Coverage and definitions

1. This Section applies to measures by the Parties concerning the entry into and temporary stay in their territories of business visitors for establishment purposes, intra-corporate transferees, and contractual services suppliers in accordance with paragraphs 5 and 6 of Article 39.

2. For the purposes of this Section:

- (a) “business visitors” for establishment purposes means natural persons, employed in a senior position by a juridical person of a Party, who are responsible for setting up an establishment in the territory of the other Party. They do not offer or provide services or engage in any other economic activities than required for establishment purposes. They do not receive remuneration from a source located within the host Party;
- (b) “intra-corporate transferees” means natural persons who have been employed by a juridical person of a Party or have been partners in it¹ for at least one year and who are temporarily transferred to an establishment that may be a subsidiary, branch or head company of the juridical person of a Party in the territory of the other Party.

The natural person concerned must belong to one of the categories as defined in the Parties’ respective GATS schedules, which for the purpose of this section shall apply to all economic activities;

¹ For greater clarity, the partners shall be part of the same juridical person.

- (c) “contractual service supplier” means a natural person employed by a juridical person of one Party which itself is not an agency for placement and supply services of personnel nor acting through such agencies and which has no establishment in the territory of the other Party and which has concluded a bona fide contract¹ to supply services with a final consumer in the latter Party, requiring the presence on a temporary basis of its employees in that Party, in order to fulfil the contract to provide services;
- (d) “qualifications” means diplomas, certificates and other evidence (of formal qualification) issued by an authority, designated pursuant to legislative, regulatory or administrative provisions, certifying successful completion of professional training.

ARTICLE 48

Intra-corporate transferees and business visitors

1. For services, the Parties reaffirm their respective obligations arising from their commitments under the GATS as regards the entry and temporary stay of intra-corporate transferees or business visitors. The reservations listed therein apply².

¹ The service contract shall comply with the laws, regulations and legal requirements of the Party where the contract is executed.

² For greater clarity, the reservations include also the reservations in the definitions of the categories of intra-corporate transferees and business visitors.

2. For economic activities other than services and subject to the reservations set out in Annex II, each Party:

- (a) shall allow investors engaged in production of goods on the territory of the other Party to transfer intra-corporate transferees, as defined in Article 47(2) (b) and business visitors for establishment purposes, as defined in Article 47(2) (a). - (b) shall not maintain or adopt measures defined as limitations on the total number of natural persons that an investor may transfer as intra-corporate transferees or business visitors in the form of numerical quotas or a requirement of an economic needs test and as discriminatory limitations.

ARTICLE 49

Contractual service suppliers

1. The Republic of Kazakhstan shall allow the supply of services in its territory by juridical persons of the European Union through the presence of natural persons who are citizens of the Member States of the European Union, subject to the following conditions:
 - (a) The natural persons entering the Republic of Kazakhstan must possess (i) a university degree or an advanced technical qualification demonstrating knowledge of an equivalent level and (ii) professional qualifications where this is required to exercise an activity in the sector concerned pursuant to the law, regulations or requirements of the Republic of Kazakhstan.

- (c) The natural persons entering the Republic of Kazakhstan must have been employed by the juridical person of the European Union for at least the year preceding the date of submission of an application for entry into the Republic of Kazakhstan. In addition, the natural persons must possess, at the date of submission of an application for entry into the Republic of Kazakhstan, at least five years professional experience in the sector of activity which is the subject of the contract.

- (d) The Republic of Kazakhstan may apply the economic needs test and an annual quota for work permits reserved for European Union contractual service suppliers gaining access to the services market of the Republic of Kazakhstan. The total number of European Union contractual service suppliers entering the Republic of Kazakhstan's services market shall not exceed 800 persons per year.

- (e) Upon expiration of a five-year period upon accession of the Republic of Kazakhstan to the WTO, the economic needs test shall not be applied¹. During the period when the Republic of Kazakhstan applies the economic needs test², the entry and temporary stay of natural persons within the Republic of Kazakhstan pursuant to the fulfillment of the contract shall be for a cumulative period of not more than four months in any 12-month period or for the duration of the contract, whichever is less. After the expiration of a five-year period upon accession to the WTO, the entry and temporary stay shall be for a cumulative period of not more than six months in any 12-month period or for the duration of the contract, whichever is less. The juridical persons of the European Union shall be responsible for timely departure of their employees from the territory of the Republic of Kazakhstan.

¹ All other requirements, laws and regulations regarding entry, stay and work shall continue to apply.

² For greater clarity, for the Republic of Kazakhstan, “economic needs test” means procedures undertaken by a juridical person of the Republic of Kazakhstan when attracting contractual service suppliers, whereby account must be taken of the admission of a foreign labour force based on the national labour market conditions. These are when after the publication of a vacancy announcement in the mass media and after a search for a competent person in the database of the competent authority, none of the applicants meets the requirements described in the vacancy. This should not take longer than one month. Only after this procedure the juridical person can finalise the procedure for hiring contractual service suppliers.

2. The Republic of Kazakhstan shall allow the supply of services into its territory by juridical persons of the European Union through the presence of natural persons if the service contract fulfills the following conditions:

(a) The contract to provide services:

(i) has been concluded directly between the juridical person of the European Union and the final consumer, which is a juridical person of the Republic of Kazakhstan; and

(ii) requires the temporary presence on the territory of the Republic of Kazakhstan of employees of that juridical person to provide the service; and

(iii) complies with the laws, regulations and requirements of the Republic of Kazakhstan.

(b) The contract to provide services has to be obtained in one of the following sectors of activity which are included and defined in the Republic of Kazakhstan's GATS schedule of commitments:

15. Related scientific and technical consulting services
16. Translation and interpretation services
17. Maintenance and repair of equipment, including transportation equipment, in the context of an after-sales services contract
18. Environmental services

(c) Access accorded under the provisions of this paragraph relates only to the service activity which is the subject of the contract; it does not confer entitlement to exercise the professional title in the territory of the Republic of Kazakhstan.

3. The European Union reaffirms its respective obligations arising from the commitments under the GATS as regards the entry and temporary stay of contractual service suppliers. The reservations listed therein apply.¹

ARTICLE 50

“Most favoured nation” treatment

1. Treatment accorded by the European Union to contractual service suppliers of the Republic of Kazakhstan shall be no less favourable than that accorded to contractual service suppliers of any third country.
2. Treatment granted under other agreements concluded by the European Union with a third country which have been notified under Article V of the GATS or which benefit from the coverage of the European Union GATS list of “most favoured nation” exemptions, shall be excluded from this provision. Treatment deriving from the harmonisation of regulations based on agreements concluded by the European Union providing for mutual recognition in accordance with Article VII of the GATS shall also be excluded from this provision.

¹ For greater clarity, reservations include also the reservations in the definitions of the categories.

3. In case the Republic of Kazakhstan grants more favorable treatment than that stipulated in this Agreement to contractual service suppliers of any other WTO member, except to countries of the Commonwealth of Independent States (CIS) and countries which are parties to the economic integration agreements with the Republic of Kazakhstan, this treatment shall be applied to contractual service suppliers of the European Union. SECTION 4

DOMESTIC REGULATION

 - (a) cross-border supply of services;
 - (b) establishment;
 - (c) the supply of a service through the presence of a natural person in the territory of the other Party in accordance with Section 3 of this Chapter.

2. The disciplines set out in Article 53 shall apply to all economic activities falling under the scope of this Chapter. For services, they shall apply to the extent of the relevant Party's specific commitments under the GATS¹. The disciplines do not apply to measures to the extent that they constitute limitations subject to scheduling under Article XVI or XVII of the GATS.

ARTICLE 53

Licensing and qualification

1. Each Party shall ensure that licensing and qualification procedures for the purpose of obtaining an authorisation to supply a service or to establish are reasonable, clear and relevant to the underlying policy objectives, taking into account the nature of the requirements to be met and the criteria to be assessed, and do not in themselves constitute a restriction on the supply of services or the establishment.

2. Where specific time periods for applications exist, an applicant shall be allowed a reasonable period for the submission of an application. The competent authority shall initiate the processing of an application without undue delay. Where possible, applications should be accepted in electronic format under the same conditions of authenticity as paper submissions.

¹ For the Republic of Kazakhstan the reference includes the Section on Services of the Protocol on the Accession of the Republic of Kazakhstan to the WTO.

3. Authenticated copies should be accepted, where possible, in place of original documents.
4. Each Party shall ensure that the processing of an application, including reaching a final decision is completed within a reasonable period specified in its legislation or, in any event without undue delay. Each Party shall endeavour to establish the normal timeframe for the processing of an application. Each Party shall ensure that a licence or an authorisation, once granted, enters into effect without undue delay in accordance with the terms and conditions specified therein.
5. Each Party shall ensure that licensing fees¹ are reasonable in terms of the costs incurred by the competent authority, and do not in themselves restrict the supply of the service or the establishment.
6. Where the competent authority considers that an application is incomplete or determines that it needs additional information, it shall, within a reasonable period of time:
 - (a) inform the applicant;
 - (b) to the extent practicable identify the information required; and
 - (c) to the extent practicable provide the opportunity to correct deficiencies.

¹ Licensing fees do not include fees for the use of natural resources, payments for auction, tendering or other non-discriminatory means of awarding concessions, or mandated contributions to universal service provision.

7. If the competent authority rejects an application, it shall inform the applicant without undue delay, and to the extent practicable, in writing. The competent authority should inform the applicant, upon request, of the reasons for rejection of the application and where possible, any deficiencies that have been identified. It should inform the applicant of the procedures for appeal against the decision in accordance with the relevant legislation. The competent authority should permit an applicant to submit a new application in accordance with the relevant authority's established procedures, except where the relevant authority limits the number of licences or qualification determinations.

8. Each Party shall ensure that the procedures used by, and the decisions of, the competent authority in the licensing or authorisation process are impartial with respect to all applicants. The competent authority should reach its decision in an independent manner and not be accountable to any services supplier or investor for which the licence or authorisation is required.

SECTION 5

SECTOR SPECIFIC PROVISIONS

ARTICLE 54

International maritime transport

1. This Section sets out the principles for the liberalisation of international maritime transport services. The provisions below are without prejudice to the rights and obligations deriving from each Party's GATS commitments.

2. For the purposes of this section, "international maritime transport" includes door to door and multi-modal transport operations, which is the carriage of goods using more than one mode of transport, involving a sea leg, under a single transport document, and to this effect including the right for international maritime transport suppliers to directly contract with providers of other modes of transport.

3. With respect to activities, as indicated in paragraph 4, undertaken by shipping agencies for the provision of services to international maritime transport, each Party shall permit to juridical persons of the other Party to establish subsidiaries or branches in its territory, under conditions of establishment and operation no less favourable than those accorded to its own subsidiaries or branches or to subsidiaries or branches of any third country, whichever are the better.

4. Such activities include, but are not limited to:

- (b) Each Party shall grant to ships operated by service suppliers of the other Party treatment no less favourable than that accorded to its own ships or those of any third country, whichever are the better with regard to, *inter alia*, access to ports, the use of infrastructure and services of the ports, and the use of maritime auxiliary services, as well as related fees and charges, customs facilities and the assignment of berths and facilities for loading and unloading.
6. In applying the principles set out in paragraph 5, the Parties shall:
- (a) not apply, as from entry into force of this agreement, any cargo sharing provisions of bilateral agreements between any Member State of the European Union and the Republic of Kazakhstan;
 - (b) not introduce cargo sharing clauses into future bilateral agreements with third countries, other than in those exceptional circumstances where liner shipping companies from one or other Party to this Agreement would not otherwise have an effective opportunity to ply for trade to and from the third country concerned;
 - (c) prohibit cargo sharing arrangements in future bilateral agreements concerning dry and liquid bulk trade;

(d) upon entry into force of this Agreement, abolish and abstain from introducing any unilateral measures and administrative, technical and other obstacles which could constitute a disguised restriction or have discriminatory effects on the free supply of services in international maritime transport.

7. Natural and juridical persons of the European Union providing international maritime transport services shall be free to provide international sea-river services in the inland waterways of the Republic of Kazakhstan and vice versa.

8. The Parties shall make available to international maritime transport suppliers of the other Party on reasonable and non-discriminatory terms and conditions the following services at port: pilotage, towing and tug assistance, provisioning, fuelling and watering, garbage collecting and ballast water disposal, port captain's services, navigation aids, shore based operational services essential to ship operations, including communications, water and electricity supplies, emergency repair facilities, anchorage, berth and berthing services.

9. In case the Republic of Kazakhstan grants more favourable treatment for maritime transport to any other WTO member, except for Caspian Sea Coastal States and CIS countries, then those terms shall be applied to the natural and juridical persons of the European Union.

ARTICLE 54 *bis*

Road, rail, inland waterways and air transport

With a view to assuring coordinated development of transport between the Parties adapted to their reciprocal commercial needs, the conditions of mutual market access in road, rail and inland waterways and, if applicable in air transport, may be dealt with by future possible specific agreements negotiated between the Parties after the entry of force of this Agreement.

SECTION 6

EXCEPTIONS

ARTICLE 55

General exceptions

1. Subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between countries where like conditions prevail, or a disguised restriction on establishment, including operations, or the cross-border supply of services, nothing in this Chapter shall be construed to prevent the adoption or enforcement by any Party of measures:

The Parties recall their obligation to ensure the adequate and effective implementation of the international agreements dealing with intellectual property to which they are parties including the WTO Agreement on Trade-Related Aspects of Intellectual Property Rights (the TRIPS Agreement). The provisions of this Chapter shall complement and further specify the rights and obligations between the Parties under the TRIPS Agreement and other international agreements in the field of intellectual property.
2. For the purposes of this Agreement, the term "intellectual property" refers at least to all categories of intellectual property that are the subject of Articles 65 (Protection granted) to 96 (Plant varieties).

ARTICLE 74

Exceptions and limitations

1. In accordance with the conventions and international agreements to which they are parties, each Party may provide for limitations or exceptions to the rights set out in Articles 66 to 70 only in certain special cases which do not conflict with a normal exploitation of the works or other subject matter and do not unreasonably prejudice the legitimate interests of the right holders.

2. Each Party shall provide that temporary acts of reproduction referred to in Articles 66 to 70, which are transient or incidental, which are an integral and essential part of a technological process and the sole purpose of which is to enable

The Parties shall also take such reasonable measures as may be available to them to achieve a high level of rationalisation and transparency with regard to the execution of the tasks of their respective collecting societies.

TRADEMARKS

ARTICLE 80

Exceptions to the rights conferred by a trademark

Each Party shall provide for limited exceptions to the rights conferred by a trademark, such as the fair use of descriptive terms, the use of geographical indications, or other limited exceptions, that take account of the legitimate interests of the owner of the trademark and of third parties.

GEOGRAPHICAL INDICATIONS

ARTICLE 81

Definition

Geographical indications are, for the purposes of this Agreement, indications which identify a good as originating in the territory of a Party, or a region or locality in that territory, where a given quality, reputation or other characteristic of the good is essentially attributable to its geographical origin.

ARTICLE 82

Principles of the Protection of Geographical Indications

1. Each Party shall ensure adequate and indefinite protection of geographical indications, by way of a *sui generis* system of protection and in accordance with domestic law as long as the geographical indication enjoys legal protection in the country of origin.

2. To this end, the Parties shall co-operate in the area of geographical indications on the basis of the provisions stipulated in this Article, which complement the minimum standards set in the relevant provisions of the TRIPS Agreement.

3. Each Party shall ensure that their geographical indications protection system is open to registration of geographical indications of the other Party. Each Party shall provide for a publicly available electronic database of registered geographical indications.

4. In respect of the geographical indications protected in each territory, each Party shall prohibit and prevent:

- (a) any direct or indirect commercial use of a registered name in respect of the products not covered by the registration in so far as
 - (i) those products are comparable to the products protected under that name, or
 - (ii) such use exploits the reputation of the protected name;
- (b) any misuse, imitation or evocation, even if the true origin of the product is indicated or if the protected name is translated, transcribed, transliterated or accompanied by an expression such as “style”, “type”, “method”, “as produced in”, “kind”, “imitation” or similar;

(c) any other false or misleading indication as to the provenance, origin, nature or essential qualities of the product, on the inner or outer packaging, advertising material or documents relating to the product concerned, and the packing of the product in a container liable to convey a false impression as to its origin; or

(d) any other practice liable to mislead the consumer as to the true origin of the good.

5. Each Party shall enforce the protection provided for in Articles 81 to 83 including upon request from an interested party by appropriate administrative enforcement in accordance with domestic law.

6. Each Party shall ensure that the protected geographical indications may be used by any operator marketing a good conforming to the corresponding specification.

7. Each Party shall ensure that the names that they have protected according to domestic law do not become generic.

8. The Parties shall have no obligation to register a geographical indication where, in the light of a reputed or well-known trademark, registration is liable to mislead consumers as to the true identity of the good.

9. Without prejudice to this Article, each Party shall protect geographical indications also where a prior trademark exists. A “prior trademark” shall mean a trademark the use of which corresponds to one of the situations referred to in paragraph 4, which has been applied for, registered or established by use, if that possibility is provided for by domestic law, before the date on which the application for registration of the geographical indication is filed with the competent authority of that Party. Such prior trademark may continue to be used and renewed notwithstanding the protection of the geographical indication, provided that no grounds for the trademark’s invalidity or revocation exist in the trademark law of the Party where it is registered or used.

ARTICLE 83

Negotiations

The Parties shall no later than seven years after the date on which this Title starts applying, commence negotiations aimed at an agreement on protection of geographical indications in their respective territories.

DESIGNS

ARTICLE 84

International agreements

The European Union reaffirms its commitment to the Geneva Act to the Hague Agreement Concerning the International Registration of Industrial Designs (1999). The Republic of Kazakhstan shall make reasonable efforts to accede to it.

ARTICLE 85

Requirements for protection of registered designs

1. Each Party shall provide for the protection of independently created designs that are new and are original. This protection shall be provided by registration and shall confer an exclusive right upon the holder of a registered design in accordance with domestic law. For the purpose of this Article, a Party may consider that a design having individual character is original.

2. A design applied to or incorporated in a product which constitutes a component part of a complex product shall only be considered to be new and to have individual character:

- (a) if the component part, once it has been incorporated into the complex product, remains visible during normal use of the latter, excluding maintenance, servicing or repair work, and
- (b) to the extent that those visible features of the component part fulfil in themselves the requirements as to novelty and individual character.

ARTICLE 86

Rights conferred by registration

The holder of a registered design shall have the exclusive right to use it and to prevent any third party not having the holder's consent from, at least, making, offering for sale, selling, importing, exporting, stocking or using a product bearing or embodying the protected design when such acts are undertaken for commercial purposes.

ARTICLE 87

Protection conferred to unregistered designs

The Republic of Kazakhstan shall no later than seven years after the date on which this Title starts applying effectively, introduce legal protection against copying unregistered designs, on the condition that the European Union has no later than two years before the end of this seven year period provided adequate training for representatives of the authorised bodies, organisations and judges.

ARTICLE 88

Term of protection

The duration of protection as from the date of the filing of the application shall amount to at least 10 years. Each Party may foresee that the holder may have the term of protection renewed for one or more periods of five years each, up to the maximum term of protection established according to domestic law.

ARTICLE 89

Exceptions

1. Each Party may provide limited exceptions to the protection of designs, provided that such exceptions do not unreasonably conflict with the normal exploitation of protected designs and do not unreasonably prejudice the legitimate interests of the owner of the protected design, taking account of the legitimate interests of third parties.
2. Design protection shall neither extend to features of appearance dictated solely by technical functions of the product nor to features of appearance of a product that are necessary to ensure interoperability with another product¹.
3. A design right shall not subsist in a design which is contrary to public policy or to accepted principles of morality.

¹ In the European Union this provision does not apply to modular products.

ARTICLE 90

Relationship to copyright

A design protected by a design right registered in a Party shall also be eligible for protection under the copyright law of that Party as from the date on which the design was created or fixed in any form. The extent to which, and the conditions under which, such a protection is conferred, including the level of originality required, shall be determined by each Party.

PATENTS

ARTICLE 91

International agreements

Each Party shall make all reasonable efforts to comply with Articles 1 to 16 of the Patent Law Treaty.

ARTICLE 92

Patents and public health

1. The Parties recognise the importance of the Declaration of the Ministerial Conference of the WTO on the TRIPS Agreement and Public Health, adopted on 14 November 2001. In interpreting and implementing the rights and obligations under this Chapter, Each Party ensures consistency with the Declaration.

2. Each Party shall respect the Decision of the WTO General Council of 30 August 2003 on Paragraph 6 of the declaration referred to in paragraph 1.

ARTICLE 93

Supplementary protection certificates

1. The Parties recognise that medicinal and plant protection products protected by a patent on their respective territory may be subject to an administrative authorisation procedure before being put on the market. They recognise that the period that elapses between the filing of the application for a patent and the first authorisation to place the product on the market, as defined for that purpose by the relevant domestic law, may shorten the period of effective protection under the patent.
2. Each Party shall provide for a further period of protection for a medicinal or plant protection product which is protected by a patent and which has been subject to an administrative authorisation procedure, that period being equal to the period referred to in second sentence of paragraph 1, reduced by a period of five years.
3. Notwithstanding paragraph 2, the duration of the further period of protection may not exceed five years.

ARTICLE 94

Protection of data submitted to obtain an authorisation to put a pharmaceutical product¹ on the market

1. Each Party shall implement a comprehensive system to guarantee the confidentiality, non-disclosure and non-reliance of data submitted for the purpose of obtaining an authorisation to put a pharmaceutical product on the market.
2. Each Party shall ensure that any information submitted to obtain an authorisation to put a pharmaceutical product, as referred to in Article 39(3) of the TRIPS Agreement, on the market remains undisclosed to third parties and benefits from a period of at least six years of protection against unfair commercial use starting from the date of the grant of a marketing authorisation in either of the Parties.

¹ The term “pharmaceutical product” in this Chapter refers, in the case of the European Union, to medicinal products as defined in Directive 2001/83/EC of the European Parliament and of the Council of 6 November 2001 on the Community code relating to medicinal products for human use.

To this end,

- (a) during a period of at least six years starting from the date of the grant of a marketing authorisation, no person or entity (public or private), other than the person or entity who submitted such undisclosed data, shall be allowed to rely directly or indirectly on such data, without the explicit consent of the person or entity who submitted this data, in support of an application for the authorisation to put a pharmaceutical product on the market;
- (b) during a period of at least six years starting from the date of the grant of a marketing authorisation, any subsequent application for the authorisation to put a pharmaceutical product on the market shall not be granted, unless the subsequent applicant submits his/her own data (or data used with authorisation of the holder of the first authorisation) meeting the same requirements as the first applicant. During this 6 year period, products registered without submission of such data shall be removed from the market until the requirements are met.

ARTICLE 95

Data protection on plant protection products and rules on avoidance of duplicative testing

1. The Parties shall determine safety and efficacy requirements before authorising the placing on the market of plant protection products.
2. Each Party shall recognise a temporary data protection right to the owner of a test or study report submitted for the first time to obtain a marketing authorisation for a plant protection product.

During the period of validity of the data protection right, the test or study report shall not be used for the benefit of any other person aiming to achieve a marketing authorisation for a plant protection product, except when the explicit consent of the owner is proved. This right shall be hereinafter referred to as “data protection”.

3. The test or study report shall fulfil the following conditions:
 - (a) be necessary for the authorisation or for an amendment of an authorisation in order to allow the use on other crops, and
 - (b) be certified as compliant with the principles of good laboratory practice or of good experimental practice.
4. The term of data protection for plant protection products in a Party shall be 10 years starting on the date of the first authorisation in that Party. Longer periods may be granted by each Party in order to encourage the authorisation of, for instance, low risk plant protection products or minor uses.
5. A test or study shall also be protected if it was necessary for the renewal or review of an authorisation.
6. Rules to avoid duplicative testing on vertebrate animals will be laid down by the Parties. Any applicant intending to perform tests and studies involving vertebrate animals shall take the necessary measures to verify that those tests and studies have not already been performed or initiated.

7. The prospective applicant and the holder or holders of the relevant authorisations shall make every effort to ensure that they share tests and studies involving vertebrate animals. The costs of sharing the test and study reports shall be determined in a fair, transparent and non-discriminatory way. The prospective applicant shall only be required to share in the costs of information he is required to submit to meet the authorisation requirements.

8. Where the prospective applicant and the holder or holders of the relevant authorisations of plant protection products cannot reach agreement on the sharing of test and study reports involving vertebrate animals, the prospective applicant shall inform the competent authority of the Party concerned.

9. The failure to reach agreement shall not prevent the competent authority of the Party concerned from using the test and study reports involving vertebrate animals for the purpose of the application of the prospective applicant.

The holder or holders of the relevant authorisation shall have a claim on the prospective applicant for a fair share of the costs incurred by him. The Party may direct the parties involved to resolve the matter by formal and binding arbitration administered under domestic law.

ARTICLE 96

Plant varieties

The European Union reaffirms its commitment to the International Convention for the Protection of New Varieties of Plants (UPOV), to which the Republic of Kazakhstan shall make reasonable efforts to accede.

SECTION 3

ENFORCEMENT OF INTELLECTUAL PROPERTY RIGHTS

ARTICLE 97

General obligations

1. The Parties reaffirm their commitments under the TRIPS Agreement, in particular Part III thereof, and shall provide for the complementary measures, procedures and remedies set out in this sub-section, which are necessary to ensure the enforcement of the intellectual property rights¹.
2. Those measures, procedures and remedies shall be fair and equitable, and shall not be unnecessarily complicated or costly, or entail unreasonable time-limits or unwarranted delays. They shall also be effective, proportionate and dissuasive and shall be applied in such a manner as to avoid the creation of barriers to legitimate trade and to provide for safeguards against their abuse.

¹ For the purposes of Articles 98 to 110, the term “intellectual property rights” shall include at least the following rights: copyright; rights related to copyright; *sui generis* right of a database maker; rights of the creator of the topographies of a semiconductor product; trademark rights; design rights; patent rights, including rights derived from supplementary protection certificates; geographical indications; utility model rights; plant variety rights; trade names in so far as these are protected as exclusive rights by domestic law.

ARTICLE 98

Entitled applicants

Each Party shall recognise as persons entitled to seek application of the measures, procedures and remedies referred to in this sub-section and in Part III of the TRIPS Agreement:

- (a) the holders of intellectual property rights in accordance with the provisions of domestic law,
- (b) all other persons authorised to use those rights, in particular licensees, in so far as permitted by and in accordance with the provisions of domestic law,

- (d) professional defence bodies or other persons which are recognised as having a right to represent holders of intellectual property rights, in so far as permitted by and in accordance with the provisions of domestic law.

ARTICLE 99

Evidence

1. The judicial authorities of each Party shall have the authority, where a party has presented reasonably available evidence sufficient to support its claims and has in substantiating its claims, specified evidence which lies in the control of the opposing party, to order that this evidence be produced by the opposing party, subject to conditions which ensure the protection of confidential information.
2. Under the same conditions, each Party shall take such measures as are necessary, in the case of an infringement of an intellectual property right committed on a commercial scale, to enable the competent judicial authorities to order, where appropriate and following an application, the communication of banking, financial or commercial documents under the control of the opposing party, subject to the protection of confidential information.

ARTICLE 100

Measures for preserving evidence

1. Each Party shall ensure that even before the commencement of proceedings on the merits of the case, the competent judicial authorities may, on application by a right holder who has presented reasonably available evidence to support their claims that their intellectual property right has been infringed or is about to be infringed, order prompt and effective provisional measures to preserve relevant evidence in respect of the alleged infringement, subject to the protection of confidential information.
2. Such measures may include the detailed description, with or without the taking of samples, or the physical seizure of the alleged infringing goods, and, in appropriate cases, the materials and implements used in the production and/or distribution of those goods and the documents relating thereto. Those measures shall be taken, if necessary without the other party being heard, in particular where any delay is likely to cause irreparable harm to the right holder or where there is a demonstrable risk of evidence being destroyed.

ARTICLE 101

Right of information

1. Each Party shall ensure that, in the context of proceedings concerning an infringement of an intellectual property right and in response to a justified and proportionate request of the claimant, the competent judicial authorities may order that information on the origin and distribution networks of the goods or services which infringe an intellectual property right be provided by the infringer and/or any other person who:

- (a) was found in possession of the infringing goods on a commercial scale;
- (b) was found to be using the infringing services on a commercial scale;
- (c) was found to be providing on a commercial scale services used in infringing activities; or
- (d) was indicated by the person referred to in subparagraph (a), (b) or (c) of this paragraph as being involved in the production, manufacture or distribution of the goods or the provision of the services.

2. The information referred to in paragraph 1 shall comprise:
 - (a) the names and addresses of the producers, manufacturers, distributors, suppliers and other previous holders of the goods or services, as well as the intended wholesalers and retailers;
 - (b) information on the quantities produced, manufactured, delivered, received or ordered, as well as the price obtained for the goods or services in question.
3. Paragraphs 1 and 2 shall apply without prejudice to other statutory provisions which:
 - (a) grant the right holder rights to receive fuller information;
 - (b) govern the use in civil or criminal proceedings of the information communicated pursuant to this Article;
 - (c) govern responsibility for misuse of the right of information;

- (d) afford an opportunity for refusing to provide information which would force the person referred to in paragraph 1 to admit to their own participation or that of their close relatives in an infringement of an intellectual property right; or
- (e) govern the protection of confidentiality of information sources or the processing of personal data.

ARTICLE 102

Provisional and precautionary measures

1. Each Party shall ensure that the judicial authorities may, at the request of the applicant, issue against the alleged infringer an interlocutory injunction intended to prevent any imminent infringement of an intellectual property right, or to forbid, on a provisional basis and subject, where appropriate, to a recurring penalty payment where provided for by domestic law, the continuation of the alleged infringements of that right, or to make such continuation subject to the lodging of guarantees intended to ensure the compensation of the right holder. An interlocutory injunction may also be issued, under the same conditions and in accordance with domestic law, against an intermediary whose services are being used by a third party to infringe an intellectual property right.

2. An interlocutory injunction may also be issued to order the seizure or delivery of goods suspected of infringing an intellectual property right so as to prevent their entry into or movement within the channels of commerce.

3. In the case of an infringement committed on a commercial scale, each Party shall ensure that, if the applicant demonstrates circumstances likely to endanger the recovery of damages, the judicial authorities may in accordance with domestic law order the precautionary seizure or arrest of the movable and/or immovable property of the alleged infringer, including the blocking of their bank accounts and other assets. To that end, the judicial authorities may order the provision of bank, financial or commercial documents, or appropriate access to the relevant information.

ARTICLE 103

Corrective measures

1. Each Party shall ensure that the competent judicial authorities may order, at the request of the applicant and without prejudice to any damages due to the right holder by reason of the infringement, and without compensation of any sort, the recall, definitive removal from the channels of commerce or the destruction of goods that they have found to be infringing an intellectual property right. If appropriate, the competent judicial authorities may also order the destruction of materials and implements predominantly used in the creation or manufacture of those goods.
2. The judicial authorities of each Party shall have the power to order that those measures shall be carried out at the expense of the infringer, unless particular reasons are invoked for not doing so.

ARTICLE 104

Injunctions

Each Party shall ensure that, where a judicial decision is taken finding an infringement of an intellectual property right, the judicial authorities may issue against the infringer an injunction aimed at prohibiting the continuation of the infringement. Where provided for by domestic law, non-compliance with an injunction shall, where appropriate, be subject to a recurring penalty payment, with a view to ensuring compliance. Each Party shall also ensure that right holders are in a position to apply for an injunction against intermediaries whose services are used by a third party to infringe an intellectual property right.

ARTICLE 105

Alternative measures

Each Party, in accordance with domestic law, may provide that, in appropriate cases and at the request of the person liable to be subject to the measures provided for in Article 103 and/or Article 104, the competent judicial authorities may order pecuniary compensation to be paid to the injured party instead of applying the measures provided for in Article 103 and/or Article 104 if that person acted unintentionally and without negligence, if execution of the measures in question would cause him disproportionate harm and if pecuniary compensation to the injured party appears reasonably satisfactory.

ARTICLE 106

Damages

1. Each Party shall ensure that when the judicial authorities set the damages:
 - (a) they shall take into account all appropriate aspects, such as the negative economic consequences, including lost profits, which the injured party has suffered, any unfair profits made by the infringer and, in appropriate cases, elements other than economic factors, including the moral prejudice caused to the right holder by the infringement ; or
 - (b) as an alternative to subparagraph (a) of this paragraph, they may, in appropriate cases, set the damages as a lump sum on the basis of elements such as at least the amount of royalties or fees which would have been due if the infringer had requested authorisation to use the intellectual property right in question.

2. Where the infringer did not knowingly, or with reasonable grounds to know, engages in the infringing activity, each Party may lay down that the judicial authorities may order the recovery of profits or the payment of damages to the injured party which may be pre-established.

ARTICLE 107

Legal costs

3. A Party, including its procuring entities, shall not adopt or apply any registration system or qualification procedure with the purpose or the effect of creating unnecessary obstacles to the participation of suppliers of the other Party in its procurement.

Selective Tendering

4. Where a procuring entity intends to use selective tendering, the entity shall:

(a) include in the notice of intended procurement at least the information specified in Article 124(2), subparagraphs (a), (b), (f), (g), (j) and (k) and invite suppliers to submit a request for participation; and

2. In prescribing the technical specifications for the goods or services being procured, a procuring entity shall, where appropriate:

- (a) set out the technical specification in terms of performance and functional requirements, rather than design or descriptive characteristics; and
- (b) base the technical specification on international standards, where such exist; otherwise, on national technical regulations, recognised national standards or building codes.

3. Where design or descriptive characteristics are used in the technical specifications, a procuring entity should indicate, where appropriate, that it will consider tenders of equivalent goods or services that demonstrably fulfil the requirements of the procurement by including words such as “or equivalent” in the tender documentation.

4. A procuring entity shall not prescribe technical specifications that require or refer to a particular trademark or trade name, patent, copyright, design, type, specific origin, producer or supplier, unless there is no other sufficiently precise or intelligible way of describing the procurement requirements and provided that, in such cases, the entity includes words such as “or equivalent” in the tender documentation.

5. A procuring entity shall not seek or accept, in a manner that would have the effect of precluding competition, advice that may be used in the preparation or adoption of any technical specification for a specific procurement from a person that may have a commercial interest in the procurement.

6. For greater certainty, a Party, including its procuring entities, may, in accordance with this Article, prepare, adopt or apply technical specifications to promote the conservation of natural resources or protect the environment.

Tender Documentation

7. A procuring entity shall make available to suppliers tender documentation that includes all information necessary to permit suppliers to prepare and submit responsive tenders. Unless already provided in the notice of intended procurement, such documentation shall include a complete description of:

- (a) the procurement, including the nature and the quantity of the goods or services to be procured or, where the quantity is not known, the estimated quantity and any requirements to be fulfilled, including any technical specifications, conformity assessment certification, plans, drawings or instructional materials;
- (b) any conditions for participation of suppliers, including a list of information and documents that suppliers are required to submit in connection with the conditions for participation;
- (c) all evaluation criteria the entity will apply in the awarding of the contract, and, except where price is the sole criterion, the relative importance of such criteria;
- (d) where the procuring entity will conduct the procurement by electronic means, any authentication and encryption requirements or other requirements related to the submission of information by electronic means;

- (e) where the procuring entity will hold an electronic auction, the rules, including identification of the elements of the tender related to the evaluation criteria, on which the auction will be conducted;
- (f) where there will be a public opening of tenders, the date, time and place for the opening and, where appropriate, the persons authorised to be present;
- (g) any other terms or conditions, including terms of payment and any limitation on the means by which tenders may be submitted, such as whether on paper or by electronic means; and
- (h) any dates for the delivery of goods or the supply of services.

8. In establishing any date for the delivery of goods or the supply of services being procured, a procuring entity shall take into account such factors as the complexity of the procurement, the extent of subcontracting anticipated and the realistic time required for production, de-stocking and transport of goods from the point of supply or for supply of services.

9. The evaluation criteria set out in the notice of intended procurement or tender documentation may include, among others, price and other cost factors, quality, technical merit, environmental characteristics and terms of delivery.

10. A procuring entity shall promptly:
 - (a) make available tender documentation to ensure that interested suppliers have sufficient time to submit responsive tenders;
 - (b) provide, on request, the tender documentation to any interested supplier; and
 - (c) reply to any reasonable request for relevant information by any interested or participating supplier, provided that such information does not give that supplier an advantage over other suppliers.

Modifications

11. Where, prior to the award of a contract, a procuring entity modifies the criteria or requirements set out in the notice of intended procurement or tender documentation provided to participating suppliers, or amends or reissues a notice or tender documentation, it shall transmit in writing all such modifications or amended or re-issued notice or tender documentation:
 - (a) to all suppliers that are participating at the time of the modification, amendment or re-issuance, where such suppliers are known to the entity, and in all other cases, in the same manner as the original information was made available; and

- (b) in adequate time to allow such suppliers to modify and re-submit amended tenders, as appropriate.

ARTICLE 128

Time periods

General

1. A procuring entity shall, consistent with its own reasonable needs, provide sufficient time for suppliers to prepare and submit requests for participation and responsive tenders, taking into account such factors as:

- (a) the nature and complexity of the procurement;
- (b) the extent of subcontracting anticipated; and
- (c) the time necessary for transmitting tenders by non-electronic means from foreign as well as domestic points where electronic means are not used.

Such time periods, including any extension of the time periods, shall be the same for all interested or participating suppliers.

Deadlines

2. A procuring entity that uses selective tendering shall establish that the final date for the submission of requests for participation shall not, in principle, be less than 25 days from the date of publication of the notice of intended procurement. Where a state of urgency duly substantiated by the procuring entity renders this time-period impracticable, the time-period may be reduced to not less than 10 days.

3. Except as provided for in paragraphs 4, 5, 7 and 8 a procuring entity shall establish that the final date for the submission of tenders shall not be less than 40 days from the date on which:

- (a) in the case of open tendering, the notice of intended procurement is published; or
- (b) in the case of selective tendering, the entity notifies suppliers that they will be invited to submit tenders, whether or not it uses a multi-use list.

4. A procuring entity may reduce the time-period for tendering established in accordance with paragraph 3 to not less than 10 days where:

- (a) the procuring entity has published a notice of planned procurement as described in Article 124(4) at least 40 days and not more than 12 months in advance of the publication of the notice of intended procurement, and the notice of planned procurement contains:
 - (i) a description of the procurement;
 - (ii) the approximate final dates for the submission of tenders or requests for participation;
 - (iii) a statement that interested suppliers should express their interest in the procurement to the procuring entity;
 - (iv) the address from which documents relating to the procurement may be obtained; and
 - (v) as much of the information that is required for the notice of intended procurement under Article 124(2), as is available;

- (b) the procuring entity, for procurements of a recurring nature, indicates in an initial notice of intended procurement that subsequent notices will provide time periods for tendering based on this paragraph; or
- (c) a state of urgency duly substantiated by the procuring entity renders the time-period for tendering established in accordance with paragraph 3 impracticable.

5. A procuring entity may reduce the time-period for tendering established in accordance with paragraph 3 by seven days for each one of the following circumstances:

- (a) the notice of intended procurement is published by electronic means;
- (b) all the tender documentation is made available by electronic means from the date of the publication of the notice of intended procurement; and
- (c) the entity accepts tenders by electronic means.

6. The use of paragraph 5, in conjunction with paragraph 4, shall in no case result in the reduction of the time-period for tendering established in accordance with paragraph 3 to less than 7 days from the date on which the notice of intended procurement is published.

7. Notwithstanding any other provision in this Article, where a procuring entity purchases commercial goods or services, or any combination thereof, it may reduce the time-period for tendering established in accordance with paragraph 3 to not less than 13 days, provided that it publishes by electronic means, at the same time, both the notice of intended procurement and the tender documentation. In addition, where the entity accepts tenders for commercial goods or services by electronic means, it may reduce the time-period established in accordance with paragraph 3 to not less than 7 days.

8. Where a procuring entity covered under Part 3 of Annex III has selected all or a limited number of qualified suppliers, the time-period for tendering may be fixed by mutual agreement between the procuring entity and the selected suppliers. In the absence of agreement, the period shall not be less than 7 days.

ARTICLE 129

Negotiation

1. A Party may provide for its procuring entities to conduct negotiations:
 - (a) where the entity has indicated its intent to conduct negotiations in the notice of intended procurement required under Article 124(2); or
 - (b) where it appears from the evaluation that no tender is obviously the most advantageous in terms of the specific evaluation criteria set out in the notice of intended procurement or tender documentation.
2. A procuring entity shall:
 - (a) ensure that any elimination of suppliers participating in negotiations is carried out in accordance with the evaluation criteria set out in the notice of intended procurement or tender documentation; and
 - (b) where negotiations are concluded, provide a common deadline for the remaining participating suppliers to submit any new or revised tenders.

ARTICLE 130

Limited tendering

1. Provided that it does not use this provision for the purpose of avoiding competition among suppliers or in a manner that discriminates against suppliers of the other Party or protects domestic suppliers, a procuring entity may use limited tendering and may choose not to apply Articles 124, 125, 126, 127 (paragraphs 7 to 11), 128, 129, 131 and 132 only under any of the following circumstances:

- (a) provided that the requirements of the tender documentation are not substantially modified, where:
 - (i) no tenders were submitted or no suppliers requested participation;
 - (ii) no tenders that conform to the essential requirements of the tender documentation were submitted;
 - (iii) no suppliers satisfied the conditions for participation; or
 - (iv) the tenders submitted have been collusive;

- (b) where the goods or services can be supplied only by a particular supplier and no reasonable alternative or substitute goods or services exist for any of the following reasons:
 - (i) the requirement is for a work of art;
 - (ii) the protection of patents, copyrights or other exclusive rights; or
 - (iii) due to an absence of competition for technical reasons;
- (c) for additional deliveries by the original supplier of goods or services that were not included in the initial procurement where a change of supplier for such additional goods or services:
 - (i) cannot be made for economic or technical reasons such as requirements of inter-changeability or interoperability with existing equipment, software, services or installations procured under the initial procurement; and
 - (ii) would cause significant inconvenience or substantial duplication of costs for the procuring entity;

- (d) insofar as is strictly necessary where, for reasons of extreme urgency brought about by events unforeseeable by the procuring entity, the goods or services could not be obtained in time using open tendering or selective tendering;
- (e) for goods purchased on a commodity market;
- (f) where a procuring entity procures a prototype or a first good or service that is developed at its request in the course of, and for, a particular contract for research, experiment, study or original development. Original development of a first good or service may include limited production or supply in order to incorporate the results of field testing and to demonstrate that the good or service is suitable for production or supply in quantity to acceptable quality standards, but does not include quantity production or supply to establish commercial viability or to recover research and development costs;
- (g) for purchases made under exceptionally advantageous conditions that only arise in the very short term in the case of unusual disposals such as those arising from liquidation, receivership or bankruptcy, but not for routine purchases from regular suppliers; or

- (h) where a contract is awarded to a winner of a design contest provided that:
 - (i) the contest has been organised in a manner that is consistent with the principles of this Chapter, in particular relating to the publication of a notice of intended procurement;
and
 - (ii) the participants are judged by an independent jury with a view to a design contract being awarded to a winner.

2. A procuring entity shall prepare a report in writing on each contract awarded under paragraph 1. The report shall include the name of the procuring entity, the value and kind of goods or services procured and a statement indicating the circumstances and conditions described in paragraph 1 that justified the use of limited tendering.

ARTICLE 131

Electronic auctions

1. Procuring entities may use electronic auctions.

2. In open, limited or negotiated procedures, a procuring entity may decide that the award of a contract shall be preceded by an electronic auction when the contract specifications can be established with precision.

The electronic auction shall be based:

- either solely on prices when the contract is awarded to the lowest price,
- or on prices and/or on the new values of the features of the tenders indicated in the specification when the contract is awarded to the most advantageous tender.

3. A procuring entity which decides to hold an electronic auction shall state that fact in the notice of intended procurement.

The specifications shall include, *inter alia*, the following details:

- (a) the features, the values for which will be the subject of electronic auction, provided that such features are quantifiable and can be expressed in figures or percentages;
- (b) any limits on the values which may be submitted, as they result from the specifications relating to the subject of the procurement;

- (c) the information which will be made available to tenderers in the course of the electronic auction and, where appropriate, when it will be made available to them;
- (d) the relevant information concerning the electronic auction process;
- (e) the conditions under which the tenderers will be able to bid and, in particular, the minimum differences which will, where appropriate, be required when bidding;
- (f) the relevant information concerning the electronic equipment used and the arrangements and technical specifications for connection.

4. Before proceeding with an electronic auction, a procuring entity shall make a full initial evaluation of the tenders in accordance with the award criterion or criteria set and with the weighting fixed for them. All tenderers who have submitted admissible tenders shall be invited simultaneously by electronic means to submit new prices and/or new values; the invitation shall contain all relevant information concerning individual connection to the electronic equipment being used and shall state the date and time of the start of the electronic auction. The electronic auction may take place in a number of successive phases. The electronic auction may not start sooner than two working days after the date on which invitations are sent out.

5. When the contract is to be awarded on the basis of the most advantageous tender, the invitation shall be accompanied by the outcome of a full evaluation of the relevant tenderer. The invitation shall also state the mathematical formula to be used in the electronic auction to determine automatic re-rankings on the basis of the new prices and/or new values submitted. That formula shall incorporate the weighting of all the criteria fixed to determine the most advantageous tender, as indicated in the contract notice or in the specifications; for that purpose, any ranges shall, however, be reduced beforehand to a specified value.

6. Throughout each phase of an electronic auction the contracting authorities shall instantaneously communicate to all tenderers at least sufficient information to enable them to ascertain their relative rankings at any moment. They may also communicate other information concerning other prices or values submitted, provided that that is stated in the specifications. They may also at any time announce the number of participants in that phase of the auction. In no case, however, may they disclose the identities of the tenderers during any phase of an electronic auction.

7. A procuring entity shall close an electronic auction in one or more of the following manners:

(a) in the invitation to take part in the auction it shall indicate the date and time fixed in advance;

- (b) when it receives no more new prices or new values which meet the requirements concerning minimum differences. In that event, the procuring entity shall state in the invitation to take part in the auction the time which it will allow to elapse after receiving the last submission before it closes the electronic auction;
- (c) when the number of phases in the auction, fixed in the invitation to take part in the auction, has been completed.

8. When the procuring entity has decided to close an electronic auction in accordance with subparagraph (c) of paragraph 7, possibly in combination with the arrangements laid down in subparagraph (b) of paragraph 7, the invitation to take part in the auction shall indicate the timetable for each phase of the auction.

9. After closing an electronic auction a procuring entity shall award the contract in accordance with Article 132 on the basis of the results of the electronic auction.

10. Procuring entities may not have improper recourse to electronic auctions nor may they use them in such a way as to prevent, restrict or distort competition or to change the subject matter of the contract, as put up for tender in the published notice of intended procurement and defined in the specification.

ARTICLE 132

Treatment of tenders and awarding of contracts

Treatment of Tenders

1. A procuring entity shall receive, open and treat all tenders under procedures that guarantee the fairness and impartiality of the procurement process, and the confidentiality of tenders.
2. A procuring entity shall not penalise any supplier whose tender is received after the time specified for receiving tenders if the delay is due solely to mishandling on the part of the procuring entity.
3. Where a procuring entity provides a supplier with an opportunity to correct unintentional errors of form between the opening of tenders and the awarding of the contract, the procuring entity shall provide the same opportunity to all participating suppliers.

Awarding of Contracts

4. To be considered for an award, a tender shall be submitted in writing and shall, at the time of opening, comply with the essential requirements set out in the notices and tender documentation and be from a supplier that satisfies the conditions for participation.

5. Unless a procuring entity determines that it is not in the public interest to award a contract, the entity shall award the contract to the supplier that the entity has determined to be capable of fulfilling the terms of the contract and that, based solely on the evaluation criteria specified in the notices and tender documentation, has submitted:
 - (a) the most advantageous tender; or

 - (b) where price is the sole criterion, the lowest price.

6. Where a procuring entity receives a tender with a price that is abnormally lower than the prices in other tenders submitted, it may verify with the supplier that it satisfies the conditions for participation and is capable of fulfilling the terms of the contract.

7. A procuring entity shall not use options, cancel a procurement or modify awarded contracts in a manner that circumvents the obligations under this Chapter.

ARTICLE 133

Transparency of procurement information

Information Provided to Suppliers

1. A procuring entity shall promptly inform participating suppliers of the entity's contract award decisions and, at the request of a supplier, shall do so in writing. Subject to paragraphs 2 and 3 of Article 134, a procuring entity shall, on request, provide an unsuccessful supplier with an explanation of the reasons why the entity did not select its tender and the relative advantages of the successful supplier's tender.

Publication of Award Information

2. Not later than 72 days after the award of each contract covered by this Chapter, a procuring entity shall publish a notice in the appropriate paper or electronic medium listed in Part 2 of Annex IV. Where the entity publishes the notice only in an electronic medium, the information shall remain readily accessible for a reasonable period of time. The notice shall include at least the following information:

(a) a description of the goods or services procured;

- (b) the name and address of the procuring entity;
- (c) the name and address of the successful supplier;
- (d) the value of the successful tender or the highest and lowest offers taken into account in the award of the contract;
- (e) the date of award; and
- (f) the type of procurement method used, and in cases where limited tendering was used in accordance with Article 130, a description of the circumstances justifying the use of limited tendering.

Maintenance of Documentation, Reports and Electronic Traceability

3. Each procuring entity shall, for a period of at least three years from the date it awards a contract, maintain:
 - (a) the documentation and reports of tendering procedures and contract awards relating to covered procurement, including the reports required under Article 130; and
 - (b) data that ensure the appropriate traceability of the conduct of covered procurement by electronic means.

ARTICLE 134

Disclosure of information

Provision of Information to Parties

1. On request of the other Party, a Party shall provide promptly any information necessary to determine whether a procurement was conducted fairly, impartially and in accordance with this Chapter, including information on the characteristics and relative advantages of the successful tender. In cases where release of the information would prejudice competition in future tenders, the Party that receives the information shall not disclose it to any supplier, except after consulting with, and obtaining the agreement of, the Party that provided the information.

Non-Disclosure of Information

2. Notwithstanding any other provision of this Chapter, a Party, including its procuring entities, shall not provide to any particular supplier information that might prejudice fair competition between suppliers.

3. Nothing in this Chapter shall be construed to require a Party, including its procuring entities, authorities and review bodies, to disclose confidential information where disclosure:

- (a) would impede law enforcement;
- (b) might prejudice fair competition between suppliers;
- (c) would prejudice the legitimate commercial interests of particular persons, including the protection of intellectual property; or
- (d) would otherwise be contrary to the public interest.

ARTICLE 135

Domestic review procedures

1. Each Party shall provide a timely, effective, transparent and non-discriminatory administrative or judicial review procedure through which a supplier may, in the context of a covered procurement, in which that supplier has, or has had, an interest, challenge:
 - (a) a breach of this Chapter; or
 - (b) where the supplier does not have a right to challenge directly a breach of the Chapter under the domestic law of a Party, a failure to comply with a Party's measures implementing this Chapter.
2. The procedural rules for all challenges pursuant to paragraph 1 shall be in writing and made generally available.

3. In the event of a complaint by a supplier, arising in the context of covered procurement in which the supplier has, or has had, an interest, that there has been a breach or a failure as referred to in paragraph 1, the Party of the procuring entity conducting the procurement shall encourage the entity and the supplier to seek resolution of the complaint through consultations. The entity shall accord impartial and timely consideration to any such complaint in a manner that is not prejudicial to the supplier's participation in ongoing or future procurement or its right to seek corrective measures under the administrative or judicial review procedure.
4. Each supplier shall be allowed a sufficient period of time to prepare and submit a challenge, which in no case shall be less than 10 days from the time when the basis of the challenge became known or reasonably should have become known to the supplier.
5. Each Party shall establish or designate at least one impartial administrative or judicial authority that is independent of its procuring entities to receive and review a challenge by a supplier arising in the context of a covered procurement.
6. Where a body other than an authority referred to in paragraph 5 initially reviews a challenge, the Party shall ensure that the supplier may appeal the initial decision to an impartial administrative or judicial authority that is independent of the procuring entity whose procurement is the subject of the challenge.

7. Each Party shall ensure that a review body that is not a court shall have its decision subject to judicial review or have procedures that provide that:

- (a) the procuring entity shall respond in writing to the challenge and disclose all relevant documents to the review body;
- (b) the participants to the proceedings (hereinafter referred to as “participants”) shall have the right to be heard prior to a decision of the review body being made on the challenge;
- (c) the participants shall have the right to be represented and accompanied;
- (d) the participants shall have access to all proceedings;
- (e) the participants shall have the right to request that the proceedings take place in public and that witnesses may be presented; and
- (f) the review body shall make its decisions or recommendations in a timely fashion, in writing, and shall include an explanation of the basis for each decision or recommendation.

8. Each Party shall adopt or maintain procedures that provide for:

- (a) rapid interim measures to preserve the supplier's opportunity to participate in the procurement; and
- (b) where a review body has determined that there has been a breach or a failure as referred to in paragraph 1, corrective action or compensation for the loss or damages suffered, which may be limited to either the costs for the preparation of the tender or the costs relating to the challenge, or both.

9. The rapid interim measures referred to in subparagraph (a) of paragraph 8 may result in suspension of the procurement process. The procedures referred to in paragraph 8 may provide that overriding adverse consequences for the interests concerned, including the public interest, may be taken into account when deciding whether such measures should be applied. Just cause for not acting shall be provided in writing.

ARTICLE 136

Modifications and Rectifications to Coverage

1. A Party may propose a modification or rectification of the elements in Annex III which relate to that Party.

Modifications

2. When a Party proposes a modification, that Party shall:
 - (a) notify the other Party in writing; and
 - (b) include in the notification a proposal for appropriate compensatory adjustments to the other Party to maintain a level of coverage comparable to that existing prior to the modification.

3. Notwithstanding subparagraph (b) of paragraph 2, a Party need not provide compensatory adjustments if:

- (a) the modification in question is negligible in its effect; or
- (b) the modification covers an entity over which the Party has effectively eliminated its control or influence.

4. The other Party shall be deemed to have accepted the modification, including for the purposes of Chapter 14 (Dispute Settlement) of this Title, unless it objects in writing within 45 days of receipt of the notification referred to in subparagraph (a) of paragraph 2 that:

- (a) an adjustment proposed under subparagraph (b) of paragraph 2 is adequate to maintain a comparable level of mutually agreed coverage;
- (b) the modification is negligible in its effect under subparagraph (a) of paragraph 3; or
- (c) the modification covers an entity over which the Party has effectively eliminated its control or influence under subparagraph (b) of paragraph 3.

Rectifications

5. The following changes to Parts 1 to 3 of Annex III shall be considered a rectification, provided that they do not affect the mutually agreed coverage provided for in this Chapter:

- (a) a change in the name of an entity;
- (b) a merger of two or more entities listed within the same Part of Annex III; and
- (c) the separation of an entity into two or more entities, provided that all new entities are added to the same Part of Annex III as the original entity.

6. The Party proposing a rectification shall notify the other Party every two years, following the date on which this Title starts applying.¹

¹ The European Union shall be deemed to have complied with this obligation if it notifies any rectifications to the Republic of Kazakhstan in parallel to the cycle of notifications in the framework of the WTO Agreement on Government Procurement.

7. A Party may notify the other Party of an objection to a proposed rectification within 45 days from having received the notification referred to in paragraph 6. Where a Party submits an objection, it shall set out the reasons why it believes the proposed rectification is not a change provided for in paragraph 5, and describe the effect of the proposed rectification on the mutually agreed coverage provided for in the Agreement. If no such objection is submitted in writing within 45 days after having received the notification, the Party shall be deemed to have agreed to the proposed rectification.

The Cooperation Committee

8. If no objection is submitted regarding a proposed modification or rectification within the period provided for in paragraphs 4 and 7, the Cooperation Committee shall amend Annex III to reflect any such modification or rectification. The modification or rectification shall be effective from the day following the date of expiry of the period referred to in paragraphs 4 and 7.

9. If an objection to a proposed modification or rectification has been submitted, the Cooperation Committee shall discuss the matter. The Cooperation Committee may decide to approve a modification or rectification and amend Annex III accordingly.

ARTICLE 137

Transitional period

This Chapter shall start applying five years after the date on which this Title starts applying. For the goods listed in Part 4 of Annex III and for the services covered under Part 6 of Annex III, this Chapter shall start applying eight years after the date on which this Title starts applying.

2. If the price for raw materials or energy goods sold on the domestic market differs from the export price for the same product, the exporting Party shall, upon request of the other Party, provide information on such difference, excluding transportation costs and export taxes.

ARTICLE 140

Trading and export monopolies

The Parties shall not maintain or establish a trading or export monopoly for raw materials or energy goods except when a Party exercises its priority (pre-emption) right to purchase raw and dry gas and gold.

ARTICLE 141

Access and rights to prospect, explore and produce hydrocarbons (crude oil and natural gas)

1. Nothing in this Agreement shall affect the full sovereignty of states in accordance with international law over hydrocarbon resources located in their territory and their inland, archipelagic and territorial waters as well as sovereign rights for the purposes of exploring and exploiting hydrocarbon resources located in their Exclusive Economic Zones and continental shelf.

2. States retain the right to determine the areas within their territory, inland, archipelagic and territorial waters, Exclusive Economic Zones and continental shelf to be made available for the exercise of the activities of prospecting, exploring for and producing hydrocarbons.
3. Whenever a sovereign decision of a state described in paragraph 2 is taken, each Party shall ensure that the enterprises of the other Party are not discriminated as regards the access and exercise of the rights to prospect, explore for and produce hydrocarbons, provided the enterprise in question is established as a juridical person in the territory of the host Party granting the access.
4. Each Party may require an enterprise, which has been granted an authorisation for the exercise of the activities of prospecting, exploring for and producing hydrocarbons, to pay a financial contribution or a contribution in hydrocarbons.
5. The Parties shall take the necessary measures to ensure that licences or other authorisations, through which an enterprise is entitled to exercise the right to prospect or explore for or produce hydrocarbons, are granted following a published procedure or an invitation to potentially interested applicants of the Parties to submit applications by means of a notice. The notice shall specify the type of licence or other authorisation, the relevant geographical area and the proposed date or time-limit for granting a licence or other forms of authorisation.

6. Paragraphs 3 to 5 are without prejudice to the right of a state owned enterprise to obtain access and rights to prospect, explore for and produce hydrocarbons by means of direct negotiations with its Party. When such state owned enterprise decides to transfer fully or partially its right to prospect, explore for and produce hydrocarbons, the obligations stipulated in paragraphs 3 and 5 shall apply.

7. As to the licensing conditions and the licensing authorisation procedure, Article 53 shall also apply.

ARTICLE 142

Conditions for investment in energy goods and raw materials

In order to foster investment in the activities of prospecting, exploring for, extracting and mining of raw materials and energy goods, neither Party shall:

- (a) maintain or adopt measures providing for local content requirements affecting the other Party's products, service suppliers, investors or investments except as otherwise provided for in the Protocol on the Accession of the Republic of Kazakhstan to the WTO and the GATS schedules of specific commitments of the European Union and its Member States;

- (b) maintain or adopt measures whereby an enterprise from the other Party is obliged to transfer or to share intellectual property rights in order to sell products, services or to invest on that Party's territory. The Parties are not precluded from negotiating contracts with investors seeking rights to prospect, explore for, extract and mine raw materials and energy goods for such transfers on a voluntary basis, provided that they are made under market conditions and at a market price.

ARTICLE 143

Transit

1. The Parties shall take all necessary measures to facilitate the transit of energy goods, consistent with the principle of freedom of transit, and in accordance with Articles 7.1 and 7.3 of the Energy Charter Treaty.
2. Each Party shall prohibit the unauthorized taking of raw materials and energy goods transited or transported through its territory by any entity subject to its control or jurisdiction and shall take all appropriate measures to address such an unauthorised taking.

ARTICLE 144

Interruption

1. Each Party shall take all possible measures to ensure that operators of main-line energy transit or transport pipelines and grids:
 - (a) minimise the risk of accidental interruption, reduction or stoppage of transit and/or transport;
 - (b) expeditiously restore the normal operation of such transit or transport, which has been accidentally interrupted, reduced or stopped.

2. A Party through the territory of which the energy goods are in transit, transport, receipt and storage as part of the transport/transit route, shall not, in the event of a dispute over any matter involving the Parties or one or more entities subject to the control or the jurisdiction of a Party, interrupt or reduce, or permit any entity subject to its control or jurisdiction to interrupt or reduce, the existing transit, transport, receipt and storage as part of the transport/transit route of energy goods, except where this is specifically provided for in a contract or other agreement governing such transit, transport, receipt and storage as part of the transport/transit route, prior to the conclusion of a dispute resolution procedure under the relevant contract or the dispute settlement procedure set out in Chapter 14 of this Title concerning emergency situations defined in Article 138(h).

3. A Party shall not be held liable for an interruption or reduction pursuant to this Article in *force majeure* situations or where that Party is unable to supply or to transit energy goods as a result of actions attributable to a third country or an entity under the control or the jurisdiction of a third country.

ARTICLE 145

Access to high-voltage electric energy transmission grids and lines

1. Each Party shall provide the enterprises of the other Party established as juridical persons in the territory of the Party granting the access, a non-discriminatory access to high-voltage electric energy transmission grids and lines, which are partly or fully owned and regulated by the Party granting the access within the available capacities of such grids and lines. The access shall be allocated in a fair and equitable manner.

2. When applying measures relating to such transmission grids and lines, the Party shall ensure that the following principles are respected:
 - (i) all legal and regulatory measures on access and the transportation tariffs are fully transparent;
 - (ii) the measures do not discriminate with respect to the origin of the electricity production within its territory and with respect to the destination of the electricity; and
 - (iii) the application of non-discriminatory transportation tariffs with respect to enterprises of the European Union and the Republic of Kazakhstan.

ARTICLE 146

Regulatory authorities for electricity and gas

1. The Parties shall ensure that regulatory authorities are designated and empowered by the State to regulate the markets for electricity and gas on their respective territories. These regulatory authorities shall be legally distinct and functionally independent from any other public authorities or market participants.
2. The decisions of and the procedures used by a regulatory authority shall be impartial with respect to all market participants.
3. A market participant affected by any decision of a regulatory authority shall have the right to appeal against that decision to an appeal body. If the appeal body is not independent of the parties involved or is not judicial in character, the decisions of the appeal body shall be subject to a review by an impartial and independent judicial authority. The decisions of the appeal body and the judicial authority shall provide reasons in writing. The Parties shall ensure that the final decision of the appeal body or the judicial authority, whichever decides last, is enforced effectively.

ARTICLE 147

Renewable energy sector

1. This Article shall apply to measures which may affect trade and investment between the Parties related to the generation of energy from renewable non-fossil sources, *inter alia*, wind, solar and hydropower, but not to the products from which such energy is generated.
2. Each Party shall:
 - (a) not maintain or adopt measures requiring the formation of partnerships with local companies, unless such partnerships are deemed necessary for technical reasons and the Party maintaining or adopting such measures can demonstrate such technical reasons upon request by the other Party;
 - (b) ensure that any rules concerning authorisation, certification and licensing procedures, if applicable, in particular with regard to equipment, plants and associated transmission network infrastructures, are objective, transparent, non-arbitrary and do not discriminate against applicants from the other Party;

- (c) ensure that administrative charges in renewable energy sector, such as those paid by consumers, planners, architects, builders, equipment installers and suppliers, are transparent and limited in amount to the approximate cost of services rendered;
- (d) ensure that the importation and the use of goods originating in the other Party, or the provision of goods by the other Party's suppliers, are subject to the provisions of Chapter 1 of this Title;
- (e) ensure that provision of services by the suppliers of the other Party are subject to Article 53;
- (f) ensure that the terms, conditions and procedures for the connection and access to electric energy transmission grids are transparent and do not discriminate against suppliers of the other Party or against electric energy from renewable sources; the Parties shall ensure that appropriate grid and market-related measures are taken to minimise the curtailment (limitations) of electric energy produced from renewable energy sources;

(g) not to impose or maintain a requirement (i) for an enterprise of the other Party to purchase or use products of domestic origin or from any domestic source of the Party imposing the requirement, whether specified in terms of particular products, in terms of volume or value of products, or in terms of a proportion of volume or value of its local production; or (ii) that the enterprise's purchases or use of imported products be limited to the amount related to the volume or value of local products that it exports.

3. Where international or regional standards exist with respect to equipment and systems for the generation of energy from renewable and non-fossil sources, the Parties shall use these standards, or their relevant parts, as a basis for their technical regulations except when such international standards or relevant parts would be an ineffective or inappropriate means for the fulfilment of the legitimate objectives pursued. For the purposes of applying this paragraph, the International Organization for Standardization (ISO) and the International Electro technical Commission (IEC) shall be considered relevant international standard-setting bodies.

4. Where appropriate, the Parties shall specify technical regulations based on product requirements in terms of performance, including environmental performance, rather than on product design or description.

5. Nothing in this Article shall be construed to prevent the adoption or enforcement by either Party of measures necessary for the safe operation of the energy networks concerned, or the safety of energy supply, subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between the products, service suppliers or investors of the Parties where the same conditions prevail, or a disguised restriction on trade and investment between the Parties.

ARTICLE 148

Cooperation in raw materials and energy

1. Without prejudice to Articles 204 to 208, the Parties agree to strengthen cooperation and promotion of mutual understanding between the Parties in the field of trade in raw materials and energy goods.
2. The Parties recognise that respecting the principles of transparency and non-discrimination and ensuring that rules are not trade distortive is the best way to create an environment favourable to foreign direct investment in the production and trade of raw materials and energy goods. More generally, such an environment fosters the efficient allocation and efficient use of raw materials and energy goods.

3. The cooperation and the promotion of mutual understanding cover bilateral trade issues as well as issues of common interest stemming from international trade. Such issues include trade distortions impacting global markets, environment and development issues specifically linked to trade in raw materials and energy goods as well as corporate social responsibility in accordance with internationally recognized standards such as the OECD Guidelines for Multinational Enterprises and Due Diligence Guidance. The cooperation and the promotion of mutual understanding include exchange of data and information on the regulatory framework of the raw materials and energy sectors. This shall not be construed as requiring the Parties to furnish any information, the disclosure of which they consider contrary to their respective security interest.

4. Either Party may request the organisation of an *ad hoc* meeting related to raw materials and energy goods or an *ad hoc* session on raw materials and energy goods during the Cooperation Committee meetings. The bilateral cooperation could additionally, if appropriate, be extended to the relevant plurilateral or multilateral fora in which both Parties participate.

ARTICLE 149

Early warning mechanism

1. The Parties establish an early warning mechanism to adopt practical measures aimed at preventing and rapidly reacting to an emergency situation or to a threat of an emergency situation.
2. The Parties shall jointly undertake actions (i) for an early evaluation of potential risks and problems related to the supply and demand of natural gas, oil or electric energy and (ii) for the prevention or rapid reaction in case of an emergency situation or a threat of an emergency situation.
3. If either Party becomes aware of an emergency situation or of a situation which in its opinion could lead to an emergency situation, that Party shall notify the other Party within the shortest possible time.
4. For the purpose of this Article, the Parties agree that the responsible bodies are the Minister of the Republic of Kazakhstan in charge of the respective energy matters and the Member of the European Commission in charge of energy.
5. Upon notification, the Parties shall provide each other with an assessment of the situation.

6. Either Party may request consultations within three calendar days of the notification to:
 - (a) elaborate a common evaluation of the situation;
 - (b) develop recommendations to eliminate the emergency situation and to minimise the impact of the emergency situation;
 - (c) create a Special Monitoring Group *inter alia* to monitor energy flows at the relevant points of the concerned infrastructure.

7. The Parties shall, if appropriate, cooperate with third countries to eliminate the threat of an emergency situation or to overcome the emergency situation.

8. In case the emergency situation persists, either Party may start an emergency dispute settlement procedure, in accordance with the special mechanism provided for in Chapter 14 (Dispute Settlement) of this Title.

9. The Parties shall refrain from any actions that may deepen or reinforce the emergency situation, as appropriate in a given situation, from the moment of the notification.

10. A Party shall not rely on or introduce as evidence in dispute settlement procedures under this agreement

- (a) positions taken or proposals made by the other Party in the course of a procedure under this Article; or,
- (b) the fact that the other Party has indicated its willingness to accept a solution to the emergency situation subject to this Article.

11. The Cooperation Committee may develop, as necessary, detailed implementation provisions for the application of this Article.

ARTICLE 150

Exceptions

1. This Chapter is without prejudice to any exceptions, reservations or restrictions stipulated in this Agreement.

2. The provisions of this Chapter shall neither apply to research and development projects, nor to demonstration projects carried out on a non-commercial scale.

3. Nothing in this Chapter shall be construed to prevent the adoption or enforcement by either Party of measures necessary for the safe operation of the energy infrastructure, including energy transport and production facilities concerned in the interest of national security or public safety, including the prevention of and reaction to an emergency situation, subject to the requirement that such measures are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between the products, service suppliers or investors of the Parties where the same conditions prevail, or a disguised restriction on trade and investment between the Parties.

CHAPTER 10

TRADE AND SUSTAINABLE DEVELOPMENT

ARTICLE 151

Context and objectives

1. The Parties recall the Agenda 21 of the United Nations Conference on Environment and Development of 1992, the International Labour Organisation's (ILO) Declaration on Fundamental Principles and Rights at Work of 1998, the Johannesburg Plan of Implementation on Sustainable Development of 2002, the Ministerial Declaration of the UN Economic and Social Council on Generating Full and Productive Employment and Decent Work for All of 2006, the ILO Declaration on Social Justice for a Fair Globalisation of 2008 and the Outcome Document of the UN Conference on Sustainable Development of 2012 incorporated in Resolution 66/288 adopted by the General Assembly on 27 July 2012, entitled "The Future We Want".

2. The Parties reaffirm their commitment to promote the development of international trade in such a way as to contribute to the objective of sustainable development, for the welfare of present and future generations. The Parties will strive to ensure that this objective is integrated and reflected at every level of their trade relationship.

ARTICLE 152

Multilateral environmental and labour standards and agreements

1. The Parties recognise the value of international environmental governance and agreements as a response of the international community to global or regional environmental problems.

2. The Parties recognise the full and productive employment and decent work for all as a key element of sustainable development for all countries and as a priority objective of international cooperation.

3. In this context, the Parties reaffirm their commitment to effectively implement in their law and practice the multilateral environmental agreements they are a Party to and the ILO conventions ratified by the Republic Kazakhstan and the European Union Member States respectively.

ARTICLE 153

Right to regulate and levels of protection

1. The Parties recognise the right of each Party to establish its own levels of domestic environmental and labour protection, and to adopt or modify its relevant law and policy accordingly, consistently with the internationally recognised standards and agreements referred to in Article 152. The Parties shall aim at high levels of environmental and labour protection.
2. The Parties recognise that it is inappropriate to encourage trade or investment by weakening or reducing the levels of protection afforded in domestic environmental or labour law.
3. A Party shall not derogate from or, through a sustained or recurring course of action or inaction, fail to enforce effectively its environmental and labour law, in order to encourage trade or investment.

ARTICLE 154

Trade and investment promoting sustainable development

1. The Parties reaffirm their commitment to enhance the contribution of trade to the goal of sustainable development in its economic, social and environmental dimensions. Accordingly, they agree to promote
 - (a) trade and investment in environmental goods and services and in climate friendly products and technologies;
 - (b) the use of sustainability assurance schemes, such as fair and ethical trade or eco-labelling; and
 - (c) Corporate Social Responsibility practices.

2. The Parties shall exchange information and share experience on their actions to promote coherence and mutual supportiveness between trade, social and environmental objectives. Furthermore, the Parties shall enhance their cooperation and dialogue on sustainable development issues that may arise in the context of their trade relations including on relevant aspects set out in Title IV (Cooperation in the area of economic and sustainable development).

3. Such cooperation and dialogue shall involve relevant stakeholders, in particular social partners, as well as other civil society organisations, through the civil society cooperation established under Article 251.

4. The Cooperation Committee may adopt rules for such cooperation and dialogue.

ARTICLE 155

Dispute Settlement

Sub-section 2 of section 3 of Chapter 14 of this Title does not apply to disputes under this Chapter. For any such dispute, after the arbitration panel has delivered its final report pursuant to Articles 180 and 182, the Parties, taking the report into account, shall discuss suitable measures to be implemented. The Cooperation Committee shall monitor the implementation of any such measures and shall keep the matter under review, including through the mechanism referred to in Article 154(3).

CHAPTER 11

COMPETITION

ARTICLE 156

Principles

The Parties recognise the importance of free and undistorted competition in their trade relations. The Parties acknowledge that anti-competitive business practices and state interventions (including subsidies) have the potential to distort the proper functioning of markets and undermine the benefits of trade liberalisation.

ARTICLE 157

Antitrust and mergers legislation and its implementation

1. Each party shall maintain in its territory comprehensive competition law which effectively addresses anti-competitive agreements, concerted practices and anti-competitive unilateral conduct of enterprises with dominant market power, and which provide effective control of concentrations.
2. Each Party shall maintain operationally independent authorities responsible and appropriately equipped for the effective enforcement of the above-mentioned competition law.
3. The Parties recognise the importance of applying their respective competition law in a transparent and non-discriminatory manner, respecting the principles of procedural fairness and rights of defence of the enterprises concerned.

ARTICLE 158

State monopolies, state enterprises and enterprises entrusted with special or exclusive rights or privileges

1. Nothing in this Chapter prevents a Party from designating or maintaining state monopolies, state enterprises or from entrusting enterprises with special or exclusive rights or privileges according to its law.
2. With regard to state monopolies, state enterprises and enterprises entrusted with special or exclusive rights or privileges involved in economic activities, each Party shall ensure that such enterprises are subject to the competition law referred to in Article 157. An economic activity consists in offering goods and services on a market. For the purpose of this Chapter, an economic activity does not include activities performed in the exercise of governmental authority, namely activities carried out neither on a commercial basis nor in competition with one or more economic operators.
3. The application of the competition law should not obstruct the performance, in law or in fact, of the particular tasks of public interest assigned to the enterprises in question. Exceptions should be limited and transparent. Trade and investment should not be affected to such an extent that would undermine the objective of this agreement.

ARTICLE 159

Subsidies

1. For the purpose of this Article, a “subsidy” is a measure which fulfils the conditions of Article 1 of the SCM Agreement irrespective whether it is granted to an enterprise for the production of goods or the supply of services and which is specific within the meaning of Article 2 of that Agreement.
2. Each Party shall ensure transparency in the area of subsidies. To this end, each Party shall report every two years from the date of application of this Title to the other Party on the legal basis, including the policy objective or the purpose of the subsidy, the duration or any other time limits, the form and where possible the amount or the budget and the recipient of the subsidy granted by its government or a public body. Such report is deemed to have been provided if the relevant information is made available on a publicly accessible website or through the WTO notification mechanism.

3. If a Party considers that a subsidy granted by the other Party is negatively affecting the first Party's interests, the first Party may request consultations on the matter. The requested Party shall accord due consideration to such a request. The consultations should in particular aim at specifying the policy objective of the subsidy, whether the subsidy has an incentive effect and is proportionate and any measures taken to limit the potential distortive effect on trade and investment of the requesting Party.¹

4. In order to facilitate the consultations, the requested Party shall provide information on the subsidy in question within no more than 90 days from the date of receipt of the request. If the requesting Party, after receiving information on the subsidy in question, considers that the subsidy concerned by the consultations negatively affects or may negatively affect in a disproportionate manner, the requesting Party's trade or investment interests, the requested Party will use its best endeavours to address the negative effects on the requesting Party's trade interests caused by the subsidy in question.

5. Paragraphs 3 and 4 shall not apply to subsidies related to fisheries and trade in goods covered by Annex 1 of the WTO Agreement on Agriculture.

¹ A subsidy is proportionate if its amount is limited to what is necessary to achieve the objective.

ARTICLE 160

Dispute settlement

The provisions on dispute settlement set out in Chapter 14 of this Title shall not apply to Articles 156 to 158 and paragraphs 3 and 4 of Article 159.

ARTICLE 161

Relationship with the WTO

The provisions of this Chapter are without prejudice to the rights and obligations of a Party under the WTO Agreement, in particular the SCM Agreement and the Understanding on Rules and Procedures Governing the Settlement of Disputes.

ARTICLE 162

Confidentiality

When exchanging information under this Chapter, the Parties shall take into account the limitations imposed by the requirements of professional and business secrecy.

CHAPTER 12

STATE-OWNED ENTERPRISES, STATE-CONTROLLED ENTERPRISES AND ENTERPRISES GRANTED SPECIAL OR EXCLUSIVE RIGHTS OR PRIVILEGES

ARTICLE 163

Definitions

For the purposes of this Chapter, the following definitions shall apply:

- (a) “State-owned enterprise” means any enterprise involved in a commercial activity over which a Party at central or sub-central level owns more than 50 % of the enterprise’s subscribed capital or the votes attached to the shares issued by the enterprise.

- (b) “State-controlled enterprise” means any enterprise involved in a commercial activity over which a Party at central or sub-central level exercises or has the possibility of exercising decisive influence directly or indirectly by virtue of its financial participation therein or by the rules or practices on its functioning, or by any other means relevant to establish such decisive influence. Decisive influence on the part of a Party shall be presumed when a Party, directly or indirectly, can appoint more than half of the members of the enterprise’s administrative, managerial or supervisory body.

- (c) “Enterprise granted special or exclusive rights or privileges” means any enterprise, public or private involved in a commercial activity, that has been granted by a Party, at central or sub-central level, in law or in fact, exclusive or special rights or privileges. Such rights or privileges may include the right to act as a distributor, a network provider or another intermediary for the purchase or sale of a good or the provision or receipt of a service. Enterprises granted exclusive rights covers monopolies involved in a commercial activity.

- (d) A “monopoly” means an entity involved in a commercial activity, including a consortium, that in a relevant market in the territory of a Party is designated at central or sub-central level as the sole supplier or purchaser of a good or service, but does not include an entity that has been granted an exclusive intellectual property right solely by reason of such grant.

- (e) “Special rights” means rights granted by a Party at central or sub-central level to a limited number of enterprises within a given geographical area or a product or service market the effect of which is to substantially limit the ability of any other enterprise to carry out its activity in the same geographical area under substantially equivalent conditions. The granting of a licence or a permit to a limited number of enterprises in allocating a scarce resource through objective, proportional and non-discriminatory criteria is not in and of itself a special right.
- (f) “Non-discriminatory treatment” means national treatment or “most favoured nation” treatment as set out in this Agreement, whichever is the better.
- (g) “In accordance with commercial considerations” means consistent with customary business practices of a privately held enterprise operating according to market economy principles in the international trade.
- (h) “Designate” means to establish or authorise a monopoly, or to expand the scope of a monopoly, whether in law or in fact.

ARTICLE 164

Scope

1. The Parties confirm their rights and obligations under Article XVII, paragraphs 1 through 3, of the GATT 1994, the Understanding on the Interpretation of Article XVII of the GATT 1994, as well as under Article VIII of the GATS, paragraphs 1, 2 and 5 and the Chapter on state-owned and state-controlled Enterprises, Enterprises with Special and Exclusive Privileges of the Protocol on the Accession of the Republic of Kazakhstan to the WTO, which are hereby incorporated into and made part of this Agreement and shall apply.
2. This Chapter does not apply to “covered procurement” by a Party or its procuring entities within the meaning of Article 120.
3. This Chapter shall apply to all economic activities covered by this Agreement. Services which are not listed in a Party’s GATS schedule of specific commitments shall not be subject to the provisions of Articles 166 and 167.

ARTICLE 165

1. Without prejudice to the Parties' rights and obligations under this Chapter, nothing in this Chapter prevents the Parties from establishing or maintaining state-owned or controlled enterprises or designating or maintaining monopolies or from granting enterprises special or exclusive rights or privileges.
2. Where an enterprise falls within the scope of application of this Chapter, the Parties shall not require or encourage such an enterprise to act in a manner inconsistent with this Agreement.

ARTICLE 166

Non-discrimination

Unless otherwise provided for in Article 142 or in a Party's GATS schedule of specific commitments or in a Party's reservations to national treatment set out in Annex I (Reservations in accordance with Article 46 of Chapter 5 on Services and Establishment), each Party shall ensure in its territory that any enterprise satisfying the conditions set out in Article 163(c) in its purchase or sale of a good or a service accords non-discriminatory treatment to a good of the other Party and/or to a service or a service supplier of the other Party.

ARTICLE 167

Commercial considerations

Except to fulfil the purpose¹ for which special or exclusive rights or privileges have been granted, or in the case of a state-owned or controlled enterprise to fulfil its public mandate, and provided that the enterprise's conduct in fulfilling that purpose or mandate is consistent with the provisions in Article 166 of this Chapter and the Chapter on Competition, each Party shall ensure that any enterprise referred to in Article 163(a) to 163(c) acts in accordance with commercial considerations in the relevant territory in its purchases and sales of goods, including with regard to price, quality, availability, marketability, transportation and other terms and conditions of purchase or sale, as well as in its purchases or supply of services, including when these goods or services are supplied to or by an investment of an investor of the other Party.

¹ Such as a public service obligation.

ARTICLE 168

Pricing

For greater clarity, charging different prices in different markets, or within the same market, where such differences are based on normal commercial considerations, such as supply and demand conditions, is not in itself inconsistent with Articles 166 and 167.

ARTICLE 169

Corporate governance

1. The Parties shall ensure that enterprises referred to in Article 163(a) to 163(c) observe high standards of transparency and corporate governance in accordance with the 2005 OECD Guidelines on Corporate Governance of State-Owned Enterprises. Further development of the policy of corporate governance in enterprises referred to in Article 163(a) to 163(c) should be conducted in accordance with these Guidelines.

2. Each Party shall ensure that any regulatory body responsible for regulating enterprises referred to in Article 163(a) to 163(c) is legally distinct and functionally independent from, and not accountable to, any of the enterprises referred to in Article 163(a) to 163(c).

3. Each Party shall ensure the enforcement of laws and regulations in a consistent and non-discriminatory manner at all levels of government, be it central or local, and including on enterprises referred to in Article 163(a) to 163(c). Exemptions must be limited and transparent.

ARTICLE 170

Exchange of information

1. A Party which has a reason to believe that its interests under this Agreement are being adversely affected by the operations of an enterprise or enterprises referred to in Article 163(a) to 163(c) of the other Party, may request that latter Party to supply information about the operations of its enterprise related to the carrying out of the provisions of this Agreement. Such information may include organisational, corporate and financial information.

2. Each Party shall, at the request of the other Party, make available information concerning specific enterprises referred to in Article 163(a) to 163(c) which do not qualify as small and medium-sized enterprises as defined in each Party's law. Requests for such information shall indicate the enterprise, the products/services and markets concerned, and include indications that the enterprise is engaging in practices that hinder trade or investment between the Parties.

3. Each Party shall, at the request of the other Party, make available information concerning exemptions, non-conforming measures, immunities and any other measures, including more favourable treatment, applicable in the territory of the requested Party to any enterprise referred to in Article 163(a) to 163(c).

4. The provisions of paragraphs 1 to 3 shall not require any Party to disclose confidential information which would impede law enforcement or otherwise be contrary to the public interest or would prejudice the legitimate commercial interests of particular enterprises.

CHAPTER 13

TRANSPARENCY

ARTICLE 171

1. Each Party shall respond promptly to all requests by the other Party for specific information on any of its measures of general application or international agreements which pertain to or affect this Title. Each Party shall establish one or more enquiry points to provide to interested persons of the other Party, upon request, specific information on all such matters.¹ The Parties shall notify each other enquiry points within 3 months after the start of the application of this Title. Enquiry points need not be depositories of laws and regulations.

¹ The enquiry point for the Republic of Kazakhstan is the enquiry point set up under the WTO GATS Agreement.

2. All laws, regulations, decrees, decisions and administrative rulings of general application of the Parties pertaining to or affecting any matter governed by this Title shall be published promptly in a manner that fulfils the applicable requirements of the WTO Agreement, including those of Article X of the GATT 1994, Article III of the GATS, and Article 63 of the WTO TRIPS Agreement. The Parties shall update published resources, including websites, containing such measures, on a regular basis and make them readily available to interested persons. Such measures shall be available while they are in effect and for a reasonable period after they are no longer in effect.

3. The Parties shall publish all laws, regulations, decrees, decisions and administrative rulings of general application pertaining to or affecting any matter governed by this Title, prior to their adoption. The Parties shall provide a reasonable period of time, normally not less than 30 calendar days, for interested persons to comment to the responsible authorities before the relevant measure is finalised or submitted to the authorities responsible for its adoption. Any comments received during the period for comments will be taken into account.

4. No law, regulation, decree, decision or administrative ruling of general application of the Parties pertaining to or affecting any matter governed by this Title shall become effective prior to publication.

5. Nothing in this Agreement shall require any Party to provide confidential information, the disclosure of which would impede law enforcement, or otherwise be contrary to the public interests, or which would prejudice legitimate commercial interests of particular enterprises, public or private.

6. Article 55 shall apply with respect to this Chapter.

CHAPTER 14

DISPUTE SETTLEMENT

SECTION 1

OBJECTIVE AND SCOPE

ARTICLE 172

Objective

The objective of this Chapter is to establish an effective and efficient mechanism for avoiding and settling any dispute between the Parties concerning the interpretation and application of this Agreement with a view to arriving, where possible, at a mutually agreed solution.

2. A Party shall seek consultations by means of a written request delivered to the other Party, copied to the Cooperation Committee, identifying the measure at issue and the provisions referred to in Article 173 that it considers applicable.
3. The Party to which the request is made shall respond to the request for consultations within 10 days of the date of its receipt, unless otherwise provided for in this Agreement or agreed between the Parties.
4. The consultations shall be held within 30 days of the date of receipt of the request and take place, unless the Parties agree otherwise, in the territory of the Party to which the request is made. The consultations shall be deemed concluded within 30 days of the date of receipt of the request, unless both Parties agree to continue consultations. Consultations, and in particular all information disclosed and positions taken by the Parties during the consultations, shall be confidential, and without prejudice to the rights of either Party in any further proceedings.
5. Consultations on matters of urgency shall be deemed concluded within 15 days of the date of receipt of the request by the requested Party unless both Parties agree to continue consultations.

6. If the Party to which the request is made does not respond to the request for consultations within 10 days of the date of its receipt, or if consultations are not held within the timeframes laid down in paragraph 3 or in paragraph 4 respectively, or if the Parties agree not to have consultations, or if consultations have been concluded and no mutually agreed solution has been reached, the Party that sought consultations may have recourse to Article 176.

7. During consultations each Party shall provide sufficient factual information, so as to allow a complete examination of the manner in which the measure at issue could affect the operation and application of this Agreement.

8. The consultations shall be deemed concluded within five working days after the date of receipt of the request for consultations, unless the Parties agree otherwise, when they concern emergency situations as defined in Article 138(h).

ARTICLE 175

Mediation

Any Party may request the other Party to enter into a mediation procedure with respect to any measure adversely affecting trade or investment between the Parties pursuant to Annex VII (Mediation Mechanism).

SECTION 3

DISPUTE SETTLEMENT PROCEDURES

SUB-SECTION 1

ARBITRATION PROCEDURE

ARTICLE 176

Initiation of the arbitration procedure

1. Where the Parties have failed to resolve the dispute by recourse to consultations as provided for in Article 174, the Party that sought consultations may request the establishment of an arbitration panel in accordance with this Article.

2. The request for the establishment of an arbitration panel shall be made by means of a written request delivered to the other Party and the Cooperation Committee. The complaining Party shall identify in its request the measure at issue, and it shall explain how such measure constitutes a breach of the provisions referred to in Article 173 in a manner sufficient to present the legal basis for the complaint clearly.

ARTICLE 177

Establishment of the arbitration panel

1. An arbitration panel shall be composed of three arbitrators.
2. Within 10 days of the date of delivery of the written request for the establishment of an arbitration panel to the Party complained against, the Parties shall consult in order to reach an agreement on the composition of the arbitration panel.

Unless a Party disagrees, the arbitration panel may decide not to convene a hearing.
23. Unless the Parties agree otherwise, the hearing shall be held in Brussels if the complaining Party is the Republic of Kazakhstan and in Astana if the complaining Party is the European Union.

39. The submission shall contain a description of the person making the submission, whether natural or legal, including its nationality or place of establishment, the nature of its activities, its legal status, general objectives and the source of its financing, and specify the nature of the interest that the person has in the arbitration panel proceeding. It shall be drafted in the languages chosen by the Parties to the dispute in accordance with rules 42 and 43 of these Rules of Procedure.
40. The arbitration panel shall list in its report all the submissions it has received that conform to rules 38 and 39 of these Rules of Procedure. The arbitration panel shall not be obliged to address in its report the arguments made in such submissions. Any such submission shall be delivered to the Parties to the dispute for their comments. The comments of the Parties to the dispute shall be delivered within 10 days of receipt of the submission, and any such comments shall be taken into consideration by the arbitration panel.

Urgent cases

41. In the cases of urgency referred to in Chapter 14 of Title III of this Agreement, the arbitration panel, after consulting the Parties, shall adjust the time-limits referred to in these rules as appropriate and shall notify the Parties of such adjustments.

Translation and interpretation

42. During the consultations referred to in Article 174 of this Agreement, and no later than the meeting referred to in rule 8(e) of these Rules of Procedure, the Parties to the dispute shall endeavour to agree on a common working language for the proceedings before the arbitration panel.
43. If the Parties to the dispute are unable to agree on a common working language, each Party shall make its written submissions in its chosen language. In such case, that Party shall provide at the same time a translation in the language chosen by the other Party, unless its submissions are written in one of the working languages of the WTO. The Party complained against shall arrange for the interpretation of oral submissions into the languages chosen by the Parties.
44. Arbitration panel reports shall be issued in the language or languages chosen by the Parties to the dispute.
45. Any Party to the dispute may provide comments on the accuracy of the translation of any translated version of a document drawn up in accordance with these rules.
46. Each Party shall bear the costs of the translation of its written submissions. Any costs incurred for translation of an arbitration panel report shall be borne equally by the Parties to the dispute.

The Party to which such request is made shall, within 20 days of receipt of the request, deliver a written response containing its comments on the information contained in the request.

2. ARTICLE 4
