10 705 | 10 363 |
| Foreign exchange rates differences | -11 491 | -19 446 | -1 153 | -32 090 |
| Nominal as at 31 December 2013 | 342 113 | 806 007 | 131 632 | 1 279 752 |
| Impairment as at 1 January 2013 | -6 494 | -14 296 | -24 355 | -45 145 |
| Impairment recorded in statement of profit or loss and other comprehensive income | -1 341 | - | -27 081 | -28 422 |
| Write offs | - | - | - | - |
| Reversal of impairment | - | 1 088 | - | 1 088 |
| Foreign exchange rates differences | 160 | 474 | 1 054 | 1 688 |
| Impairment as at 31 December 2013 | -7 675 | -12 734 | -50 382 | -70 791 |
| Amortised Cost | -2 109 | -3 883 | -66 | -6 058 |
| Interest | 5 154 | 10 536 | 3 606 | 19 296 |
| Loans and receivables as at 31 December 2013 | 337 482 | 799 926 | 84 790 | 1 222 199 |

8 Available-for-sale financial assets (in EUR'000)

The main components of available-for-sale financial assets are as follows:

| | Venture Capital Fund | Direct Equity Investment | Total |
|---|----------------------|--------------------------|----------------|
| Cost as at 1 January 2013 | 220 710 | 61 830 | 282 540 |
| Disbursements | 33 600 | 1 100 | 34 700 |
| Repayments / sales | -36 322 | -2 415 | -38 737 |
| Foreign exchange rates differences on repayments / sales | 922 | -398 | 524 |
| Cost as at 31 December 2013 | 218 910 | 60 117 | 279 027 |
| Unrealised gains and losses as at 1 January 2013 | 59 321 | 9 113 | 68 434 |
| Net change in unrealised gains and losses | 13 290 | -3 533 | 9 757 |
| Unrealised gains and losses as at 31 December 2013 | 72 611 | 5 580 | 78 191 |
| Impairment as at 1 January 2013 | -14 730 | -3 243 | -17 973 |
| Impairment recorded in statement of profit or loss and other comprehensive income during the year | -8 105 | -71 | -8 176 |
| Foreign exchange rates differences on impairment | 566 | 64 | 630 |
| Impairment as at 31 December 2013 | -22 269 | -3 250 | -25 519 |
| Available-for-sale financial assets as at 31 December 2013 | 269 252 | 62 447 | 331 699 |
| | | | |
| | Venture Capital Fund | Direct Equity Investment | Total |
| Cost as at 1 January 2012 | 182 692 | 36 565 | 219 257 |
| Disbursements | 56 007 | 25 974 | 81 981 |
| Repayments / sales | -19 570 | -31 | -19 601 |
| Foreign exchange rates differences on repayments / sales | 1 581 | -678 | 903 |
| Cost as at 31 December 2012 | 220 710 | 61 830 | 282 540 |
| Unrealised gains and losses as at 1 January 2012 | 29 781 | 11 969 | 41 750 |
| Net change in unrealised gains and losses | 29 540 | -2 856 | 26 684 |
| Unrealised gains and losses as at 31 December 2012 | 59 321 | 9 113 | 68 434 |
| Impairment as at 1 January 2012 | -6 887 | -2 460 | -9 347 |
| Impairment recorded in statement of profit or loss and other comprehensive income during the year | -7 976 | -951 | -8 927 |
| Foreign exchange rates differences on impairment | 133 | 168 | 301 |
| Impairment as at 31 December 2012 | -14 730 | -3 243 | -17 973 |
| Available-for-sale financial assets as at 31 December 2012 | 265 301 | 67 700 | 333 001 |

9 Amounts receivable from contributors (in EUR'000)

The main components of amounts receivable from contributors are as follows:

| | 31.12.2013 | 31.12.2012 |
|---|------------|---------------|
| Member states contribution called but not paid | - | 87 310 |
| Total amounts receivable from contributors | - | 87 310 |

10 Held-to-maturity financial assets (in EUR'000)

The held-to-maturity portfolio is composed of quoted bonds which have a remaining maturity of less than three months at reporting date. The following table shows the movements of the held-to-maturity portfolio:

| | |
|--|----------------|
| Balance as at 1 January 2013 | 99 029 |
| Acquisitions | 680 635 |
| Maturities | -676 369 |
| Change in amortisation of premium/discount | 228 |
| Change in accrued interest | -961 |
| Balance as at 31 December 2013 | 102 562 |
| | |
| Balance as at 1 January 2012 | - |
| Acquisitions | 98 278 |
| Change in amortisation of premium/discount | -210 |
| Change in accrued interest | 961 |
| Balance as at 31 December 2012 | 99 029 |

11 Other assets (in EUR'000)

The main components of other assets are as follows:

| | 31.12.2013 | 31.12.2012 |
|--|------------|------------|
| Amount receivable from EIB | 6 | 7 |
| Financial guarantees | 142 | 217 |
| Amounts receivable with regard to TA disbursements | 337 | 337 |
| Impairment on amounts receivable with regard to TA disbursements (Note 20) | -337 | -337 |
| Total other assets | 148 | 224 |

12 Deferred income (in EUR'000)

The main components of deferred income are as follows:

| | 31.12.2013 | 31.12.2012 |
|---|---------------|---------------|
| Deferred interest subsidies | 34 787 | 37 387 |
| Deferred commissions on loans and receivables | 296 | 421 |
| Total deferred income | 35 083 | 37 808 |

13 Amounts owed to third parties (in EUR'000)

The main components of amounts owed to third parties are as follows:

| | 31.12.2013 | 31.12.2012 |
|--|----------------|----------------|
| Net general administrative expenses payable to EIB | 37 851 | 36 202 |
| Other amounts payable to EIB | 716 | 8 904 |
| Interest subsidies not yet disbursed owed to Member States | 292 668 | 266 980 |
| Total amounts owed to third parties | 331 235 | 312 086 |

14 Other liabilities (in EUR'000)

The main components of other liabilities are as follows:

| | 31.12.2013 | 31.12.2012 |
|---|--------------|--------------|
| Loan repayments received in advance | 1 827 | 215 |
| Deferred income from interest subsidies | 603 | 723 |
| Financial guarantees | 142 | 215 |
| Total other liabilities | 2 572 | 1 153 |

15 Member States Contribution called (in EUR'000)

| Member States | Contribution to the Facility | Contribution to interest subsidies | Total contributed | Called and not paid (*) |
|-------------------------------------|------------------------------|------------------------------------|-------------------|-------------------------|
| Austria | 44 025 | 11 493 | 55 518 | - |
| Belgium | 65 123 | 17 001 | 82 124 | - |
| Denmark | 35 552 | 9 281 | 44 833 | - |
| Finland | 24 587 | 6 419 | 31 006 | - |
| France | 403 698 | 105 387 | 509 085 | - |
| Germany | 388 082 | 101 310 | 489 392 | - |
| Greece | 20 766 | 5 421 | 26 187 | - |
| Ireland | 10 300 | 2 689 | 12 989 | - |
| Italy | 208 328 | 54 385 | 262 713 | - |
| Luxembourg | 4 818 | 1 258 | 6 076 | - |
| Netherlands | 86 720 | 22 638 | 109 358 | - |
| Portugal | 16 115 | 4 207 | 20 322 | - |
| Spain | 97 020 | 25 327 | 122 347 | - |
| Sweden | 45 355 | 11 840 | 57 195 | - |
| United Kingdom | 210 820 | 55 035 | 265 855 | - |
| Total as at 31 December 2013 | 1 661 309 | 433 691 | 2 095 000 | - |
| Total as at 31 December 2012 | 1 561 309 | 383 691 | 1 945 000 | 87 310 |

(*) On 20 November 2012, the Council fixed the amount of financial contributions to be paid by each Member State by 21 January 2013.

16 Contingent liabilities and commitments (in EUR'000)

| | 31.12.2013 | 31.12.2012 |
|--|------------------|------------------|
| Commitments | | |
| Undisbursed loans | 889 866 | 749 044 |
| Undisbursed commitment in respect of available-for-sale financial assets | 176 821 | 217 070 |
| Guarantees drawn | 4 414 | 6 224 |
| Subsidies and TA | 222 588 | 228 175 |
| Contingent liabilities | | |
| Guarantees undrawn | 25 000 | 20 000 |
| Total contingent liabilities and commitments | 1 318 689 | 1 220 513 |

17 Interest and similar income and expenses (in EUR'000)

The main components of interest and similar income are as follows:

| | From 01.01.2013 to 31.12.2013 | From 01.01.2012 to 31.12.2012 |
|-----------------------------------|----------------------------------|----------------------------------|
| Cash and cash equivalents | 273 | 1 678 |
| Held-to-maturity financial assets | 461 | 36 |
| Loans and receivables | 63 189 | 64 060 |

| | | |
|--|---------------|---------------|
| Interest subsidies | 4 347 | 1 729 |
| Total interest and similar income | 68 270 | 67 503 |

The main component of interest and similar expenses is as follows:

| | From 01.01.2013 to 31.12.2013 | From 01.01.2012 to 31.12.2012 |
|--|----------------------------------|----------------------------------|
| Derivative financial instruments | -1 175 | -1 114 |
| Total interest and similar expenses | -1 175 | -1 114 |

18 Fee and commission income and expenses (in EUR'000)

The main components of fee and commission income are as follows:

| | From 01.01.2013 to 31.12.2013 | From 01.01.2012 to 31.12.2012 |
|---|----------------------------------|----------------------------------|
| Fee and commission on loans and receivables | 3 896 | 1 710 |
| Fee and commission on financial guarantees | 145 | 191 |
| Other | 10 | 33 |
| Total fee and commission income | 4 051 | 1 934 |

The main component of fee and commission expenses is as follows:

| | From 01.01.2013 to 31.12.2013 | From 01.01.2012 to 31.12.2012 |
|---|----------------------------------|----------------------------------|
| Commission paid to third parties with regard to available-for-sale financial assets | -43 | -292 |
| Total fee and commission expenses | -43 | -292 |

19 Net realised gains on available-for-sale financial assets (in EUR'000)

The main components of net realised gains on available-for-sale financial assets are as follows:

| | From 01.01.2013 to 31.12.2013 | From 01.01.2012 to 31.12.2012 |
|--|----------------------------------|----------------------------------|
| Net proceeds from available-for-sale financial assets | 2 688 | 70 |
| Dividend income | 2 606 | 975 |
| Net realised gains on available-for-sale financial assets | 5 294 | 1 045 |

20 Impairment on other assets (in EUR'000)

During 2012 the Facility made a technical assistance payment amounting to EUR 638 which due to fraudulent behaviour of the counterparty did not reach the final beneficiary. Following legal interventions, the Facility could recover EUR 301 and the remaining amount outstanding was recorded as a receivable. As at the reporting date the likelihood that the Facility will ever recover the outstanding amount is estimated to be low and the outstanding amount of EUR 337 was recorded as impairment in the Facility's comprehensive income.

21 General administrative expenses (in EUR'000)

General administrative expenses represent the actual costs incurred by the EIB for managing the Facility less income generated from standard appraisal fees directly charged by the EIB to clients of the Facility.

| | From 01.01.2013 to 31.12.2013 | From 01.01.2012 to 31.12.2012 |
|--|--|--|
| Actual cost incurred by the EIB | -40 966 | -38 390 |
| Income from appraisal fees directly charged to clients of the Facility | 3 115 | 2 188 |
| General administrative expenses | -37 851 | -36 202 |

Following the entry in force of the revised Cotonou Partnership Agreement on the 1st of July 2008, general administrative expenses are not covered anymore by the Member States.

22 Subsequent events

There have been no material post balance sheet events which could require disclosure or adjustment to the 31 December 2013 financial statements.

**ANNEX TO PART 1 – CHAPTER 2 (REPORT ON THE FINANCIAL
IMPLEMENTATION): SITUATION BY COUNTRY AND BY INSTRUMENT**

Notes to the tables:

- The figure "0.00" indicates that the corresponding amount is between EUR -4999 and EUR 4999. Where no figure is given, the amount is zero.
Countries with a nil balance in all columns are not listed in the tables.
- The heading "All ACP/OCT countries" refers to projects which cover a number of countries but are not financed by regional cooperation.
- The heading "Financial and administrative expenses" represents projects financed by EDF interest or the envelope covering administrative expenditure.
