**REPORT FROM THE COMMISSION TO THE EUROPEAN PARLIAMENT AND
THE COUNCIL**

**ON FOOD AND FOOD INGREDIENTS TREATED WITH IONISING RADIATION
FOR THE YEAR 2013**

REPORT FROM THE COMMISSION TO THE EUROPEAN PARLIAMENT AND THE COUNCIL

ON FOOD AND FOOD INGREDIENTS TREATED WITH IONISING RADIATION FOR THE YEAR 2013

1. INTRODUCTION

The current report, as requested by Article 7(4) of Directive 1999/2/EC of the European Parliament and of the Council on the approximation of the laws of the Member States concerning foods and food ingredients treated with ionising radiation¹ covers the period from 1 January to 31 December 2013. It contains a compilation of the information forwarded to the European Commission by 26 Member States. Malta and Croatia did not submit data for 2013. Croatia joined the EU as of 1 of July 2013.

2. LEGAL BASIS AND BACKGROUND

Article 7(3) of Directive 1999/2/EC, requires Member States to forward to the Commission every year:

- the results of checks carried out in the ionising radiation facilities, in particular regarding the categories and quantities of food and food ingredients treated and the doses administered,

and

- the results of checks carried out at the product marketing stage and the methods used to detect treatment with ionising radiation.

Article 7(4) of the Directive requires the Commission to publish in the *Official Journal of the European Union*:

- the details of the approved irradiation facilities in the Member States, as well as any changes in their status;
- a report on the information provided every year by the national supervisory authorities.

Information on general aspects of food irradiation is available on the website of the Commission's Directorate-General for Health and Consumers².

¹ Directive 1999/2/EC of the European Parliament and of the Council of 22 February 1999 on the approximation of the laws of the Member States concerning foods and food ingredients treated with ionising radiation (OJ L 66, 13.3.1999, p. 16).

² http://ec.europa.eu/food/food/biosafety/irradiation/index_en.htm

2.1. Irradiation facilities

Food and food ingredients may be irradiated only in approved irradiation facilities. For facilities in the EU, approval is given by the competent authorities of the Member States. Article 7(3) of Directive 1999/2/EC requires Member States to inform the Commission on the list of their approved irradiation facilities.

Irradiation of food and food ingredients may only be carried out by means of the following sources, listed in Annex II to the Directive:

- Gamma rays from radionuclides ^{60}Co or ^{137}Cs ;
- X-rays generated from machine sources operated at or below a nominal energy (maximum quantum energy) level of 5 MeV;
- Electrons generated from machine sources operated at or below a nominal energy (maximum quantum energy) level of 10 MeV.

The list of approved irradiation facilities in Member States is publicly available, as it was published by the Commission³.

2.2. Irradiated food and food ingredients

The irradiation of dried aromatic herbs, spices and vegetable seasonings is authorised at EU level by Directive 1999/3/EC of the European Parliament and of the Council on the establishment of a Community list of food and food ingredients treated with ionising radiation⁴. In addition, seven Member States have notified to the Commission that they maintain national authorisations for certain food and food ingredients, in accordance with Article 4(4) of Directive 1999/2/EC. The list of national authorisations has been published by the Commission⁵.

Any irradiated foodstuff containing one or more irradiated food ingredient must be labelled with the words “irradiated” or “treated with ionising radiation”. If an irradiated product is used as an ingredient in a compound food, the same words shall accompany its designation in the list of ingredients. In the case of products sold in bulk, these words shall appear together with the name of the product on a display or notice above or beside the container in which the products are placed.

To enforce correct labelling or to detect non-authorised products, several analytical methods have been standardised by the European Committee for Standardisation (CEN), following a mandate given by the Commission.

³ OJ C 265, 1.9.2012, p. 3.

⁴ Directive 1999/3/EC of the European Parliament and of the Council of 22 February 1999 on the establishment of a Community list of food and food ingredients treated with ionising radiation (OJ L 66, 13.3.1999, p. 24).

⁵ OJ C 283, 24.11.2009, p. 5.

3. RESULTS OF CHECKS CARRIED OUT IN IRRADIATION FACILITIES AND DOSES ADMINISTERED

This section of the report deals with the results of the checks carried out in irradiation facilities, in particular, regarding categories and quantities of products treated and doses administered. According to the information submitted by the Member States, the controls carried out by the competent authorities confirmed the compliance of the approved irradiation facilities with the requirements of Directive 1999/2/EC.

The following tables and figures show the results of checks carried out in the approved irradiation facilities in Member States in 2013, in particular, regarding the categories and quantities of food and food ingredients treated and the doses administered.

3.1. Summary for the EU

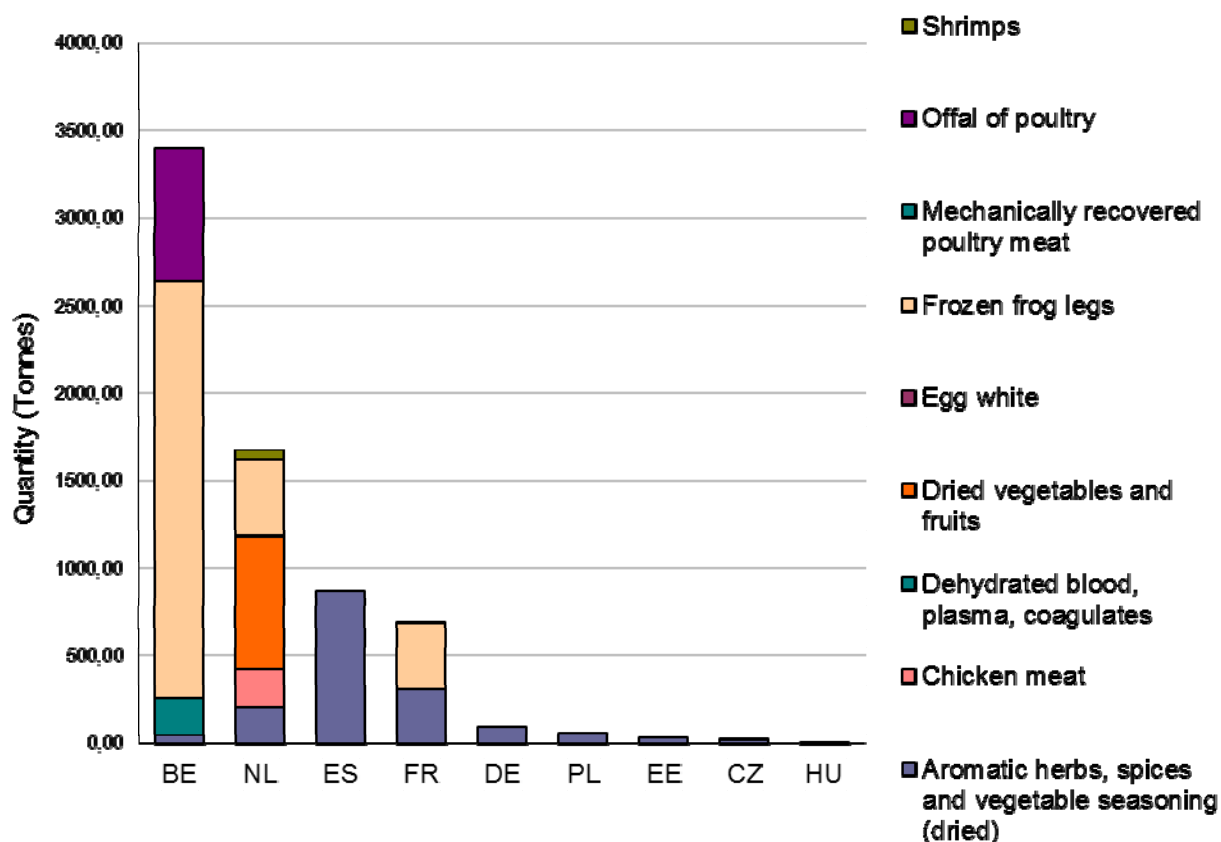

The following table summarises the quantities of foodstuffs (in tonnes) treated by ionising radiation in the approved irradiation facilities located in 13 Member States within the European Union:

Member State	Number of approved facilities	Treated quantity (tonnes)
Belgium	1	3399.3
Bulgaria	2	No food irradiated
Czech Republic	1	24.4
Germany	4	103.3
Estonia	1	35.2
Spain	3*	871.0
France	5	691.0
Italy	1	No food irradiated
Hungary	1	6.7
Netherlands	2	1678.6
Poland	2	66.7
Romania	1	No food irradiated
United Kingdom	1	No food irradiated
Total:	25	6876.2

* No food was irradiated in two of the three facilities.

There are 25 approved irradiation facilities within the European Union located in 13 Member States. No foodstuff was irradiated in 7 of the 25 approved facilities. Only 9 out of 13 Member States irradiated foodstuffs in 2013.

The following histogram summarises the quantities of foodstuffs (in tonnes) and the category of products treated by ionising radiation in approved irradiation facilities within the European Union in 2013:

There are no approved facilities in the following Member States: Denmark, Ireland, Greece, Cyprus, Latvia, Lithuania, Luxembourg, Austria, Slovenia, Slovakia, Finland, Sweden, Portugal.

The following tables show the categories of products irradiated in the Member States concerned and the doses administered.

3.2. Belgium

Foodstuffs	Absorbed dose (kGy)
Aromatic herbs, spices and vegetable seasoning (dried)	4 - 7.9
Dehydrated blood, plasma, coagulates	2.2 - 6.6
Frozen frog legs	2.7 - 4.7
Offal of poultry	3.1 - 4.4

3.3. Czech Republic

Foodstuffs	Absorbed dose (kGy)
Aromatic herbs, spices and vegetable seasoning (dried)	5.66 - 9.92
Dried vegetables and fruits*	6.65 - 8.7

* Leccinum sp., Suillus luteus, Boletus edulis and dried mushrooms mixture

3.4. Germany

Foodstuffs	Absorbed dose (kGy)
Aromatic herbs, spices and vegetables seasoning (dried)	5-10

3.5. Estonia

Foodstuffs	Absorbed dose (kGy)
Aromatic herbs, spices and vegetable seasoning (dried)	10

3.6. Spain

Foodstuffs	Absorbed dose (kGy)
Aromatic herbs, spices and vegetable seasoning (dried)	9.31

3.7. France

Foodstuffs	Absorbed dose (kGy)
Aromatic herbs, spices and vegetable seasoning (dried)	5-10
Frozen frog legs	1-10
Mechanically recovered poultry meat	4-10

3.8. Hungary

Foodstuffs	Absorbed dose (kGy)
Aromatic herbs, spices and vegetable seasoning (dried)	2 - 10

3.9. Netherlands

Foodstuffs	Absorbed dose (kGy)
Aromatic herbs, spices and vegetable seasoning (dried)	4-8
Chicken meat	3-5
Dried vegetables and fruits	2-8
Egg white	1
Frozen frog legs	4-8
Shrimps	3

3.10. Poland

Foodstuffs	Absorbed dose (kGy)
Aromatic herbs, spices and vegetable seasoning (dried)	5 - 10

4. RESULTS OF CHECKS CARRIED OUT AT THE PRODUCT MARKETING STAGE AND METHODS USED TO DETECT IRRADIATED FOODS

The following tables show the results of the checks carried out at the product marketing stage and the methods used to detect treatment with ionising radiation.

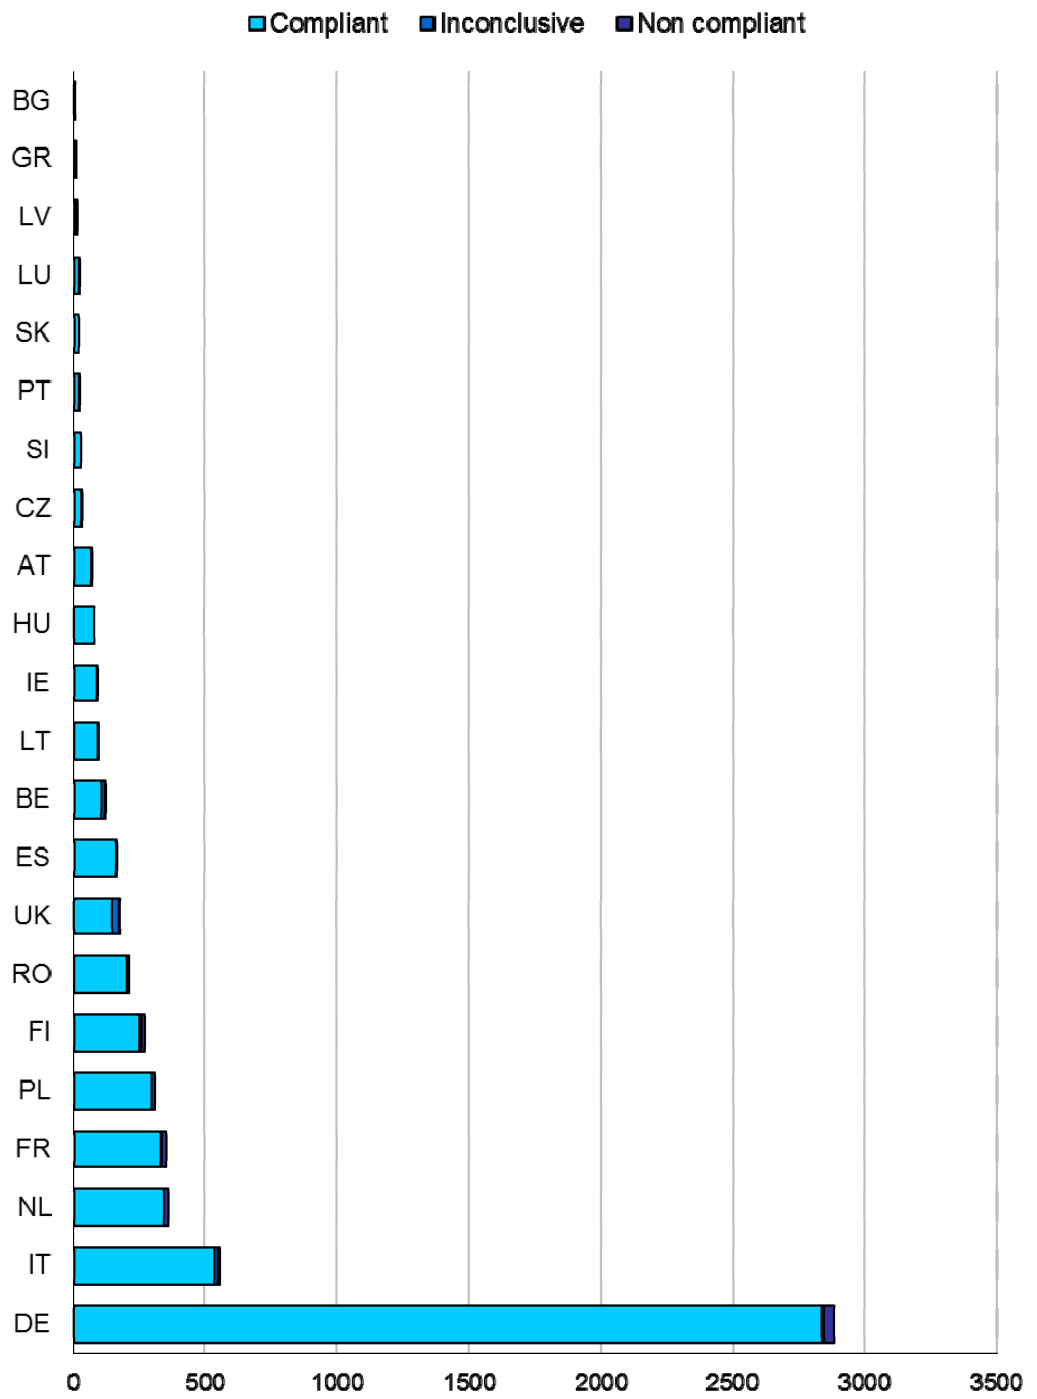

4.1. Summary for the EU

The following table summarises the samples analysed and the results obtained for the European Union as a whole:

Member State	Compliant	Inconclusive	Non-compliant	Total samples	% Versus EU total samples
BE	104	16	3	123	2,1%
BG	5	0	0	5	0,1%
CZ	26	1	3	30	0,5%

NDS: No data submitted; NCP: No check performed

The following histogram summarises the samples analysed and the results obtained per Member State:

4.2. Belgium. Number of Samples: 123

Foodstuff category	Foodstuffs analysed at product marketing stage	Number of Samples: 123			CEN method used
		Compliant	Inconclusive	Non-Compliant	
Cereals, seed, vegetables, fruit and their products	Fruit (dried)	5	0	0	EN 1788
	Mushrooms (fresh)	3	0	0	EN 1788
	Pasta products	7	6	1*	EN 1788
	Vegetables and vegetable products (dried)	4	0	0	EN 1788
Fish, crustaceans, shellfish and their products	Molluscs	20	0	0	EN 1788
	Shrimps	18	0	0	EN 1788
Herbs and spices	Herbs and spices (frozen)	16	2	0	EN 1788
	Tea	19	2	0	EN 1788
Meat and meat products	Frog legs	2	6	1*	EN 1788
Other	Food supplements	10	0	1**	EN 1788
Total:		104	16	3	
Total % of analysed samples:		85%	13%	2%	

* erroneously labelled

** irradiation not allowed

4.3. Bulgaria. Number of Samples: 5

Foodstuff category	Foodstuffs analysed at product marketing stage	Number of Samples: 5			CEN method used
		Compliant	Inconclusive	Non-Compliant	
Herbs and spices	Aromatic herbs, spices and vegetable seasoning (dried)	4	0	0	EN 1788
	Tea	1	0	0	EN 1788
Total:		5	0	0	
Total % of analysed samples:		100%	0%	0%	

4.4. Czech Republic: Number of Samples: 30

Foodstuff category	Foodstuffs analysed at product marketing stage	Number of Samples: 30			CEN method used
		Compliant	Inconclusive	Non-Compliant	
Cereals, seed, vegetables, fruit and their products	Garlic	3	0	0	EN 1788
	Instant noodles	1	0	0	EN 1788
	Mushrooms or mushrooms products (dried)	3	0	0	EN 1788
Herbs and spices	Aromatic herbs, spices and vegetable seasoning (dried)	8	1	0	EN 1788
	Herbal teas / Infusions	2	0	0	EN 1788
Other	Food supplements (yucca powder)*	4	0	1	EN 1788
	Soup*	5	0	2	EN 1788
Total:		26	1	3	
Total % of analysed samples:		87%	3%	10%	

* The samples were identified as being positive for irradiation. The irradiated products were not labelled. The indication of treatment was not given on the documents which accompany or refer to irradiated foodstuffs, so it was not possible to say if the product was irradiated in a facility approved by the EU.

4.5. Denmark

Due to limited financial resources, no checks were carried out at product marketing stage in 2013.

4.6. Germany: Number of Samples: 2886

Foodstuff category	Foodstuffs analysed at product marketing stage	Number of Samples: 2886			CEN method used
		Compliant	Inconclusive	Non-Compliant

*** irradiation not allowed

4.7. Estonia

Due to lack of laboratories carrying out analyses for ionising radiation, no checks were carried out at product marketing stage in Estonia in 2013. Furthermore, according to the Estonian Competent Authorities, there were no suspicion cases on potential non-compliant irradiated foodstuffs on their market.

4.8. Ireland: Number of Samples: 91

Foodstuff category	Foodstuffs analysed at product marketing stage	Number of Samples: 91			CEN method used

5. SUMMARY

The current report covers the period from 1 January to 31 December 2013. It contains a compilation of the information forwarded to the Commission by 26 Member States. Malta and Croatia did not submit data for 2013.

In 2013, 25 approved irradiation facilities were operational in 13 Member States, in accordance with Article 7(2) of Directive 1999/2/EC. One new irradiation facility has been approved in Spain. No approved irradiation facilities have been closed. Seven irradiation facilities did not irradiate any food during 2013.

A total quantity of 6876 tonnes of products were treated with ionising irradiation in EU Member States, 84% of which were irradiated mainly in three Member States: Belgium (49.4%), Netherlands (24.4%) and Spain (12.7%). The two main commodities irradiated are frog legs (46.4%) and dried aromatic herbs and spices (24.4%). There has been a decrease of 14% in the total quantity of products irradiated in the EU compared to the previous year 2012 (7972 tonnes).

26 Member States submitted information regarding the checks carried out at the product marketing stage. Four Member States did not perform any analytical checks in official controls and inspections in 2013.

A total of 5713 samples have been analysed by 22 Member States in 2013. Three Member States accounted for 66% of the samples (Germany 50.5%, Italy 9.7% and the Netherlands 6.3%; in 2012: Germany 52.4%, the Netherlands 7.2% and United Kingdom 6.2%). Germany remains the leader in terms of controlling food products at marketing stage. 5511 samples (96.5%) were compliant with the provisions of Directive 1999/2/EC, 130 samples (2.3%) were non-compliant, and 73 samples (1.5%) gave inconclusive results. The two main reasons for non-compliance of tested samples were similar to the previous years, namely, incorrect labelling and forbidden irradiation; non-compliance was also due to irradiation in facilities not approved by the EU. Reasons for non-compliance are given in each table reporting the tests carried out in each Member State.

6. CORRIGENDUM TO THE REPORT FROM THE COMMISSION TO THE EUROPEAN PARLIAMENT AND THE COUNCIL ON FOOD INGREDIENTS TREATED WITH IONISING RADIATION FOR THE YEAR 2012 (COM(2014) 52 FINAL)

By this corrigendum, section 4.10 Spain, is replaced by the following:
