Adaptation to the regulatory procedure with scrutiny

Proposal for a

REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

amending Council Regulation (EC) No 1172/98 on statistical returns in respect of the carriage of goods by road as regards the implementing powers conferred on the Commission

(presented by the Commission)

EXPLANATORY MEMORANDUM

1. CONTEXT OF THE PROPOSAL

1.1 Reform of comitology procedures

Council Decision 1999/468/EC of 28 June 1999 laying down the procedures for the exercise of implementing powers conferred on the Commission¹ was amended by Council Decision 2006/512/EC of 17 July 2006².

Article 5a of Decision 1999/468/EC as amended introduces a new regulatory procedure with scrutiny for measures of general scope designed to amend non-essential elements of a basic instrument adopted in accordance with the procedure referred to in Article 251 of the Treaty, including by deleting some of those elements or by supplementing the instrument by the addition of new non-essential elements.

1.2. Priority alignment and general alignment

In a joint declaration³, the European Parliament, the Council and the Commission agreed a list of basic instruments that it was urgent to adapt to the amended Decision in order to introduce the new regulatory procedure with scrutiny (priority alignment). For the regulatory procedure with scrutiny to be applicable to the other instruments adopted under the co-decision procedure that were already in force at the time Decision 2006/512/EC came into effect, the joint declaration also called for these instruments to be adjusted in accordance with the applicable procedures (general alignment).

The Commission undertook to examine all these instruments with a view to submitting, by the end of 2007, legislative proposals to adapt them, where necessary, to the new regulatory procedure with scrutiny⁴.

1.3. Method

As mentioned in the Commission's Communication to the European Parliament and the Council of (...), the Commission has carefully examined all the instruments adopted under the codecision procedure in order to identify those which permit the Commission to adopt measures of general scope designed to amend non-essential elements of the basic instrument in question. The Commission has identified more than 200 instruments that should be adjusted.

Some of these instruments come under the Commission's codification programme. Among these is Council Regulation (EC) No 1172/98 of 25 May 1998 on statistical returns in respect of the carriage of goods by road⁵. Depending on how far the codification process has progressed, adaptation to the new procedure must be effected either by recasting the codified proposal or, as in the present case, by a legislative amendment.

2. LEGAL ELEMENTS OF THE PROPOSAL

The purpose of the adaptation is to introduce the new regulatory procedure with scrutiny, as provided for in Article 5a of Decision 1999/468/EC as amended.

In this connection, under Regulation (EC) No 1172/98 the Commission is authorised to adapt the data collection characteristics and the contents of the Annexes and to lay down the minimum precision requirements for the statistical returns transmitted by the Member States and the implementing procedures for that Regulation, including measures for adapting it to economic and technical progress. Since these measures of general scope are designed to amend non-essential elements of the Regulation in question or to supplement it by the addition of new non-essential elements, they must be adopted in accordance with the regulatory procedure with scrutiny provided for in Article 5a of Decision 1999/468/EC.

Since the basic instrument is a Regulation, it must be adapted by means of an equivalent instrument.
