

# Adjustment Dynamics in the Euro Area: Experiences and Challenges

## - EU Economy Review 2006 -

### List of contents

<b>I</b>	<b>Overview .....</b>	<b>3</b>
	1. Economic and monetary union in the early years: achievements and adjustment challenges	
	2. The nature of the adjustment process	
	3. The approach to analysis in this study	
	4. Main findings about adjustment experience	
	5. Issues for policy consideration	
<b>II</b>	<b>EMU: Objectives, expectations and issues.....</b>	<b>9</b>
	1. EMU: Shaping the ideas	
	2. EMU: Policy initiatives and market experience	
	2.1 Early policy initiatives	
	2.2 Through the exchange rate turbulence of the early 1990s	
	3. Stabilisation and adjustment in EMU	
	3.1 Policy assignment under EMU	
	3.2 Exposure and adaptability to shocks	
	4. Experience with country-specific shocks under monetary union	
<b>III</b>	<b>Economic developments and adjustment.....</b>	<b>19</b>
	1. Macroeconomic developments across the euro area – a bird's eye view	
	2. A closer look at key real and financial variables	
	2.1 Consumption	
	2.1.1 The factors influencing consumer spending	
	2.1.2 Consumption equations	
	2.1.3 Econometric results	
	2.1.4 Conclusions	
	2.2 Investment	
	2.2.1 Recent trends and developments in investment spending in the euro area	
	2.2.2 Modelling investment behaviour	
	2.2.3 Econometric results	
	2.2.4 Conclusions	
	2.3 Inflation	
	2.3.1 Co-movement between the GDP deflator, the private consumption deflator and the HICP	
	2.3.2 Inflation dispersion	
	2.3.3 Conclusions	

- 2.4 Financial market developments
  - 2.4.1 Financial integration
  - 2.4.2 The money market
  - 2.4.3 Bond market developments
  - 2.4.4 Equity market developments
  - 2.4.5 Credit developments
  - 2.4.6 The household sector
  - 2.4.7 The corporate sector
- 3. Closing remarks

Annex A: Table of macroeconomic indicators

Annex B: Analysis of consumer expenditure – details of econometric results

Annex C: Analysis of investment expenditure – details of econometric results

#### **IV Market adjustment: The competitiveness channel ..... 79**

- 1. Introduction
- 2. Price and cost competitiveness: short-term adjustment and long-term forces
- 3. Change in competitiveness and cyclical divergences: a comparison of pre-and post 1999 years
- 4. Developments in price and cost competitiveness indicators
- 5. Factors explaining the change in cost competitiveness
  - 5.1 Checks of robustness
  - 5.2 Checking for asymmetries in the growth of unit labour costs over the cycle
  - 5.3 Investigating the role of hiring and firing restrictions
  - 5.4 Country-specific analysis
- 6. Conclusions
  - Annex : Relative labour market performance and trends in euro-area countries, 1990-98 and 1999-2005

#### **V Market adjustment: The real interest rate channel..... 109**

- 1. Introduction
- 2. Real interest rates in the euro area: A look at the data
  - 2.1 Definitions and some general measurement issues
  - 2.2 Developments in the run-up to the adoption of the euro
  - 2.3 Real interest rates in the euro-area years
- 3. The role of real interest rates in a monetary union
- 4. Real-interest-rate differentials in the euro area and their causes
  - 4.1 Components of real interest rate differentials
  - 4.2 Persistence of cross-country differences in real rates
  - 4.3 Implications of equilibrium concepts for real interest rates
- 5. The impact of real interest rates in the euro area
  - 5.1 Monetary transmission, real interest rates and economic activity
  - 5.2 Monetary and Financial Institutions, real interest rates and credit growth
  - 5.3 Private households and decisions on durables and house purchases

- 5.4 Non-MFI firms and their investment decisions
- 6. The relative importance of the real-interest rate channel of adjustment
  - 6.1 Counteracting adjustment channels in the euro area
  - 6.2 Adjustment experiences: Are there lessons from the United States?
  - 6.3 Assessing the overall importance of the real-interest-rate channel
- 7. Summary and concluding remarks

## **VI Policy-based adjustment..... 143**

- 1. Introduction
- 2. Fiscal developments
  - 2.1 The fiscal stance in the first years of the euro area
  - 2.2 Expenditure and revenue developments decomposed
- 3. Structural policies
  - 3.1 Labour market and the welfare state
  - 3.2 Product markets
  - 3.3 The financial sector
- 4. Possible interactions and spillovers

## **VII Country adjustment experience..... 177**

- 1. Analytical framework and preview of results
  - 1.1 Economic model and country case studies
  - 1.2 General findings of the model analysis
  - 1.3 Key features of the country case studies
- 2. A model-based exploration of adjustment dynamics in the euro area
  - 2.1 Introduction
  - 2.2 Analysing the characteristics of adjustment in the euro area
    - 2.2.1 Origins of diverging economic developments
    - 2.2.2 Factors determining the characteristics of adjustment
  - 2.3 The DSGE model
    - 2.3.1 Description of the model
    - 2.3.2 Standard simulations
    - 2.3.3 International spillover of shocks within a monetary union
- 3. Country dynamics
  - 3.1 Introduction
  - 3.2 Germany
    - 3.2.1 Macroeconomic scene setter
    - 3.2.2 Policy assessment
  - 3.3 Spain
    - 3.3.1 Macroeconomic scene setter
    - 3.3.2 Policy assessment
  - 3.4 Ireland
    - 3.4.1 Macroeconomic scene setter

- 3.4.2 Policy assessment
  - 3.5 Italy
    - 3.5.1 Macroeconomic scene setter
    - 3.5.2 Policy assessment
  - 3.6 The Netherlands
    - 3.6.1 Macroeconomic scene setter
    - 3.6.2 Policy assessment
  - 3.7 Portugal
    - 3.7.1 Macroeconomic scene setter
    - 3.7.2 Policy assessment
- 4. Summing up: adjustment dynamics, policy interactions and spillovers
  - Annex: A two-country-three-sector dynamic stochastic general equilibrium (DSGE) model

## **VIII Adjustment and surveillance issues ..... 241**

- 1. Enhancing adjustment dynamics
  - 1.1 Structural reforms and wage determination
  - 1.2 Fiscal challenges
    - 1.2.1 Some theoretical considerations on the effectiveness and desirability of fiscal stabilisation in EMU
    - 1.2.2 Automatic fiscal stabilisation considering budgetary risks and uncertainty
    - 1.2.3 Fiscal consolidation in a context of adjustment dynamics
    - 1.2.4 Uncertainty and measurement issues in the fiscal framework
    - 1.2.5 Fiscal policy and fiscal surveillance
  - 1.3 Financial market integration
    - 1.3.1 The contribution of financial integration
    - 1.3.2 Challenges in financial integration
    - 1.3.3 Policies to tap the full gains of financial integration
- 2. Economic catching-up within the euro area
  - 2.1 Adjustment dynamics in the euro area and initial conditions on euro adoption
  - 2.2 The specific dimension of economic and financial catching-up
  - 2.3 Policy management during catching-up
